AN ACT to amend the public health law and the state finance law, in relation to enacting the "New York health act" and to establishing New York Health

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1     Section 1. Short title. This act shall be known and may be cited as  
2     the "New York health act".  
3     S 2. Legislative findings and intent. 1. The state constitution  
4     states: "The protection and promotion of the health of the inhabitants  
5     of the state are matters of public concern and provision therefor shall  
6     be made by the state and by such of its subdivisions and in such manner,  
7     and by such means as the legislature shall from time to time determine."  
8     (Article XVII, S3.) The legislature finds and declares that all resi-  
9     dents of the state have the right to health care. While the federal  
10    Affordable Care Act brought many improvements in health care and health  
11    coverage, it still leaves many New Yorkers without coverage or with  
12    inadequate coverage. New Yorkers - as individuals, employers, and  
13    taxpayers - have experienced a rise in the cost of health care and  
14    coverage in recent years, including rising premiums, deductibles and  
15    co-pays, restricted provider networks and high out-of-network charges.  
16    Businesses have also experienced increases in the costs of health care  
17    benefits for their employees, and many employers are shifting a larger  
18    share of the cost of coverage to their employees or dropping coverage  
19    entirely. Health care providers are also affected by inadequate health  
20    coverage in New York state. A large portion of voluntary and public  
21    hospitals, health centers and other providers now experience substantial

1 losses due to the provision of care that is uncompensated. Individuals  
2 often find that they are deprived of affordable care and choice because  
3 of decisions by health plans guided by the plan's economic needs rather  
4 than their health care needs. To address the fiscal crisis facing the  
5 health care system and the state and to assure New Yorkers can exercise  
6 their right to health care, affordable and comprehensive health coverage  
7 must be provided. Pursuant to the state constitution's charge to the  
8 legislature to provide for the health of New Yorkers, this legislation  
9 is an enactment of state concern for the purpose of establishing a  
10 comprehensive universal single-payer health care coverage program and a  
11 health care cost control system for the benefit of all residents of the  
12 state of New York.

13 2. It is the intent of the Legislature to create the New York Health  
14 program to provide a universal health plan for every New Yorker, funded  
15 by broad-based revenue based on ability to pay. The state shall work to  
16 obtain waivers and other approvals relating to Medicaid, Child Health  
17 Plus, Medicare, the Affordable Care Act, and any other appropriate  
18 federal programs, under which federal funds and other subsidies that  
19 would otherwise be paid to New York State, New Yorkers, and health care  
20 providers for health coverage that will be equaled or exceeded by New  
21 York Health will be paid by the federal government to New York State and  
22 deposited in the New York Health trust fund, and for other program  
23 modifications (including elimination of cost sharing and insurance  
24 premiums). Under such waivers and approvals, health coverage under  
25 those programs will be replaced and merged into New York Health, which  
26 will operate as a true single-payer program.

27 If any necessary waiver or approval is not obtained, the state shall  
28 use state plan amendments and seek waivers and approvals to maximize,  
29 and make as seamless as possible, the use of federally-matched health  
30 programs and federal health programs in New York Health. Thus, even  
31 where other programs such as Medicaid or Medicare may contribute to  
32 paying for care, it is the goal of this legislation that the coverage  
33 will be delivered by New York Health and, as much as possible, the  
34 multiple sources of funding will be pooled with other New York Health  
35 funds and not be apparent to New York Health members or participating  
36 providers. This program will promote movement away from fee-for-service  
37 payment, which tends to reward quantity and requires excessive adminis-  
38 trative expense, and towards alternate payment methodologies, such as  
39 global or capitated payments to providers or health care organizations,  
40 that promote quality, efficiency, investment in primary and preventive  
41 care, and innovation and integration in the organizing of health care.

42 3. This act does not create any employment benefit, nor does it  
43 require, prohibit, or limit the providing of any employment benefit.

44 4. In order to promote improved quality of, and access to, health care  
45 services and promote improved clinical outcomes, it is the policy of the  
46 state to encourage cooperative, collaborative and integrative arrange-  
47 ments among health care providers who might otherwise be competitors,  
48 under the active supervision of the commissioner of health. It is the  
49 intent of the state to supplant competition with such arrangements and  
50 regulation only to the extent necessary to accomplish the purposes of  
51 this act, and to provide state action immunity under the state and  
52 federal antitrust laws to health care providers, particularly with  
53 respect to their relations with the single-payer New York Health plan  
54 created by this act.

1 S 3. Article 50 and sections 5000, 5001, 5002 and 5003 of the public  
2 health law are renumbered article 80 and sections 8000, 8001, 8002 and

20 TO THE PUBLIC HEALTH OR SAFETY. SUCH PROCEDURES AND STANDARDS SHALL NOT

The revenue proposal shall be submitted to the legislature as part of the executive budget under article VII of the state constitution, for the fiscal year commencing on the first day of April in the calendar year after this act shall become a law. In

1 developing the revenue proposal, the governor shall consult with appro-  
2 priate officials of the executive branch; the temporary president of the  
3 senate; the speaker of the assembly; the chairs of the fiscal and health  
4 committees of the senate and assembly; and representatives of business,  
5 labor, consumers and local government.

