AN ACT to amend the general business law and the agriculture and markets law, in relation to the labeling of genetically modified foods

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative findings and intent. The legislature finds that
2 New York state consumers have the right to know whether the foods they
3 purchase have been produced with genetic engineering so they can make
4 informed purchasing decisions.
5 Further the legislature finds that:
6 (a) Currently, there is no federal law that requires food producers to
7 identify whether foods were produced with genetic engineering. At the
8 same time, the United States Food and Drug Administration (FDA) does not
9 require safety studies of such foods;
10 (b) Identification of foods produced with genetic engineering can
11 provide a critical method for tracking effects of consuming foods
12 produced with genetic engineering;
13 (c) More than sixty countries, including key United States trading
14 partners, have laws mandating disclosure of genetically engineered
15 foods. Identifying foods produced with genetic engineering will help
16 protect our state's export market;

EXPLANATION--Matter in *ITALICS* (underscored) is new; matter in brackets
[] is old law to be omitted.

LBD03147-07-6

(d) A variety of genetically engineered crops are commercially cultivated and sold in the United States, including corn, canola, sugar beets, soybean, cotton, alfalfa, and papaya. It has been estimated that 70-80% of packaged grocery products contain some materials derived from these genetically engineered crops;

(e) Without disclosure, consumers with certain dietary restrictions may unknowingly consume such food in violation of such dietary restrictions;

(f) Preserving the identity, quality, and reliability of agricultural products is of prime importance to our state's fiscal health;

(g) The cultivation of genetically engineered crops can cause serious environmental impacts;

(h) It is the intent of this act to ensure that New York consumers and farmers are fully and reliably informed about whether the food and seed they purchase and eat were produced with genetic engineering so they may choose for themselves whether to purchase and eat or use such food and seed;

(i) It is the intent of this act only to regulate the labeling of seed, seed stock, and food for human consumption offered for retail sale within New York State.

S 2. The general business law is amended by adding a new section 391-u to read as follows:
