STATE OF NEW YORK

5684

2017-2018 Regular Sessions

IN SENATE

April 25, 2017

Introduced by Sen. SAVINO -- read twice and ordered printed, and when printed to be committed to the Committee on Consumer Protection

AN ACT to amend the general business law, in relation to the layout, installing, servicing, repairing, inspecting, testing and maintaining of automatic water-based fire protection systems; and providing for the repeal of certain provisions upon expiration thereof

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1	Section 1. The general business law is amended by adding a new article
2	40 to read as follows:
3	ARTICLE 40
4	AUTOMATIC WATER-BASED FIRE PROTECTION SYSTEMS
5	Section 900. Definitions.
б	901. Contractor license and RME Requirements; scope of practice;
7	penalties for non-compliance.
8	902. Powers of the department of state division of licensing
9	services and the New York state fire protection licensure
10	board.
11	903. New York state fire protection advisory board.
12	904. New licensing and certification requirements.
13	905. Licensing and certification requirements for existing
14	contractor.
15	<u>906. Specialists.</u>
16	907. License: application; insurance; display; and duplicates.
17	908. License: renewal and RME.
18	909. Inspection of water-based fire protection systems.
19	<u>910. Fees.</u>
20	911. Suspension and revocation of licenses.
21	912. Hearing on charges; decision.
22	<u>913. Judicial review.</u>
23	<u>914. Violations and Penalties.</u>

EXPLANATION--Matter in <u>italics</u> (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD01960-01-7

1	<u>915. Official acts used as evidence.</u>
2	<u>916. Disposition of fees.</u>
3	<u>917. Severability.</u>
4	<u>918. Applicability.</u>
5	<u>919. Contractual agreements.</u>
6	§ 900. Definitions. As used in this article, unless the context
7	requires otherwise:
8	<u>1. "A/d/b/a" means "also doing business as".</u>
9	2. "Apprentice sprinkler fitter" means a person with interest in and
10	aptitude for performing fire suppression work known as, but not limited
11	to, fire sprinkler fitting work but who alone is not capable of perform-
12	ing fire suppression work, and such person must be enrolled in a New
13	York state registered or a U.S. Department of Labor recognized fire
14	sprinkler fitter apprenticeship program and must be directly supervised
15	by a licensed journeyperson on any one jobsite.
16	3. "Approved apprenticeship program" means an apprenticeship-training
17	program recognized by the industry and accepted as an apprenticeship
18	program by the state of New York or the U.S. Department of Labor.
19	4. "Board" means the New York State Fire Protection Licensure Board
20	under the department. The board shall be the approving body for all
21	rules, requirements, regulations, and future modifications affecting
22	licensure, certificates and certification, exams, training, and other
23	issues under this article.
24	5. "Business entity" means a firm, company, partnership, limited
24 25	
	<u>liability company or corporation.</u> <u>6. "Department" refers to the division of licensing services within</u>
26	
27	the department of state.
28	7. "Engineer of record" means a professional engineer licensed in
29	accordance with article one hundred forty-five of the education law and
30	qualified by experience and training to provide design criteria for fire
31	protection systems to include:
32	(a) selection of type of system and components;
33	(b) classification of the hazard and commodities to be protected;
34	(c) the density and water flow/pressure requirements for the system
35	design;
36	(d) confirmation of the available water supply data;
37	(e) preliminary hydraulic calculations to verify adequacy of proposed
38	water supply arrangements;
39	(f) reasonable efforts to identify water supplies that could lead to
40	microbiologically influenced corrosion (MIC); and
41	(g) seismic information and other items identified by law or the
42	uniformed codes.
43	8. "Fee" means any "examination fee," "license fee," "registration
44	fee, and/or "renewal fee" is required to accompany an application or
45	issuance of any license, certification, or registration including any
46	temporaries or renewals, pursuant to this article. Such fee shall be
47	non-refundable.
48	9. "Fire suppression" means:
49	(a) the practice, materials, and equipment, in or adjacent to a build-
50	ing, or premises, used in the installation, maintenance, extension, or
51	alteration of all piping, materials, and equipment, both above and below
52	ground, as defined by the state fire code, in connection with the
53	discharge of water, backflow preventers, and private water supply
54	systems, for the express purpose of extinguishing and controlling fire;
55	and

