2015-2016 Regular Sessions

I N S E N A T E

February 13, 2015

Introduced by Sens. HOYLMAN, AVELLA -- read twice and ordered printed, and when printed to be committed to the Committee on Finance -- recommended to the Committee on Finance in accordance with Senate Rule 6, sec. 8 -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee

AN ACT to amend the state finance law, the economic development law and the environmental conservation law, in relation to the state procurement process and to healthy and green procurement

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. This act shall be known and may be cited as the "New York
2 state healthy and green procurement act".
3 S 2. Legislative findings and declaration. The legislature hereby
4 finds and declares that:
5 (a) As New York moves into the twenty-first century the state should
6 serve as a role model for practices that will create and maintain a
7 healthy environment and vibrant economy. The manufacture, use and
8 disposal of commodities and technologies, the construction of buildings
9 and the provision of services utilizing toxic chemicals may have adverse
10 impacts on public health and the environment. Persistent, bioaccumula-
11 tive toxic chemicals, such as mercury, lead, dioxin and poly brominated
12 diphenyl ethers, are toxic in small amounts, remain in the environment
13 for long periods of time, and build to dangerous levels in humans, fish
14 and other animals; and this group of pollutants known as persistent
15 bioaccumulative toxic chemicals (PBT) pose risks to public health and
16 the environment through their ability to cause cancer, birth defects and
17 endocrine disruption. Such chemicals have polluted hundreds of water
18 bodies, fish and waterfowl in the state. These adverse impacts impose
19 costs on the state and, ultimately, society as a whole in the form of
20 injury, disease and death; health care expenses; disposal, liability and
21 cleanup costs; the waste of resources and raw materials; and an impaired

1 natural environment. PBT and cancer-causing chemicals may be found in a
2 wide range of consumer products purchased by state agencies, including
3 lighting supplies, computers and other office equipment, vehicles,
4 medical equipment, building supplies and printing inks. Encouraging
5 innovation, and creating and choosing the safest, most sustainable
6 commodities, services and technologies will help to ensure a higher
7 quality of life for present and future generations. It will put New York
8 businesses in an advantageous position to compete in the global market-
9 place.

10 (b) New York looks forward to the time when the state's power is
11 generated from renewable and clean sources, when our homes, schools,
12 businesses and government facilities are energy efficient and
13 constructed, refurbished and maintained using healthy and green products
14 and practices, when pollution prevention is embraced by government and
15 businesses as a way to save money and protect public health and the
16 environment, when government and citizens use energy efficient and clean
17 vehicles, when pests are controlled with nontoxic or least toxic alter-
18 natives, when our production of waste is significantly reduced and the
19 rest is recycled, and when our homes, schools, workplaces, food, air and
20 water are free from toxic contaminants.

21 (c) Protecting public health and the environment is consistent with
22 the traditional considerations associated with state procurement prac-
23 tice, including lowest price, best value, quality, cost and efficiency.
24 Determining quality, value and efficiency should include the consider-
25 ation of public health and environmental impacts. Considering such
26 impacts early in the procurement process and adopting an ethic of
27 pollution prevention will not only reduce pollution and waste, it will
28 reduce costs throughout a commodity, service or technology's life cycle.

29 (d) Through the volume of government procurement, government can play
30 a significant role in spurring private sector development of high value
31 commodities and services. This, in turn, will create business and
32 employment opportunities in New York state, foster competition and
33 harness the energy of the market to produce products and services that
34 perform better and cost less. As supply increases, prices will decrease,
35 and high performance, healthy and green commodities, services and tech-
36 nologies will become more affordable for all consumers.

37 S 3. Subdivision 5 of section 160 of the state finance law, as added
38 by chapter 83 of the laws of 1995, is amended to read as follows:

39 5. "Costs" as used in this article shall be quantifiable and may
40 include, without limitation, the price of the given good or service
41 being purchased; the administrative, training, storage, maintenance or
42 other overhead associated with a given good or service; the value of
43 warranties, delivery schedules, financing costs and foregone opportunity
44 costs associated with a given good or service; and the life span and
45 associated life cycle costs of the given good or service being
46 purchased. Life cycle costs may include, but shall not be limited to,
47 costs or savings associated with RAW MATERIALS, PRODUCTION, MANUFACTUR-
48 ING, construction, PACKAGING, DISTRIBUTION, USE, energy use, mainte-
