S 4. (a) Should the emissions cap established under part 242 of title 6 of the New York code, rules and regulations be lowered in such a manner that results in increased proceeds associated with the sale or auction of emission allowances subject to such part, for fiscal years 2012-2013, 2013-2014 and 2014-2015, the New York state energy research and development authority shall allocate all proceeds in excess of sixty-six million dollars per fiscal year collected from such auction or sale for energy efficiency programs to reduce greenhouse gas emissions. Energy efficiency programs may include, but shall not be limited to: (1) efficiency and load management programs; (2) demand response programs; (3) programs for research, development and commercialization of products of processes which are more energy-efficient than those generally available; (4) programs for development of markets for such products and processes, including recommendations for new appliance and product efficiency standards; (5) programs providing support for energy use assessment, real time monitoring systems, engineering studies and services related to new construction or major building renovation, including integration of such assessments, systems, studies and services with building energy codes programs and processes, or those regarding the development of high performance or sustainable buildings that exceed code; (6) programs for the design, manufacture, commercialization and purchase of energy-efficient appliances and heating, air conditioning and lighting devices; (7) programs for planning and evaluation; (8) programs providing commercial, industrial and institutional customers with greater flexibility and control over demand side investments funded by the programs at their facilities; and (9) programs for public education regarding energy efficiency and demand management; provided, however, that not more than 10 percent of such funds shall be expended for items (3) and (4) collectively.

(b) For each fiscal year thereafter, such authority shall allocate all proceeds collected from such auction or sale of such allowances allocated by the department of environmental conservation as follows: (1) at least seventy percent of such proceeds for energy efficiency and innovative carbon abatement programs approved by such authority's members; and (2) up to thirty percent of such proceeds for programs to reduce greenhouse gas emissions in the power sector through the development and installation of renewable electricity generation.