(b) the practice of installing, repairing, inspecting, testing, main-1 2 taining, and servicing fire suppression or fire fighting systems includ-3 ing both overhead piping and underground fire water mains, backflow 4 prevention devices, fire hydrants and hydrant mains, standpipes and hose 5 connections to the fire sprinkler systems, fire sprinkler tank heaters, б air lines and thermal systems used in connection with fire sprinkler 7 systems, tank and pump connections and fire protection systems as 8 defined by the state fire code. 9 10. "Fire sprinkler system" means any water-based automatic fire 10 extinguishing, fire suppression system or fire control system employing 11 fire sprinklers and consisting of underground and overhead piping or conduits including accessory fire pumps and associated piping, fire 12 standpipes that convey water with or without other agents to dispersal 13 14 openings or devices to extinguish, control, suppress, or contain fire and provide protection from exposure to fire or the products of 15 16 combustion and installed in accordance with applicable fire prevention 17 and building codes of the state of New York and referenced standards and approved more restrictive local standards. 18 19 11. "Full time employee" means an employee of the business entity in a 20 position expected to work at least two thousand hours per year. Earned, 21 paid time for leave such as vacation, sick, or personal days shall not count against the two thousand hours. 22 12. "Geographical area" means distinct areas of the state of New York 23 24 as follows: 25 (a) Zip Codes 10000 - 12999 and 13300 - 13999; and 26 (b) Zip Codes 13000 - 13299 and 14000 - 14999. 27 13. "Inspection" means a visual examination of a building owner's water-based fire protection system or portion thereof to verify within 28 29 the scope of NFPA 25 that the system appears to be in operating condi-30 tion and is free of physical damage. 31 14. "Inspection, testing, and maintenance" means a program provided by 32 a New York state licensed water-based fire protection contractor when 33 contracted with a property or building owner or their representative or 34 gualified building owner's representative in which all components unique 35 to the property's systems are inspected and tested at the required times and necessary maintenance is provided. This program includes logging and 36 retention of relevant records and reporting of deficiencies and malfunc-37 38 tions to the building owner or his authorized representative and appro-39 priate authorities that may be required. 15. "Inspector" means a person certified in the NICET Level II 40 41 "Inspections and Testing of Water-Based Systems" and is employed by a 42 New York state licensed contractor as herein defined who performs 43 inspection and testing on a water-based fire protection system within 44 the scope of NFPA 25, the New York State Fire and Building Code set, and 45 other laws or regulations. 46 16. "Inspector trainee" means inspectors in training that may perform 47 inspections under the direct supervision of a NICET Level II certified inspector for up to one year prior to obtaining NICET Level I and subse-48 quently perform inspections under direct supervision up to an additional 49 two years prior to obtaining NICET Level II in the field of "inspections 50 51 and testing of water-based systems". The inspector in training and NICET 52 Level II supervisor must both be in the direct employ of the contractor I, II, III, or IV. The department shall issue a card once per lifetime 53 54 with a three year limitation and be maintained to prove these durations 55 are met, if the inspector trainee does not obtain the required certif-

1	ications, he or she shall not be allowed to continue to perform
2	inspections.
3	17. "Install" or "installation" means the initial placement of the
4	water-based fire protection system or its extension or alteration after
5	the initial placement.
6	18. "Journeyperson" means a person qualified by at least ten thousand
7	hours (10,000) of work experience installing, adjusting, repairing,
8	dismantling, inspecting, testing, and maintaining water-based fire
9	protection systems and who is competent to instruct and supervise the
10	water-based fire protection work of apprentice fire sprinkler fitters
11	and residential trainees.
12^{11}	<u>19. "Layout" means the placement of risers, cross mains, branch lines,</u>
13	fire sprinklers, sizing of pipe, hanger locations, and supplemental
14	hydraulic calculations in accordance with the provisions of water-based
15	fire protection design standards and design criteria as provided by
16	engineer of record.
17	20. "License holder" means a business entity as herein defined as
18	licensed by the department to engage in the business of layout, install-
19	ing, repairing, inspecting, testing, or maintaining water-based fire
20	protection systems under this article. One license may name no more
21	than one business entity.
22	21. "Maintenance" means work performed by the licensed water-based
23	fire protection contractor to keep equipment operable and make repairs.
24	22. "Multipurpose system" means a piping system intended to serve both
25	the domestic and fire protection needs.
26	23. "NCCI" means the National Council on Compensation Insurance.
27	24. "NFPA" means the National Fire Protection Association, Inc.
28	25. "NFSA" means the National Fire Sprinkler Association, Inc.
29	26. "NICET" means the National Institute for Certification in Engi-
30	neering Technologies or other recognized entity by the fire sprinkler
31	industry equal or better to NICET as determined by the department.
32	27. "OFPC" or "office" means the New York State Office of Fire
33	Prevention and Control.
34	28. "Point of private service" means the point at which the private
35	underground piping for a water-based fire protection system using water
36	as the extinguishing agent becomes used for the water-based fire
37	protection system.
38	29. "Repair" means any work on a system after the initial installation
39	to replace, correct and maintain the system to provide performance as
40	originally designed.
41	30. "Residential tradesperson" means a person in the employ of a
42	contractor I, III, or IV and is limited to the scope of work as defined
43	in contractor IV, plus mixed use residential occupancies up to and
44	including four stories in height and is qualified by at least eight
45	thousand hours (8,000) of work experience installing, adjusting, repair-
46	ing, and dismantling fire suppression systems and who is competent to
47	instruct and supervise the fire suppression work of residential train-
48	ees.
49	31. "Residential trainee" is under the contractor I, III, or IV
50	license only and is limited to the scope of work as defined in contrac-
51	tor IV and means a person in training that may perform residential fire
52	sprinkler fitter work under direct supervision of a residential trades-
53	person or a journeyperson. The department shall issue a card once per
54	lifetime with a four year limitation and be maintained to prove these

