Introduced by M. of A. SIMOTAS, ROSENTHAL, OTIS, LAVINE -- read once and referred to the Committee on Education

AN ACT to amend the education law, in relation to enacting the "K12 student privacy and cloud computing act" to prohibit service providers who offer cloud computing services to primary and secondary educational institutions from processing student data for commercial purposes

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Short title. This act shall be known and may be cited as
2 the "K12 student privacy and cloud computing act".
3 S 2. Legislative findings. The legislature hereby finds and declares:
4 1. Cloud computing services enable convenient, on-demand network
5 access to a shared pool of configurable computing resources (including
6 networks, servers, storage, applications, and services) that can be
7 rapidly provisioned and released with minimal management effort or
8 service provider interaction;
9 2. Cloud computing services offer tremendous potential to educational
10 institutions in terms of helping consolidate technical infrastructure,
11 reducing energy and capital costs, increasing collaboration through
12 "anytime-anywhere" access to applications and information, and realizing
13 efficiencies, network resilience, and flexible deployment; and
14 3. Cloud computing service providers hold the potential to invade the
15 privacy of students by tracking students' online activities for commercial
16 purposes, such as delivering behaviorally targeted advertising or
17 otherwise improving advertising services that the service provider may
18 offer in connection with or separate from the services it offers to the
19 educational institution.
20 In light of the foregoing, the legislature deems it necessary to
21 ensure that when an educational institution engages a cloud computing
22 service provider to process student data, that the service provider uses
23 student data only for the benefit of the educational institution and
24 does not use such data for the service provider's own commercial
25 purposes.

EXPLANATION--Matter in *ITALICS* (underscored) is new; matter in brackets [] is old law to be omitted.
