AN ACT to amend the environmental conservation law, in relation to enacting the "monk parakeet protection act"

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1     Section 1. Legislative intent. The legislature finds that the monk  
2     parakeet has been existing in a wild, undomesticated state in New York  
3     since the late 1960s. The ancestors of the current flocks are believed  
4     to have been imported legally into the United States from their native  
5     land in Argentina. Since then, monk parakeets have established colonies  
6     in parts of New York city and lower Westchester county. Their colonies  
7     are small, and the population of monk parakeets seems to be rather  
8     stabilized over the past 20 years. It is estimated that there are less  
9     than 1,000 wild monk parakeets in the state of New York. Reports of  
10    poaching and less than humane regard for nesting sites have led to the  
11    need for formal protection of this species, which is recognized as non-  
12    native, but not currently categorized as invasive, according to the  
13    report Regulatory System for Non-native Species (New York Invasive  
14    Species Council, 2010). The purpose of this act is to protect the wild  
15    monk parakeet (a/k/a Quaker parakeet), the parrot species *Myiopsitta*  
16    *monachus*, living in a wild state in various parts of the state of New  
17    York. This act shall also provide humane methods of relocation or  
18    removal, especially where threat to human life, private or public prop-  
19    erty, or agricultural concerns, are imminent.

EXPLANATION--Matter in *ITALICS* (underscored) is new; matter in brackets  
[ ] is old law to be omitted.