55 durations are met, if the residential trainee does not obtain the resi-

-	the set of
1	dential tradesperson license within the time limit, he or she shall not
2	be allowed to continue to perform such work.
3	32. (a) "Responsible managing employee" or "RME" means an individual
4	with appropriate NICET Certification who is a full time employee of a
5	water-based fire protection company, and is designated as the water-
б	based fire protection company's qualifier to do business as a water-
7	based fire protection contracting company. An RME may serve to qualify
8	only one contractor business location under this article in the state of
9	New York. An RME who works for more than one water-based fire protection
10	company at the same time shall not be considered a full time employee of
11	either, subject to the exception set forth in paragraph (b) of this
12	subdivision.
13	(b) An RME with appropriate NICET certifications may qualify one
14	water-based fire protection company or two separate water-based fire
15	sprinkler companies that operate in the same physical business location
16	and physical address provided that the controlling business principal
17	maintains both contractor licenses of any class for both businesses
18	along with all other requirements within this article at one location.
19	33. "Supervise" or "supervision" means the direction, management, and
20	oversight by the RME named on the business license of the activities of
21	personnel in the layout, installing, repairing, inspecting, testing, or
22	maintaining repair of any water-based fire protection system. However,
23	it is not the intention that supervision require the RME have to be at
24	the site of each layout, install, repair, inspection, test, or mainte-
25	nance of the water-based fire protection systems at all times.
26	34. "Testing" means testing water-based fire protection systems as
27	defined by fire code of the state of New York and referenced documents.
28	<u>35. "To engage in the business of layout, installing, repairing,</u>
29	inspecting, testing, or maintaining water-based fire protection systems"
30	means and refers to a New York state licensed water-based fire
31	protection contractor that holds itself out directly or indirectly, as
32	being able, or who offers or undertakes, by any means or method, to
33	layout, install, repair, inspect, test, or maintain a water-based fire
34	protection system.
35	36. "Water-based fire protection contractor" classes:
36	(a) "Contractor I" or "water-based fire protection systems contractor"
37	means a business entity that offers to undertake or represents itself as
38	being able to undertake, or does undertake the layout, installing,
39	repairing, inspecting, testing, or maintaining all types of water-based
40	fire protection systems and components. Types of systems include but are
41	not limited to land based and marine applications of fire sprinkler,
42	standpipe and hose, fixed water spray, and foam fire protection systems.
43	(b) "Contractor II" or "water-based fire protection systems inspection
44	contractor means a business entity that is limited to the execution of
45	contracts requiring the ability for inspection and testing along with
46	minor maintenance of land based and marine water-based fire protection
47	systems. The contractor II inspectors shall be certified NICET Level II
48	or better in "inspection and testing of water-based systems". Repairs
49	may be performed by this class to the limit of replacing deficient parts
50	without being considered an alteration or change in the original system.
51	(c) "Contractor III" or "fire sprinkler system contractor" means a
52	business entity that offers to undertake or represents itself as being
53	able to undertake, or does undertake the layout, installing, repairing,
54	inspecting, testing, or maintaining all types of water-based fire
55	protection systems and components with the exception of foam systems.

