FISCAL NOTE.-- Pursuant to Legislative Law, Section 50:

PROVISIONS OF PROPOSED LEGISLATION - OVERVIEW: This proposed legis-
lation would amend Administrative Code of the City of New York ("ACNY")
Sections 13-191{1}, 13-191{2}, 13-192{1}, and 13-192{2} to extend the
payment of Variable Supplements Fund ("VSF") benefits to certain reti-
rees.

The proposed legislation would extend the payment of the VSF benefits
to certain former members who are retired for service from the New York
City Employees' Retirement System ("NYCERS"). Such retired NYCERS
members consist of those who retired for service with 20 or more years
of service as New York City Housing Police ("HP") or New York City Tran-
sit Police ("TP") between October 1, 1968 and June 30, 1987 ("Prior
Retirees").

Specifically, this proposed legislation would provide for payments to
Prior Retirees from the following VSFs (referred to hereafter as the
"IMPACTED VSFs"):

- * Housing Police Officers' Variable Supplements Fund ("HPOVSF"),
- * Housing Police Superior Officers' Variable Supplements Fund ("HPSOVSF"),
- * Transit Police Officers' Variable Supplements Fund ("TPOVSF"), and
- * Transit Police Superior Officers' Variable Supplements Fund ("TPSOVSF").

The Effective Date of the proposed legislation would be the date of
enactment.

IMPACT ON BENEFITS - VSF PAYMENTS: Each of the IMPACTED VSFs currently
provides supplemental benefits to former NYCERS members who retired for
service on or after July 1, 1987 as HP or TP with 20 or more years of
service.

The level of VSF benefits paid is based on a defined schedule varying
by Calendar Year. For Calendar Year 2015 and after the level of VSF
benefits is \$12,000.

These VSF benefits are payable on an annual basis on or about December
15th to eligible former NYCERS members for their lifetimes. There are no
optional forms of payment. Upon the death of the NYCERS retiree, VSF
payments cease.

If the proposed legislation were to be enacted, all Prior Retirees
would become immediately eligible for VSF benefits on the December 15th
subsequent to the Effective Date and for each year thereafter.

Note, the Actuary has assumed that benefits payable under this
proposed legislation are prospective only (i.e., there would be no
retroactive VSF payments due before the Effective Date for such Prior
Retirees).

FINANCIAL IMPACT - BACKGROUND: Obligations of each respective New York
City Retirement System ("NYCRS") for the liabilities that arise under
each VSF are recognized through the Liability Valuation Method ("LVM").
Under the LVM, whenever the Actuarial Present Value of Benefits ("APVB")
of a VSF exceeds the Actuarial Asset Value ("AAV") of that VSF, an Actu-
arial Present Value ("APV") of Future SKIM is established as a liability
in the related NYCRS.

The AAV of each VSF equals a smoothed value of Market Value ("MV") of
assets. The MV of assets equals the sum of the transfers of excess earn-

ings on equities ("SKIM") from the related NYCERS to that VSF, together with investment earnings on the VSF, offset by payments from that VSF.

FINANCIAL IMPACT - ACTUARIAL PRESENT VALUE OF BENEFITS: Based on the census data and the actuarial assumptions and methods noted herein, the enactment of the proposed legislation would increase the APVB of the IMPACTED VSFs by approximately \$63.3 million as of June 30, 2013 on a cost basis and by approximately \$50.3 million as of June 30, 2013 on a contribution basis.

FINANCIAL IMPACT-APV OF FUTURE SKIM: In general, an increase in the APVB of a VSF increases the APV of Future SKIM to be paid from the related NYCERS.

Thus, the APV of Future SKIM of NYCERS would increase by approximately \$63.3 million as of June 30, 2013 on a cost basis and \$50.3 million as of June 30, 2013 on a contribution basis due to increases in the APVB of the IMPACTED VSFs.

In accordance with Chapter 255 of the Laws of 2000 ("Chapter 255/00"), the increase in APV of Future SKIM would become an obligation of NYCERS.

