AN ACT to amend the executive law, in relation to ensuring equal access  
to health and human services for limited English speaking individuals

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEM-  
BLY, DO ENACT AS FOLLOWS:

1     Section 1. Declaration of legislative findings and intent. Title VI of  
2     the civil rights act of 1964 provides in pertinent part that "no person  
3     in the United States shall on the ground of race, color or national  
4     origin, be excluded from participation in, be denied the benefits of, or  
5     be subjected to discrimination under any program or activity receiving  
6     federal assistance." The United States department of justice and the  
7     department of health and human services have stated that failure to  
8     provide language assistance to limited English speaking individuals  
9     seeking assistance in federally funded, state supervised or administered  
10    programs amounts to a violation of Title VI by discriminating against  
11    such individuals based upon their national origin.  
12    It is and has been the policy of the state of New York to oppose all  
13    forms of discrimination, particularly when it relates to the provision  
14    of state services, or locally provided services under state supervision.  
15    However, the department of health and human services office of civil  
16    rights, the office responsible for enforcing Title VI in department of  
17    health and human services programs, found that the New York state office  
18    of temporary and disability assistance, the New York state department of  
19    health, the New York City human resources administration, and the  
20    departments of social services in Nassau and Suffolk counties were in  
21    violation of Title VI based upon the state and counties' failure to  
22    provide interpretation services for limited English proficient individ-  
23    uals. Specifically, the office of civil rights found that limited

English proficient clients seeking and/or applying for subsistence benefits such as food stamps and public assistance for children and Medicaid benefits were routinely unable to access such benefits due to their inability to speak English.

A legislative hearing on immigrant child welfare issues also found that the lack of interpreters in child welfare cases resulted in children in families who were limited English proficient being unnecessarily removed from their parents. In addition, limited English proficient residents of New York have been unable to access unemployment and other services from the department of labor due to the lack of translated materials and interpreters. The New York language barrier elimination act serves a twofold purpose: first, the act will ensure that the state is in compliance with federal law in ensuring access to benefits and opportunities to participate in any program or activity receiving federal assistance; second, and more importantly, the act will ensure that all those in need of health and human services receive them, and that no one attempting to access such services will be discriminated against based upon the language they speak.