1	Types of systems include land based and marine applications of fire
2	<u>sprinkler, standpipe and hose, and fixed water spray.</u>
3	(d) "Contractor IV" or "residential fire sprinkler contractor" means a
4	business entity that offers to undertake or represents itself as being
5	able to undertake, or does undertake the layout, installing, servicing,
б	repairing, inspecting, testing, or maintaining of limited residential
7	water-based fire protection systems and whose scope of business is
8	limited to the scope of application of NFPA 13D "Standard for the
9	Installation of Sprinkler Systems in One- and Two-Family Dwellings and
10	Manufactured Homes" and NFPA 13R "Standard for the Installation of
11	Sprinkler Systems in Low-Rise Residential Occupancies" which is limited
12	to certain occupancy types.
13	(i) Contractor IV entities shall not and are not authorized to
14	contract or perform any work in the scope of this article for the
15	following:
16	(A) nursing homes and ambulatory care facilities; or
17	(B) dormitories, fraternities, sororities, or any housing that targets
18	students on or off campus.
19	(ii) A multi-purpose NFPA 13D fire sprinkler system layout, installa-
20	tion, service, repair, inspection, test, or maintenance shall require a
21	contractor I, III, or IV license and meet all requirements contained
22	herein regardless of and in addition to any other potable water profes-
23	sional or trade requirements, certifications or licensures required by
24	the state and authorities having jurisdiction.
25	37. "Water-Based Fire Protection Contractor business license" means a
26	license issued by the department to a business entity to operate as a
27	water-based fire protection contractor.
28	38. "Water-based fire protection system" is a commercial or residen-
29	tial system individually designed to protect the interior or exterior of
30	a specific building, structure, or other hazard from fire, or life safe-
31	ty whether land-based or marine. This system begins at the point of
32	private service as defined and ends at the most remote point of the
33	system. Such systems include, but are not limited to, water fire-
34	sprinkler systems, water spray systems, foam-water sprinkler systems,
35	foam-water spray systems, and foam extinguishing systems, or multi-pur-
36	pose systems used for fire protection. Such systems also include any
37	overhead and private underground fire mains, fire hydrants attached
38	thereto, standpipes and hoses connected to fire sprinkler systems, fire
39	sprinkler tank heaters, air lines, thermal systems used in connection
40	with fire sprinkler systems, and tanks and pumps connected to fire
41	sprinkler systems and installed in accordance with applicable codes and
42	standards of the state of New York.
43	39. "Years experience" means proof of employment based on definition
44	in "full time employee" for each twelve-month period.
45	§ 901. Contractor license and RME requirements; scope of practice;
46	penalties for non-compliance. 1. (a) It is unlawful for any organiza-
47	tion, business, or individual to engage in the business of layout,
48	installing, servicing, repairing, inspecting, testing, or maintaining of
49	a water-based fire protection system, act in the capacity of a water-
50	based fire protection contractor, or advertise itself as being a water-
51	based fire protection contractor without having been duly licensed and
52	holding a valid and existing license, except as hereinafter provided.
53	The RME named to qualify a business under this article must be a full
54	time employee of the organization or business. An RME who is employed by
55	more than one water-based fire protection contractor during the same

1	period of time shall not be the qualifier for more than one water-based
2	fire protection contractor at the same time.
3	(b) The department shall revoke, for a period of time determined by
4	the department, the RME as a qualifier for all water-based fire
5	protection contractors if an RME makes use or allows the use of NICET or
б	equivalent certification to qualify a company of which the RME is not a
7	full-time employee.
8	(c) Within two years from the effective date of this article, a
9	contractor who performs water-based fire protection systems work in New
10	York state must have in its employ one RME with appropriate NICET
11	certifications at each location where lay-out of water-based fire
12	protection systems shop drawings are performed. The provisions of this
13	paragraph shall apply to water-based fire protection systems contractors
14	based in other states, New York city and Nassau county or any other
15	location for work performed in the geographical areas specified in
16	subdivision twelve of section nine hundred of this article.
17	(d) Nothing in this subdivision prohibits an employee acting on behalf
18	of governmental entities or insurance providers from inspecting and
19	enforcing New York state codes, provided such employee is acting solely
20	on behalf of its employer. All fire protection cards, registrations,
21	certificates, and licenses required herein by this article and issued by
22	the department shall have statewide application and local governmental
23	entities are prohibited from establishing and imposing more or less
24	stringent standards, local licensing, certification, or registration on
25	state licensed water-based fire protection contractors or its employees.
26	(e) Local government shall not require any form of a business certif-
27	icate, licensing, certification, registration of a water-based fire
28	protection contractor or its RME or its employees that are licensed,
28 29	certified, or registered by the department of state unless the company
	certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction.
29 30 31	<pre>certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or</pre>
29 30 31 32	<pre>certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing,</pre>
29 30 31 32 33	<pre>certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of</pre>
29 30 31 32 33 34 35 36 37 38 39	certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of this article from employing individuals including New York state regis-
29 30 31 32 33 34 35 36 37 38 39 40	certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of this article from employing individuals including New York state regis- tered journeypersons and apprentices to assist in the layout, install-
29 30 31 32 33 34 35 36 37 38 39 40 41	certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of this article from employing individuals including New York state regis- tered journeypersons and apprentices to assist in the layout, install- ing, servicing, repairing, inspecting, testing, or maintaining of
29 30 31 32 33 34 35 36 37 38 39 40 41 42	certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of this article from employing individuals including New York state regis- tered journeypersons and apprentices to assist in the layout, install- ing, servicing, repairing, inspecting, testing, or maintaining of water-based fire protection systems and the license holder shall be
29 30 31 32 33 34 35 36 37 38 39 40 41 42 43	certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of this article from employing individuals including New York state regis- tered journeypersons and apprentices to assist in the layout, install- ing, servicing, repairing, inspecting, testing, or maintaining of water-based fire protection systems and the license holder shall be responsible for the proper layout, installing, servicing, repairing,
29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44	certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of this article from employing individuals including New York state registered journeypersons and apprentices to assist in the layout, installing, inspecting, repairing, inspecting, testing, or maintaining of water-based fire protection systems and the license holder shall be responsible for the proper layout, installing, servicing, repairing, inspecting of this article, the department shall require the NICET program of Inspection and Testing of Fire Protection Systems minimum Level II or equivalent acceptable to the department as proof that the inspectors are knowledgeable about nationally accepted standards for the inspection, testing, and maintennace of water-based fire protection systems. 4. By one year of the effective date of this article, no person or business shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining a water-based fire
$\begin{array}{c} 29\\ 30\\ 31\\ 32\\ 33\\ 35\\ 36\\ 37\\ 39\\ 41\\ 42\\ 43\\ 45\\ 46\\ 78\\ 90\\ 51\\ 52\\ 53\\ \end{array}$	 certified, or registered by the department of state unless the company maintains a physical office within the jurisdiction. 2. By one year of the effective date of this article, no person or business entity shall engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based fire protection systems beginning at the point of fire protection service as defined herein to the most remote parts of the system or hold himself out as being able so to do unless he is licensed, certified, or registered pursuant to this article. Nothing herein shall prohibit a properly licensed business entity in accordance with the provisions of this article from employing individuals including New York state registered journeypersons and apprentices to assist in the layout, installing, servicing, repairing, inspecting, testing, or maintaining of water-based fire protection systems and the license holder shall be responsible for the proper layout, installing, servicing, repairing, inspecting of water-based fire protection systems. 3. By two years of the effective date of this article, the department shall require the NICET program of Inspection and Testing of Fire Protection Systems minimum Level II or equivalent acceptable to the department as proof that the inspection, testing, and maintennance of water-based fire protection systems. 4. By one year of the effective date of this article, no person or business shall engage in the business of layout, installing, servicing,