Because the additional APV of Future SKIM would be attributable to retirees, that APV of Future SKIM would be established as an additional Unfunded Actuarial Accrued Liability ("UAAL").

Actual transfers of assets from NYCERS to the IMPACTED VSFs would occur as payments of the VSF benefits to Prior Retirees whenever such IMPACTED VSF assets are insufficient.

FINANCIAL IMPACT-ANNUAL EMPLOYER COST: Based on the census data, the actuarial assumptions and methods noted herein, and assuming the Actuary chooses to amortize the additional APV of Future SKIM over five years, the enactment of this proposed legislation would increase annual employer costs to NYCERS by approximately \$16.0 million per year for five years.

FINANCIAL IMPACT-ANNUAL EMPLOYER CONTRIBUTION: Based on the census data, the actuarial assumptions and methods noted herein, and assuming the Actuary chooses to amortize the additional APV of Future SKIM over five years, the enactment of this proposed legislation would increase annual employer contributions to NYCERS by approximately \$12.7 million per year for five years.

If enacted during the 2015 Legislative Session before June 30, 2015, increased contributions to NYCERS would begin no later than Fiscal Year 2015.

If enacted during the 2015 Legislative Session after June 30, 2015 but before June 30, 2016, increased employer contributions to NYCERS would begin no later than Fiscal Year 2016.

OTHER COSTS: The enactment of this proposed legislation would also be expected to result in increases (including certain one-time increases) in administrative expenses of NYCERS and certain New York City agencies.

CENSUS DATA: The census data used for estimates of APVB and employer contributions presented herein include 1,027 HP and 2,298 TP retirees and beneficiaries who were included in the June 30, 2013 actuarial valuation of NYCERS.

Of such 3,325 HP and TP retirees and beneficiaries, there are 419 HP and 604 TP retirees who currently receive VSF benefits.

Under this proposed legislation, an additional 216 HP and 535 TP Service Retirees between October 1, 1968 and June 30, 1987 would qualify as Prior Retirees and would become eligible to receive VSF benefits.

ACTUARIAL ASSUMPTIONS AND METHODS: Additional APVB on a contribution basis and employer contributions have been estimated as of June 30, 2013 based on the actuarial assumptions and methods adopted by the NYCERS

Board of Trustees during Fiscal Year 2012 and enacted as Chapter 3 of the Laws of 2013 ("2012 A&M") for determining employer contributions for fiscal years beginning on and after July 1, 2011 (i.e., Fiscal Year 2012 and after) including an Actuarial Interest Rate ("AIR") assumption of 7.0% per annum.

The AIR assumption of 7.0% per annum is used for determining the impact of the proposed legislation on a contribution basis because the assets supporting the IMPACTED VSFs are held by NYCERS whose Investment Policy has been assumed by the Actuary to be able to support an AIR assumption of 7.0% per annum.

Additional APVB on a cost basis and employer costs have been estimated as of June 30, 2013 based on the same actuarial assumptions as for contribution purposes with the exception of the AIR assumption, which was set equal to 4.0% per annum, consistent with the long-term expected rate of return for relatively short-term, fixed income investments.

In accordance with Section 13.638.2 (k-2) of the Administrative Code of the City of New York ("ACNY") as enacted by Chapter 3/13, as one component of the 2012 A&M, new UAAL attributable to benefit changes are to be amortized as determined by the Actuary but generally over the remaining working lifetimes of those impacted by these benefit changes.

For this proposed legislation, the average remaining working lifetime is zero years because all those that would be impacted are retired. However, given the history of the amortization period used for other legislation impacting primarily retired or soon-to-be-retired members, such as Retirement Incentive Programs, the Actuary is inclined to amortize the proposed legislation over five years with the payment period beginning one year after the establishment of the UAAL. This approach is consistent with the One-Year Lag Methodology ("OYLM") where the UAAL is considered to be amortized over six years with five years of payments beginning in the second year.

I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.
