STATE OF NEW YORK

10176--A

IN ASSEMBLY

March 22, 2018

Introduced by M. of A. D. ROSENTHAL, HEVESI, ROZIC, WEPRIN, HYNDMAN, BARNWELL, VANEL -- Multi-Sponsored by -- M. of A. COOK -- read once and referred to the Committee on Corporations, Authorities and Commissions -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee

AN ACT in relation to directing the metropolitan transportation authority to study and report on the feasibility of rehabilitating the Lefferts Boulevard Bridge

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Legislative intent. The legislature hereby finds and 1 2 declares that the Lefferts Boulevard Bridge is an essential almost 100-3 year-old structure in Kew Gardens, Queens that has been owned by the 4 MTA/Long Island Rail Road since 1925. The bridge has been an integral and essential focal point for community life in Kew Gardens for the past century. Presently, the bridge is home to a series of longstanding 7 local businesses, many of which have served the community, and contributed substantial revenues to the MTA, for multiple generations, while hard at work in their humble storefronts on top of the bridge. For at 10 least the past thirty years, the MTA/LIRR has let the bridge deteriorate 11 to the point where it appears to be structurally compromised due to lack 12 of attention, investment and proper maintenance. These neglectful and 13 inattentive acts have led the MTA/LIRR to declare that the only option 14 available as a next course of action is complete demolition of the 15 bridge. However, widespread demolition is unpalatable to the community for many reasons, including displacement of the businesses, disposition 16 of the property and disruption to essential quality of life issues. 17 18 Furthermore, the affected community believes that rehabilitation and 19 reconstruction of the bridge decking is possible and has retained its 20 own experts to provide evidence to this effect. Additionally, the LIRR 21 also commissioned a 2016 inspection report that indicated, in exhaustive 22 detail, the steps necessary to repair the present deficiencies of the 23 bridge, in contrast to demolition. However, the MTA has yet to consider 24 these rehabilitative options, which would cost only a fraction of demo-

- lition. Given the vast importance of the future of the bridge, the associated businesses and public safety, it is in the best interest of all parties that the MTA undertake a feasibility study of other alternatives with specific research centering around the impacts, economic and otherwise, to the affected community.
 - § 2. The metropolitan transportation authority shall conduct a study to examine the feasibility and impact of the rehabilitation of the Lefferts Boulevard Bridge. Such study shall focus on the costs and benefits of such rehabilitation and shall include, but not be limited to the following issues:
 - (a) all feasible alternatives to demolishing the bridge;
 - (b) the economic impact of all such alternatives;
- 13 (c) a plan for preserving, without interruption, all businesses in 14 place that currently occupy surface space above the bridge; and
- 15 (d) the economic impact to surrounding businesses if such rehabili-16 tation does not occur.
- 17 § 3. Within ninety days after the effective date of this act, the chairman of the metropolitan transportation authority shall submit a 19 written report to the governor, temporary president of the senate, 20 speaker of the assembly and mayor of the city of New York, with the 21 findings and recommendations of the study conducted pursuant to section 22 two of this act.
- 23 § 4. This act shall take effect immediately.