1	country unlose lightened on a sector based first muchastics contractor T and
1	county unless licensed as a water-based fire protection contractor I or
2	contractor IV in the state of New York.
3	5. By one year of the effective date of this article, a contractor I,
4	contractor III, and contractor IV, who installs the underground piping
5	from the point of private service is responsible for completing the
6	installation to the aboveground connection flange before completing the
7	Contractor's Material and Test Certificate for Underground Piping docu-
8	ment. Aboveground contractors may not complete the Contractor's Material
9	and Test Certificate for Underground Piping document for underground
10	piping or portions thereof, which have been installed by others.
11	6. Introduction or addition of a backflow prevention device to an
12	existing water-based fire protection system, will cause a reduction in
13	available water pressure and may create system malfunction. It is the
14	responsibility of the building or property owner, commercial or residen-
15	tial to obtain the services of a New York state licensed professional
16	engineer to evaluate the fire protection system, supply documented find-
17	ings to the water-based fire protection contractor, and approve the
18	installation of any backflow prevention device.
19	7. A water-based fire protection contractor licensed under this arti-
20	<u>cle shall not:</u>
21	<u>(a) enter into a written or oral agreement to authorize, or otherwise</u>
22	knowingly allow a contractor who is not licensed under this article to
23	engage in the business of, or act in the capacity of, a water-based fire
24	protection contractor; or
25	(b) apply for or obtain a construction permit for water-based fire
26	protection work unless the water-based fire protection contractor or the
27	business organization qualified by the water-based fire protection
28	contractor has contracted to conduct the work specified in the applica-
29	tion for the permit.
30	8. Any person who violates any provision of this article or commits
31	any of the acts constituting cause for disciplinary action as herein set
32	forth is guilty of a misdemeanor of the second degree, punishable as
33	provided in this article.
34	9. In addition to the penalties provided in subdivision eight of this
35	section, a water-based fire protection contractor licensed under this
36	article who violates any provision of this section or who commits any
37	act constituting cause for disciplinary action is subject to suspension
38	or revocation of the license pursuant to sections nine hundred ten of
39	this article and administrative fines pursuant to section nine hundred
40	thirteen of this article.
41	10. A license holder has an affirmative duty to provide supervision to
42	employees and for all business activities. Such supervision shall
43	consist of regular, frequent and consistent personal guidance, instruc-
44	tion, oversight and superintendence by the qualifying RME or RMEs with
45	respect to the general business conducted by the firm and all matters
46	relating thereto.
47	11. (a) The license holder shall employ apprentices who have or are
48	currently enrolled in a New York state registered- or a U.S. Department
49	of Labor recognized-fire sprinkler fitter apprenticeship program.
50	(b) Notwithstanding any moratorium on apprenticeship training programs
51	that may be imposed by any state agency or Board, upon the effective
52	date of this article, fire sprinkler fitter apprenticeship training
53	programs approved by the U.S. Department of Labor shall be approved and
54	accepted by all state agencies.

