FISCAL NOTE.--Pursuant to Legislative law, Section 50:

PROVISIONS OF PROPOSED LEGISLATION: This proposed legislation would amend Retirement and Social Security Law (RSSL) Sections 506, 507, 510 and 511 to change the calculation of Ordinary Disability Retirement (ODR) benefits and Accidental Disability Retirement (ADR) benefits for:

- * Tier III and Revised Tier III members of the New York City Police Pension Fund (POLICE),

- * Tier III and Revised Tier III members of the New York Fire Department Pension Fund (FIRE),

- * Tier VI Sanitation members of the New York City Employees' Retirement System (NYCERS), and

- * Tier VI Corrections members of NYCERS

Note: For purposes of this Fiscal Note, these members are collectively referred to as the "Uniformed Covered Groups".

For purposes of this Fiscal Note, all POLICE and FIRE members subject to Article 14 of the RSSL will be referred to as "Tier III POLICE Members" and "Tier III FIRE Members." Of those Tier III POLICE (FIRE) Members who have a date of membership prior to April 1, 2012, they will be referred to as "Original Tier III POLICE (FIRE) Members." Of those Tier III POLICE (FIRE) Members who have a date of membership on or after April 1, 2012, they will be referred to as "Revised Tier III POLICE (FIRE) Members."

The Effective Date of the proposed legislation would be the date of enactment.

IMPACT ON ODR BENEFITS PAYABLE: The current ODR benefits for the Uniformed Covered Groups are equal to the greater of:

- * 33 1/3% of Final Average Salary (FAS), or

- * 2.0% of FAS multiplied by years of credited service (not in excess of 22 years),

- * Reduced by 50% of the Primary Social Security Disability benefits (determined under RSSL Section 511), and

- * Reduced by 100% of Workers' Compensation benefits (if any).

Note: Final Average Salary is a Three-Year average (FAS3) for Original Tier III POLICE and FIRE members and a Five-Year average (FAS5) for all other Uniformed Covered Group members.

It is the understanding of the Office of the Actuary that POLICE, FIRE and Sanitation Members are not covered by Workers' Compensation.

Under the proposed legislation, if enacted, the ODR benefit for the Uniformed Covered Groups would be equal to the greater of:

- * 33 1/3% of the greater of FAS or Sixth-year Salary, or

- * 2.0 of the greater of FAS or Sixth-year Salary multiplied by years of credited service not in excess of 22 years, and

- * Reduced by 100% of Workers' Compensation benefits (if any).

Sixth-year Salary is defined as the sum of (1) the standard rate that would be payable to a disabled Uniformed Covered Group member upon six years of employment, excluding any longevity adjustments and (2) the average overtime compensation paid to the disabled member. If the disabled member has less than six years of service, the average overtime compensation would be calculated by adding (1) the overtime compensation earned by the member in the years prior to the year of disability, (2) the annualized overtime compensation earned by the member in the year of disability and (3) the annualized rate of overtime compensation earned by the member in the year of disability projected for years (up to six)

following the year of disability, so that there are six years in total, and then dividing that amount by six.

In addition, the proposed legislation would NOT apply the Escalation available under RSSL Section 510 to ODR benefits for Uniformed Covered Group members. However, such ODR benefits would still be eligible for Cost-of-Living Adjustments (COLA) under Chapter 125 of the Laws of 2000.

Finally, the proposed legislation would provide that in no event would the benefit payable in any year in the future to a member retired under ODR be less than the benefit the member would be entitled to in that year, under the provisions in effect prior to the enactment of this proposed legislation.

If enacted, a Uniformed Covered Group member who joined his/her respective retirement system before the Effective Date of the proposed legislation would have the option, at the time of disability retirement, to elect to receive the ODR benefits in effect prior to this proposed legislation.

IMPACT ON ADR BENEFITS PAYABLE: The current ADR benefits for the Uniformed Covered Groups are equal to:

- * 50% of FAS

- * Reduced by 50% of the Primary Social Security Disability benefits or Primary Social Security benefits, whichever begins first, (determined under RSSL Section 511), and

- * Reduced by 100% of Workers' Compensation benefits (if any).

Note: Final Average Salary is a Three-Year average (FAS3) for Original Tier III POLICE and FIRE members and a Five-Year average (FAS5) for all other Uniformed Covered Group members.

