14 thousand gallons per year presented to market. The credit under this
15 section shall be capped at two and one-half million dollars per taxpayer
16 per taxable year for up to no more than four consecutive taxable years
17 per biofuel plant. If the taxpayer is a partner in a partnership or

dollars. The tax credit allowed pursuant to this section shall apply to taxable years beginning before January first, two thousand twenty.

(b) Definitions. For the purpose of this section, the following terms shall have the following meanings:

(1) "Biofuel" means a fuel which includes biodiesel and ethanol. The term "biodiesel" shall mean a fuel comprised exclusively of mono-alkyl esters of long chain fatty acids derived from vegetable oils or animal fats, designated B100, which meets the specifications of American Society of Testing and Materials designation D 6751-02. The term "ethanol" shall mean ethyl alcohol manufactured in the United States and its territories and sold (i) for fuel use and which has been rendered unfit for beverage use in a manner and which is produced at a facility approved by the federal bureau of alcohol, tobacco and firearms for the production of ethanol for fuel, or (ii) as denatured ethanol used by blenders and refiners which has been rendered unfit for beverage use. The term "biofuel" may also include any other standard approved by the New York state energy and research development authority.

(2) "Cellulosic ethanol" means the production of ethanol from lignocellulosic biomass feedstocks not used for food production that are altered through activities referenced in subparagraph five of paragraph (b) of subdivision one of section thirty-one hundred two-e of the public authorities law. Such lignocellulosic biomass feedstocks may include, but are not necessarily limited to, switchgrasses or willows, agricultural and forestry residues, clean wood and wood wastes, pulp and paper mill wastes or extracts, and non-recyclable paper. Any question as to whether any feedstock qualifies under this paragraph shall be determined by the president of the New York state energy and research development authority in consultation with the commissioner of environmental conservation and the commissioner of agriculture and markets.

(3) "Biofuel plant" means a commercial facility located in New York state at which one or more biofuels are produced. For the purposes of this section, any commercial facility where cellulosic ethanol is produced shall be considered a separate biofuel plant.

(c) Reporting requirements. A taxpayer wishing to claim a credit under this section shall annually certify to the commissioner (i) that biofuel produced at the eligible biofuel plant meets all existing standards for biofuel and (ii) the amount of biofuel produced at the eligible biofuel plant during a taxable year.

(d) Cross-references. For application of the credit provided for in this section, see the following provisions of this chapter:

(1) Article 9: Section 187-c.

(3) Article 22: Section 606, subsections (i) and (jj).

§ 2. Section 187-c of the tax law, as amended by section 15 of part S of chapter 59 of the laws of 2014, is amended to read as follows:

§ 187-c. Biofuel production credit. A taxpayer shall be allowed a credit to be computed as provided in section ~~[twenty-eight]~~ twenty-eight-a of this chapter, ~~[as added by part X of chapter sixty-two of the laws of two thousand six,~~ against the tax imposed by this article. The tax credit allowed pursuant to this section shall apply to taxable years beginning before January first, two thousand twenty.

Provided, however, the provisions of subsection (c) of section one thousand eighty-eight of this chapter notwithstanding, no interest shall be paid thereon. The tax credit allowed pursuant to this section shall apply to taxable years beginning before January first, two thousand twenty.