1	12. Nothing in this article shall prohibit a principal of a given
2	business entity from qualifying as that business entity's RME as long as
3	the principal meets all the qualifications in this article.
4	13. Licenses issued to contractors shall clearly show the level of
5	license issued for ease of identification by field staff of department
б	and OFPC, local code enforcement officials, the public, and other inter-
7	ested parties.
8	14. License Applicability Overview.
9	<u>Function Class I Class II Class III Class IV</u>
10	Inspect All All Water, not foam 13D and limited 13R
11	TestAllAllWater, not foam13D and limited 13R
12	MaintainAlln/aWater, not foam13D and limited13R
13	Install All n/a Water, not foam 13D and limited 13R
14	RepairAlln/aWater, not foam13D and limited 13R
15	Modify All n/a Water, not foam 13D and limited 13R
16	15. The proper application of the referenced water-based fire
17	protection system inspection, testing, and maintenance standard requires
18	one with special knowledge and certification as required in this arti-
19	cle. The act of opening and closing valves and other actions necessary
20	to ensure system readiness therefore requires special skills and know-
21 22	ledge; an untrained person could cause a costly system trip. According- ly, the point of connection for fire alarm signaling devices is the
22	point of connection on the initiating device. It is the intent that
24	alarm contractors be prohibited from and only the appropriate water-
25	based fire protection license holders opening valves or flowing water in
26	water-based fire protection systems and that testing the wires from the
27	point of connection back to the monitoring devices is the scope of prac-
28	tice of an alarm technician. The water-based system inspector empowered
29	to test the fire suppression system pursuant to this article is respon-
30	sible to flow water and may reset the alarm panel when flow and tamper
31	indicators report. It is the intent that an alarm license is not
32	required to perform this portion of inspection, testing, and mainte-
33	nance.
34	<u>§ 902. Powers of the department of state division of licensing</u>
35	services and the New York state fire protection licensure board. In
36	addition to the powers and duties elsewhere prescribed in this article,
37	the department and board shall have power:
38	1. to appoint an adequate number of assistants, field inspectors and
39	other employees as may be necessary to carry out the provisions of this
40	article, to prescribe their duties, and to fix their compensation within
41	the amount appropriated therefor.
42 43	<u>2. to examine the qualifications and fitness of applicants for licenses, or registrations under this article.</u>
43 44	<u>3. to keep records of all licenses, certifications, and registrations</u>
45	issued, suspended or revoked and publish such information on a website
46	accessible by the public.
47	<u>4. to prepare a manual of rules and regulations for the licensure</u>
48	process of water-based fire protection contractors and to publish such
49	information on a website accessible by the public.
50	5. to promulgate such rules and regulations not inconsistent with the
51	provisions of this article, as may be necessary with respect to the form
52	and content of applications for licenses and registrations, and the
53	reception thereof, the investigation and examination of applicants and
54	their qualifications, and the other matters incidental or appropriate to
55	their powers and duties as prescribed by this article and for the proper
56	administration and enforcement of the provisions of this article, and to

1	make recommendations to add amond on reneal any of such mules and
1	make recommendations to add, amend, or repeal any of such rules and
2	regulations.
3	§ 903. New York state fire protection advisory board. 1. The secretary
4	of state shall establish the New York state fire protection advisory
5	board. The board shall conduct its first meeting within ninety days of
6	the effective date of this article.
7	2. The board shall be composed of eleven members as follows:
8	(a) the New York secretary of state or his/her designee;
9	(b) the New York state fire administrator or his/her designee;
10	(c) the New York state director of the division of building standards
11	and codes or his/her designee;
12	(d) two members shall be fire sprinkler fitter representatives
13	appointed by the President of the New York Pipe Trades;
14	(e) three members appointed by the President of the National Fire
15	Sprinkler Association, Inc., one of whom shall be a professional engi-
16	neer licensed by the department of education with experience in water-
17	based fire protection;
18	(f) the NFSA regional manager representing New York;
19	(g) one member appointed by the temporary president of the senate; and
20	(h) one member appointed by the speaker of the assembly.
21	3. Of the members appointed by the President of the National Fire
22	Sprinkler Association, Inc., the appointees' businesses locations shall
23	be from as separate geographical areas of New York state as is possible.
24	The appointees' businesses must have been actively engaged in the busi-
25	ness of layout, installing, inspecting, testing, servicing, altering, or
26	maintaining water-based fire protection systems for at least five years
27	immediately prior to their appointment.
28	4. Vacancies on the board shall be filled in the same manner as the
29	original appointment.
30	5. The chair of the board shall be the secretary of state or his or
31	her designee. In the absence of the secretary of state or his or her
32	designee, the state fire administrator or his or her designee or the
33	director of building standards and codes division or designee may serve
34	as chair.
35	6. The board shall meet at least quarterly but may meet more often as
36	the need presents itself. Members of the board shall use due diligence
37	to participate in all scheduled and special meetings as required. The
38	department shall take minutes and make minutes available as soon as
39	reasonably possible to board members that are absent.
40	7. The board shall have the power and authority to:
40 41	(a) direct the department in administration of the requirements estab-
42	lished in this article and all future fire protection licenses in the
43	state;
44	(b) review complaints and disputed administrative action and make
45	non-binding recommendations for disciplinary action to the department at
46	the request of the certificate holder, license holder, or the depart-
47	ment;
48	(c) make decisions and supply in writing to the department rules,
49	codes, standards, interpretations, and training; and
50	(d) develop and maintain fitter testing for the purpose of licensure
51	of journeypersons and apprentices, which shall be administered and
52	enforced by the department.
53	8. The term of the appointed board members shall expire on June thir-
54	tieth of the first year after the establishment of the board and bienni-