Under the proposed legislation, if enacted, the ADR benefit for the Uniformed Covered Groups would depend on whether the member is entitled to Social Security Disability benefits (or would be entitled had the member met the quarters of coverage requirement).

If the member is not entitled to Social Security Disability benefits, the ADR benefit would be equal to:

- * 50% of the greater of FAS or Sixth-year Salary

- * Reduced by 100% of Workers' Compensation benefits (if any).

If the member is entitled to Social Security benefits (or would be entitled had the member met the quarters of coverage requirement), the ADR benefit would be equal to:

- * 75% of the greater of FAS or Sixth-Year Salary

- * Reduced by 100% of Workers' Compensation benefits (if any).

In addition, the proposed legislation would not apply the Escalation available under RSSL Section 510 to ADR benefits for Uniformed Covered Group members. However, such ADR benefits would still be eligible for Cost-of-Living Adjustments (COLA) under Chapter 125 of the Laws of 2000.

Finally, the proposed legislation would provide that in no event would the benefit payable in any year in the future to a member retired under ADR be less than the benefit the member would have been entitled to in that year, under the provisions in effect prior to the enactment of this proposed legislation.

If enacted, a Uniformed Covered Group member who joined his/her respective retirement system before the Effective Date of the proposed legislation would have the option, at the time of disability retirement, to elect to receive the ADR benefits in effect prior to this proposed legislation.

FINANCIAL IMPACT - CHANGES IN BENEFITS - ACTUARIAL PRESENT VALUES: Based on the census data and the actuarial assumptions and methods noted herein, if the Effective Date is on or before June 30, 2015, then this

would change the Actuarial Present Value (APV) of benefits (APVB), APV of member contributions, the Unfunded Actuarial Accrued Liability (UAAL) and APV of future employer contributions as of June 30, 2013 for the Uniformed Covered Groups.

FINANCIAL IMPACT - CHANGES IN PROJECTED APV OF FUTURE EMPLOYER CONTRIBUTIONS AND PROJECTED EMPLOYER CONTRIBUTIONS: For purposes of this Fiscal Note, it is assumed that the changes in APVB, APV of member contributions, UAAL and APV of future employer contributions would be reflected for the first time in the June 30, 2013 actuarial valuations of POLICE, FIRE and NYCERS.

Under the One-Year Lag Methodology (OYLM), the first year that changes in benefits for the Uniformed Covered Groups could impact employer contributions to POLICE, FIRE and NYCERS would be Fiscal Year 2015.

In accordance with ACNY Section 13.638.2(k-2), new UAAL attributable to benefit changes are to be amortized as determined by the Actuary but generally over the remaining working lifetime of those impacted by the benefit changes.

As of June 30, 2013, the remaining working lifetime is approximately 18 years for the Tier III POLICE Members, 24 years for the Tier III FIRE members, 21 years for Tier VI Sanitation members and 20 years for Tier VI Corrections members. Recognizing that this period will decrease over time as these groups of members matures and that virtually all of the FIRE, Sanitation and Corrections members that would be impacted by the benefit changes are new entrants, the Actuary would likely choose to amortize the new UAAL attributable to this proposed legislation over a 15-year period (14 payments under the OYLM Methodology).

The following Table 1 presents an estimate of the increases due to the changes in ODR and ADR provisions for the Uniformed Covered Groups in the APV of future employer contributions and in employer contributions to POLICE, FIRE and NYCERS for Fiscal Years 2015 through 2019 that would occur based on the applicable actuarial assumptions and methods noted herein:

The actual cost will depend on the number of members who retire under ADR that qualify for Social Security Disability benefits at the time of disability retirement. The actual costs will be greater/less to the extent that the percentage is greater/less than 25%.

*POLICE	\$215.3	\$22.9
*FIRE	35.7	3.6
*Sanitation	9.7	1.0
*Corrections	17.9	1.8
*Total	\$278.6	\$29.3

* Note that the assumption used is 25% of ADR retirees qualify for Social Security Disability Benefits.

The estimated increases in employer contributions and employer costs shown in Table 1 and Table 2 are based upon the following projection assumptions:

* Level workforce (i.e., new employees are hired to replace those who leave active status).

* Projected salary increases consistent with those used in projections presented to the New York City Office of Management and Budget (NYCOMB) for use in the January 2015 Financial Plan (Updated Preliminary Projections).

* New entrant salaries consistent with those used in the Updated Preliminary Projections.

