Introduced by M. of A. NOLAN -- (at request of the State Education Department) -- read once and referred to the Committee on Education

AN ACT to amend the education law, in relation to continuing the early college high school program and the pathways in technology early college high school program in this state; and making an appropriation therefor

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative intent. The legislature hereby finds and
2 declares it necessary to preserve and continue the New York state early
3 college high school program and the New York state pathways in technolo-
4 gy early college high school program (P-TECH program) in this state
5 which provide various students, including those traditionally underrep-
6 resented in post-secondary education, with the opportunity to access
7 college-level courses and college degree credits at the high school
8 level with the combined support of high school and college staff and
9 resources, and for P-TECH programs, career training and employment in a
10 highly skilled job upon completion of the program.

11 The early college high school program not only increases students'
12 access to higher education, but also reduces potential costs for
13 students in completing college degrees by allowing them to either
14 complete a degree upon graduation from high school or to apply their
15 earned college credits towards an associate's or baccalaureate's degree.
16 This innovative program provides incentives to high school students to
17 proceed to college and to earn a college degree by accelerating their
18 overall completion of a degree. It also better prepares them for
19 college-level coursework, which, will in turn, increase their academic
20 performance. Ultimately, this program increases graduation rates both at
21 the high school and college levels, especially for academically at-risk
22 students.

23 The P-TECH program, through a public-private partnership, prepares
24 thousands of New York students for high-skill jobs of the future in
25 technology, manufacturing, healthcare and finance. The P-TECH program
26 provides students with a rigorous, relevant and cost-free high school

1 and college education and a workplace learning environment with ongoing
2 mentoring by professionals in the chosen career sector to better prepare
3 these students for successful careers. Students also receive a commit-
4 ment from the participating employer to be first in line for consider-
5 ation for a job following completion of the program. Ultimately, this
6 program increases graduation rates both at the high school and college
7 levels and provides essential career training for academically at-risk,
8 disadvantaged students, which at the completion of the program leads
9 these students to a skilled job.

10 The legislature hereby finds and declares it necessary to provide
11 funding for these programs to ensure that they continue in operation and
12 continue to provide students with these valuable services.

13 The legislature also finds and declares it necessary to provide addi-
14 tional funding for the state education department to administer and
15 evaluate these critical programs. These funds will support program staff
16 to supplement the oversight already being provided to these programs,
17 and ensure the timely and accurate analysis of data to further enhance
18 and validate these programs.