55 ally thereafter. An appointee may qualify for more than one term.

1	9. Six members of the board shall constitute a quorum for purposes of
2	voting and making decisions; provided, however, that such members shall
3	include at least one fire protection contractor and one fire sprinkler
4	fitter. Motions shall not move forward without at least one vote in
5	consensus from at least one fire sprinkler fitter and one member
6	appointed by the President of the National Fire Sprinkler Association,
7	Inc.
8	10. Members of the board shall receive no additional pay, allowances,
9	or benefits by reason of his or her service to the board, but shall be
10	reimbursed for travel, subsistence, and other necessary expenses
11	incurred by them in the performance of their duties to the extent
12	authorized by the comptroller for state employees.
13	§ 904. New licensing and certification requirements. 1. As a prerequi-
14	site for licensure as a contractor I, the RME qualifier or qualifiers
15	must be at least twenty-three years of age, be of good moral character,
16	and shall possess five years' proven experience and progressive training
17	in the employment of a water-based fire protection system contractor I
18	or a combination of equivalent education and experience. It is the
19	intent that the contractor I RME meet the criteria of NICET Level III
20	certification in the specific technical discipline of "Water-based
21	layout" or an equivalent accepted by the board and also department as a
22	prerequisite with NICET "Special Hazards Suppression Systems" or an
23	equivalent accepted by the board and department. Two RMEs are permitted
24	with one in each discipline.
25	2. As a prerequisite for licensure as a contractor II, the RME qual-
26	ifier must be at least eighteen years of age, be of good moral charac-
27	ter, and be certified NICET Level II for "Inspection and Testing of
28	Water-based Systems" or equivalent accepted by the board and department.
29	NICET Level I "Inspection and Testing of Water-based Systems" or an
30	equivalent accepted by the board and department may perform inspection
31	and testing under direct on site supervision of a NICET II or equivalent
32	inspector.
33	3. As a prerequisite for licensure as a contractor III, the RME qual-
34	ifier must be at least twenty-three years of age, be of good moral char-
35	acter, and shall possess five years' proven experience and progressive
36	training in the employment of a water-based fire protection system
	contractor I or III or a combination of equivalent education and experi-
37 38	ence. The RME qualifier for the contractor III license shall meet the
39	criteria of NICET Level III certification in the specific technical
40	discipline of "Water-based layout" as a prerequisite or an equivalent
	accepted by the board and department.
41	4. As a prerequisite for licensure as a contractor IV, the RME qual-
42	ifier must be at least twenty-three years of age, be of good moral char-
43	
44	acter, and shall possess five years proven experience and progressive
45	training in the employment of a water-based fire protection system
46	contractor I, III, or contractor IV or a combination of equivalent
47	education and experience. The RME qualifying a contractor IV license
48	shall meet the criteria of NICET Level III certification or equivalent
49	in the specific technical discipline of "Water-based layout".
50	5. A New York state professional engineer license with education and
51	experience in fire protection engineering may be substituted for the
52	NICET requirements in this section.
53	§ 905. Licensing and certification requirements for existing contrac-
54	tor. 1. An existing contractor shall be entitled to a license under this
55	article if such contractor shall present to the department: (a) satis-
56	factory evidence that the business has been actively engaged in the

