10 and proximate result of an accident not caused by such member's own

FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would amend the benefits of members of public retirement systems who contract any form of disease or disability related to exposure to any elements in connection with the World Trade Center tragedy of September 11, 2001. The annual accidental disability benefit would be 75% of a member's final average salary less workers compensation, regardless of a member's plan coverage. Currently, eligible members receive the accidental disability benefit specified in the plan under which they are covered. This improved benefit would be payable to current members who may file for this benefit in the future, or current retirees (or their beneficiaries) who are already receiving World Trade Center related retirement benefits.

If this bill is enacted, it would lead to more disabilities being classified as "in performance of duty" or "accidental". For the disabilities so classified due to this bill, the cost would depend on the age, service, salary and plan of the affected member or retiree, as well as whether such person would have otherwise been eligible for, or has been receiving an ordinary disability, a performance of duty disability or a service retirement. For those who contract such disease prior to retirement, it is estimated that there could be per person one-time costs of as much as four (4) times salary. For those who contract such disease subsequent to a service retirement, it is estimated that there would be an average per person cost of approximately 150% of final average salary. For those who contract such disease subsequent to an ordinary disability retirement, it is estimated that there would be an average per person cost of approximately four (4) times final average salary.

For the 38 retirees known to be affected at this time, there would be a one-time cost of \$7.96 million, assuming a payment date of March 1, 2016.

Pursuant to Section 25 of the Retirement and Social Security Law, the increased cost would be borne entirely by the State of New York and would require an itemized appropriation sufficient to pay the cost of the provision. A precise cost for future years can't be determined at this time. Every year a cost will be determined (and billed to the state) based on those benefiting from this provision.
