

2015-2016 Regular Sessions

I N   S E N A T E

January 7, 2015

---

Introduced by Sens. AVELLA, ADDABBO, HOYLMAN, MONTGOMERY, SANDERS --  
read twice and ordered printed, and when printed to be committed to  
the Committee on Environmental Conservation

AN ACT to require a health impacts assessment for horizontal gas drilling  
and high-volume hydraulic fracturing; and imposing a moratorium on  
such activities pending adoption and implementation of the final  
health impacts assessment; and providing for the repeal of such  
provisions upon the expiration thereof

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY,  
DO ENACT AS FOLLOWS:

1     Section 1. Legislative findings. The legislature hereby finds that the  
2     people of the state of New York should be properly informed of any and  
3     all potential public health impacts posed by horizontal gas drilling and  
4     high-volume hydraulic fracturing and their related activities. Such  
5     analysis and information should serve as a tool for the people and their  
6     representatives to make informed decisions regarding actions to be taken  
7     with respect to horizontal gas drilling and high-volume hydraulic fracturing  
8     activities in the state.  
9     S 2. A School of Public Health within the State University of New York  
10    (hereinafter "the School of Public Health") shall conduct a comprehensive  
11    health impacts assessment, following a model recommended by the  
12    United States Centers For Disease Control and Prevention and the  
13    National Academy of Sciences, to examine potential public health impacts  
14    that could be caused by horizontal gas drilling and high-volume hydraulic  
15    fracturing and related activities conducted in connection with such  
16    drilling.  
17    S 3. Prior to the commencement of research, the School of Public  
18    Health shall prepare a scoping document that will establish the scope of  
19    assessments to be made by the health impacts assessment. The scoping  
20    document shall include the required analyses contained in this act as

EXPLANATION--Matter in *ITALICS* (underscored) is new; matter in brackets  
[ ] is old law to be omitted.

LBD00181-01-5

well as any other potential analyses to be conducted, and shall be subject to public review, comment and revision.

S 4. Such health impacts assessment shall include, at a minimum, the following analyses:

(a) Identification and assessment of potential localized and statewide health impacts from horizontal gas drilling and high-volume hydraulic fracturing, extraction and related activities in the state;

(b) Identification and assessment of potential health impacts determining the magnitude, nature, extent and likelihood of potential health impacts utilizing multiple methods and information derived from a combination of public health tools including risk assessment, literature, population analysis and expert opinions from multiple sources;

(c) Identification and assessment of potential health impacts as they relate to environmental justice concerns;

(d) Estimated costs of any health impacts from horizontal drilling and related activities to the state, local governments, health insurers, employers and the state's public and private health care systems as a whole;

(e) Recommendations for any mitigation of potential health impacts and the methods and evidence used to arrive at such recommendations, which may include potential recommendations against any or all drilling activities; and

(f) A long-term plan for monitoring, evaluation, follow-up and mitigation of potential health impacts throughout the period that horizontal drilling would take place in the state if such activity is to be recommended.

S 5. A draft of the health impacts assessment directed under section two of this act shall be released to the public for review and comment. The School of Public Health shall conduct a minimum of two public hearings regarding the findings of the draft health impacts assessment and allow at least one hundred eighty days for the public to submit comments to the School of Public Health. Upon the closing of the public comment period, the School of Public Health shall categorize, review and respond to all public comments. If substantive changes to the health impacts assessment are made as a result of public comments, the School of Public Health shall issue a supplemental draft. Such supplemental draft shall similarly be subject to public comment and review, in compliance with the parameters set out for the initial draft.

S 6. Upon completion of response to public comments on the final draft, the School of Public Health shall submit the final health impacts assessment to the department of health. The department of health shall adopt the final health impacts assessment, which shall be available to the public and a copy delivered to each house of the legislature and the governor.

S 7. No horizontal gas drilling or high-volume hydraulic fracturing shall be conducted in the state, and the state shall issue no permits for extraction of oil or natural gas using the process of horizontal drilling or high-volume hydraulic fracturing, prior to the adoption of the final health impacts assessment by the department of health, as required by section six of this act, and the state has in all material respects implemented the recommendations made by such final health impacts assessment.

S 8. This act shall take effect immediately and shall expire and be deemed repealed on the one hundred twentieth day after the adoption by the department of health of the final health impacts assessment; provided that, the commissioner of the department of health shall notify

1 the legislative bill drafting commission upon the adoption of the final  
2 health impacts assessment in order that such commission may maintain an  
3 accurate and timely effective data base of the official text of the laws  
4 of the state of New York in furtherance of effectuating the provisions  
5 of section 44 of the legislative law and section 70-b of the public  
6 officers law.