6 2. (a) Basic structure. The basic structure of the revenue proposal  
7 shall be as follows: Revenue for the program shall come from two premi-  
8 ums (referred to collectively in this section as the "premiums"). First,  
9 there shall be a progressively graduated premium on all payroll and  
10 self-employed income (referred to in this section as the "payroll premi-  
11 um"), paid by employers, employees and self-employed, similar to the  
12 Medicare tax. Higher brackets of income subject to this premium shall be  
13 assessed at a higher marginal rate than lower brackets. Second, there  
14 shall be a progressively graduated premium on taxable income (such as  
15 interest, dividends, and capital gains) not subject to the payroll  
16 premium (referred to in this section as the "non-payroll premium"). The  
17 premiums will be set at levels anticipated to produce sufficient revenue  
18 to finance the program and other provisions of article 51 of the public  
19 health law, to be scaled up as enrollment grows, taking into consider-  
20 ation anticipated federal revenue available for the program. Provision  
21 shall be made for state residents (who are eligible for the program) who  
22 are employed out-of-state, and non-residents (who are not eligible for  
23 the program) who are employed in the state.

24 (b) Payroll premium. The income to be subject to the payroll premium  
25 shall be all income subject to the Medicare tax. The premium shall be  
26 set at a percentage of that income, which shall be progressively gradu-  
27 ated, so the percentage is higher on higher brackets of income. For  
28 employed individuals, the employer shall pay eighty percent of the  
29 premium and the employee shall pay twenty percent of the premium, except  
30 that an employer may agree to pay all or part of the employee's share.  
31 A self-employed individual shall pay the full premium.

32 (c) Non-payroll income premium. There shall be a premium on upper-  
33 bracket taxable personal income that is not subject to the payroll  
34 premium. It shall be set at a percentage of that income, which shall be  
35 progressively graduated, so the percentage is higher on higher brackets  
36 of income.

37 (d) Phased-in rates. Early in the program, when enrollment is growing,  
38 the amount of the premiums shall be at an appropriate level, and shall  
39 be raised as anticipated enrollment grows, to cover the actual cost of  
40 the program and other provisions of article 51 of the public health law.  
41 The revenue proposal shall include a mechanism for determining the rates  
42 of the premiums.

43 (e) Cross-border employees. (i) State residents employed out-of-state.  
44 If an individual is employed out-of-state by an employer that is subject  
45 to New York state law, the employer and employee shall be required to  
46 pay the payroll premium as to that employee as if the employment were in  
47 the state. If an individual is employed out-of-state by an employer that  
48 is not subject to New York state law, either (A) the employer and  
49 employee shall voluntarily comply with the premium or (B) the employee  
50 shall pay the premium as if he or she were self-employed.

51 (ii) Out-of-state residents employed in the state. (A) The payroll  
52 premium shall apply to any out-of-state resident who is employed or  
53 self-employed in the state. (B) In the case of an out-of-state resident  
54 who is employed or self-employed in the state, such individual and indi-  
55 vidual's employer shall be able to take a credit against the payroll  
56 premiums they would otherwise pay, as to the individual for amounts they

1 spend on health benefits for the individual that would otherwise be  
2 covered by the program if the individual were a member of the program.  
3 For employers, the credit shall be available regardless of the form of  
4 the health benefit (e.g., health insurance, a self-insured plan, direct  
5 services, or reimbursement for services), to make sure that the revenue  
6 proposal does not relate to employment benefits in violation of the  
7 federal ERISA. For non-employment-based spending by individuals, the  
8 credit shall be available for and limited to spending for health cover-  
9 age (not out-of-pocket health spending). The credit shall be available  
10 without regard to how little is spent or how sparse the benefit. The  
11 credit may only be taken against the payroll premiums. Any excess amount  
12 may not be applied to other tax liability. For employment-based health  
13 benefits, the credit shall be distributed between the employer and  
14 employee in the same proportion as the spending by each for the benefit.  
15 The employer and employee may each apply their respective portion of the  
16 credit to their respective portion of the premium. If any provision of  
17 this clause or any application of it shall be ruled to violate federal  
18 ERISA, the provision or the application of it shall be null and void and  
19 the ruling shall not affect any other provision or application of this  
20 section or the act that enacted it.

21 3. The revenue proposal shall include a plan and legislative  
22 provisions for ending the requirement for local social services  
23 districts to pay part of the cost of Medicaid and replacing those  
24 payments with revenue from the premiums under the revenue proposal.

25 4. To the extent that the revenue proposal differs from the terms of  
26 subdivision two of this section, the revenue proposal shall state how it  
27 differs from those terms and reasons for and the effects of the differ-  
28 ences.

29 5. All revenue from the premiums shall be deposited in the New York  
30 Health trust fund account under section 89-i of the state finance law.

31 S 5. Article 49 of the public health law is amended by adding a new