These "open group" projections include future new entrants introduced into the census data models to project the future workforces.

OTHER COSTS: Not measured in this Fiscal Note are the following:

* The initial, additional administrative costs of POLICE, FIRE, NYCERS and other New York City agencies to implement the proposed legislation.

* The impact of this proposed legislation on Other Postemployment Benefit (OPEB) costs.

CENSUS DATA: The starting census data used for the calculations presented herein are the census data used in the Updated Preliminary June 30, 2013 (Lag) actuarial valuation of POLICE, FIRE and NYCERS used under the OYLM to determine the Updated Preliminary Fiscal Year 2015 employer contributions.

The census data used for the estimates of additional employer contributions presented herein are based on average salaries of new entrants utilized in the Updated Preliminary June 30, 2013 (Lag) actuarial valuations used to determine Updated Preliminary Fiscal Year 2015 employer contributions of POLICE, FIRE and NYCERS.

The 3,601 Original Tier III POLICE Members as of June 30, 2013 had an average age of approximately 28, average service of approximately 2.2 years and an average salary of approximately \$63,000.

The 1,916 Revised Tier III POLICE Members as of June 30, 2013 had an average age of approximately 27, average service of approximately 0.6 years and an average salary of approximately \$55,000.

Overall, the 5,517 Tier III POLICE Members as of June 30, 2013 had an average age of approximately 28, average service of approximately 1.7 years, and an average salary of approximately \$60,000.

The 169 Tier III FIRE Members as of June 30, 2013 (including the one Tier III member who has a date of membership prior to April 1, 2012) had an average age of approximately 27, average service of approximately 0.5 years and an average salary of approximately \$48,200.

The 382 Tier VI Sanitation Members as of June 30, 2013 had an average age of approximately 35, average service of approximately 1.0 years and an average salary of approximately \$47,500.

The 877 Tier VI Corrections Members as of June 30, 2013 had an average age of approximately 32, average service of approximately 0.5 years and an average salary of approximately \$46,000.

ACTUARIAL ASSUMPTIONS AND METHODS: The additional employer contributions presented herein have been calculated based on the actuarial assumptions and methods in effect for the June 30, 2013 (Lag) actuarial valuations used to determine Updated Preliminary Fiscal Year 2015 employer contributions of POLICE, FIRE and NYCERS including the General Wage Increase assumption of 3.0% per year which was used to project the Sixth-year Salary for future years.

It was further assumed that all individuals who become members of his/her respective retirement system before the Effective Date of the proposed legislation would elect to be covered by the new ADR and ODR benefit provisions provided for in this proposed legislation.

Neither this Fiscal Note nor the actuarial valuation methodology used to determine employer contributions to POLICE, FIRE and NYCERS reflect a calculation of the value of an offset for Workers' Compensation benefits. For POLICE, FIRE and Sanitation this is because it is the understanding of the Office of the Actuary that POLICE, FIRE and Sanitation members are not covered by such benefits.

It is the understanding of the Office of the Actuary that Corrections members are covered by Workers' Compensation benefits. However, since both ADR and ODR benefits under both the current provisions and proposed legislation are offset by Workers' Compensation benefits, any Workers' Compensation benefits paid would not impact the costs shown.

Employer contributions under current methodology have been estimated assuming the additional APVB would be financed through future normal contributions including an amortization of the new UAAL attributable to this proposed legislation over a 15-year period (14 payments under the OYLM Methodology).

New entrants were projected to replace the members expected to leave the active population to maintain a steady-state population.

For purposes of estimating the impact of the Tier III Escalation for retired Members, consistent with an underlying Consumer Price Inflation (CPI) assumption of 2.5% per year, Tier III Escalation of 2.5% per year has been assumed.

This compares with the current Chapter 125 of the Laws of 2000 auto COLA assumption of 1.5% per year (i.e., 50% of CPI adjusted to recognize 1.0% minimum and 3.0% maximum) on the first \$18,000 of benefit.

ECONOMIC VALUES OF BENEFITS: The actuarial assumptions used to determine the financial impacts of the proposed legislation discussed in this Fiscal Note are those appropriate for budgetary models and determining annual employer contributions to POLICE, FIRE and NYCERS.

However, the economic assumptions (current and proposed) that are used for determining employer contributions do not develop risk-adjusted, economic values of benefits. Such risk-adjusted, economic values of benefits would likely differ significantly from those developed by the budgetary models.
