11 subdivisions, public utilities and health care facilities must improve
12 their preparations for, responses to and recovery from future disasters.
13 This act requires enhanced planning, preparation and mitigation efforts
14 for possible future natural disasters. Natural disaster planning, on
15 both the state and local levels, by state and local governments, utili-
16 ties and health care facilities should be comprehensive and include
17 emergency service organizations which are involved in mitigation of
