6 its purview.

FISCAL NOTE.-- Pursuant to Legislative Law, Section 50:

This bill would amend chapter 93 of the Laws of 2005 and chapter 445 of the Laws of 2006, which provided members of public retirement systems who contract any form of disease or disability related to exposure to any elements in connection with the World Trade Center tragedy of September 11, 2001 to be presumptive evidence that such disability, or death as a result of such disability was the result of an accident and was sustained in the performance of duty.

Insofar as this bill would affect the New York State and Local Employees' Retirement and the New York State and Local Police and Fire Retirement System, this bill would extend the deadline for filing notice regarding the eligibility for benefits for certain members who participated in the World Trade Center rescue, recovery or cleanup operation to September 11, 2017.

If this bill is enacted, it would lead to more disabilities being classified as "in performance of duty" or "accidental". For the disabilities so classified due to this bill, the cost would depend on the age, service, salary and plan of the affected member or retiree, as well as whether such person would have otherwise been eligible for, or has been receiving an ordinary disability, a performance of duty disability or a service retirement. For those who contract such disease prior to retirement, it is estimated that there could be per person one-time costs of as much as four (4) times salary. For those who contract such disease subsequent to a service retirement, it is estimated that there would be an average per person cost of approximately 150% of final average salary. For those who contract such disease subsequent to an ordinary disability retirement, it is estimated that there would be an average per person cost of approximately four (4) times final average salary.

This bill would also lead to more deaths being classified as "accidental". For each death classified as accidental due to this bill, the cost would depend on the age, service, salary and plan of the affected individual, as well as whether such person was an active member or has been receiving an ordinary disability, a performance of duty disability, an accidental disability or a service retirement. It is estimated that the cost for each ERS and PFRS individual affected would average approximately three (3) times final average salary and seven (7) times final average salary, respectively.

ERS Costs: Pursuant to Section 25 of the Retirement and Social Security Law, the increased cost to the New York State and Local Employees' Retirement System would be borne entirely by the State of New York and would require an itemized appropriation sufficient to pay the cost of the provision. A precise cost can't be determined at this time. Every year a cost will be determined (and billed to the state) based on those benefiting from this provision.

PFRS Costs: These costs would be shared by the State of New York and the participating employers in the PFRS.