1	proper class of contracting in the scope of the license applied for in
	layout, installing, servicing, repairing, inspecting, testing, or main-
2	
3	taining of water-based fire protection systems as a contractor I,
4	contractor II, or contractor III within the state for at least five
5	years within the period of six years immediately prior to the effective
б	<u>date of this article; or</u>
7	(b) proof of proper insurance as a water-based fire protection
8	contractor within the state and proof of five years insurance immediate
9	to application as a water-based fire protection contractor. Proof of
10	five years insurance shall include the latest NCCI Rating Sheet for
11	workers' compensation showing the appropriate code for fire sprinkler
12	fitters.
13	2. A business has been actively engaged in the proper class of
14	contracting or a water-based fire protection contractor that has been in
15	existence less than five years as of the effective date of this article
16	shall be entitled to a license upon presentation to the department of
17	proof of regularly performing fire sprinkler work or successfully
18	completed a fire sprinkler apprenticeship program provided by a fire
19	sprinkler local or other nationally recognized fire sprinkler associ-
	ation program which is to be deemed acceptable by the board, and show
20	
21	valid proof of proper NCCI insurance rating as a water-based fire
22	protection contractor within New York state since the inception of the
23	business.
24	3. No license issued pursuant to the provisions of this section shall
25	be renewed.
26	§ 906. Specialists. 1. The department shall issue licenses to the
27	following classes of specialists:
28	<u>(a) journeyperson fitter;</u>
29	(b) apprentice fitter;
29 30	
	(b) apprentice fitter;
30	(b) apprentice fitter; (c) residential tradesperson;
30 31	(b) apprentice fitter; (c) residential tradesperson; (d) residential trainee;

1	article without requiring a test. After the one year period, the
2	department shall, in addition to all other requirements under this arti-
3	cle, require each specialist applicant to pass a competency test showing
4	that the applicant is knowledgeable in fire suppression work prior to
5	issuing any license pursuant to this article.
б	6. The department shall establish a method for establishing an appli-
7	cant's qualifications, including the determination of how many hours of
8	fire suppression work the applicant has performed.
9	7. The department may deny the application of any applicant who fails
10	to comply with the provisions of this article or any rule or regulation
11	related thereto, or who lacks the necessary qualifications for a
12	license.
13	8. The department or board may, upon complaint or upon his or her own
14	inquiry, and upon notice to a specialist, suspend or revoke any license,
15	certificate, or card issued pursuant to this article if:
16	(a) the specialist's application that was supported by documentation
	that was materially false or misleading regarding the qualifications or
17 10	
18	experience of the applicant; or
19	(b) the specialist subscribed or vouched for a materially false or
20	misleading statement by an applicant; or
21	(c) the specialist was proven to unsafely or incompetently perform
22	work; or
23	(d) the specialist violated any law, rule, or regulation that was
24	enacted to protect the consumer or the public against unfair, unsafe,
25	unlawful, or improper business practices; or
26	(e) the specialist failed to comply with any rule or regulation of the
27	department or board promulgated to implement the provisions of this
28	article.
29	9. Any person aggrieved by a decision of the department or board is
30	entitled to judicial review as provided in the civil practice law and
31	<u>rules.</u>
32	10. Any person entering or any firm, corporation, or employee thereof,
33	or any representative, member or officer of such firm or corporation
34	causing a person to enter upon or engage in the business of performing
35	any fire suppression work as defined in section nine hundred nine of
36	this article without obtaining the required license or otherwise comply-
37	ing with this article, is for the first offense guilty of a misdemeanor.
38	Such a conviction will result in a fine of not less than one hundred
39	dollars or more than five hundred dollars. For a second and each subse-
40	quent offense, the penalty and punishment is a fine of not less than
41	five hundred dollars or more than one thousand dollars. Each day during
42	which fire suppression work is performed without the required license or
43	while not in compliance with any of the provisions of section nine
44	hundred nine of this article, after official notice that such work is
45	<u>unlawful, is a separate offense.</u>
46	11. Any fire suppression work performed by a person is determined by
47	the secretary of state to be a safety or health hazard to members of the
48	public or any fire suppression work of an extensive nature being
49	performed by any person without the required license or otherwise in
50	noncompliance with the requirements of this article or contrary to an
51	order or rule promulgated lawfully by the department or board, is
52	subject to being issued a citation or a civil action in the name of the
53	state in the court of the county where such work is being performed for
54	an injunction against such person, firm or corporation, enjoining such
55	work or violation. A court by mandatory or prohibitory injunction may
	WOLK OF VIOLALION. A COULL DY MANDALORY OF DEDILIDILORY IN MUCHTON MAY

1	orders of the secretary of state and with any final decision of the
2	board. The department and board shall be represented in all such
3	proceedings by the attorney general or his/her designee.
4	12. As of the effective date of this article, no municipality or coun-
5	ty may require any license or evidence of a person's competence as a
б	fire suppression system worker from a person pursuant to this article as
7	a condition precedent to permission to perform fire suppression work
8	within the municipality. This shall not include a license for any work
9	covered by any national, state or municipal electrical code including
10	but not limited to pull stations, strobes, heat detectors, smoke detec-
11	tors, fire alarms or bells, and any electrical wiring including conduit
12	connected to raceway control cabinets.
13	13. Cards issued by the department shall be clearly marked whether the
14	<u>cardholder is an apprentice or journeyperson.</u>
15	14. No journeyperson or apprentice shall hold himself or herself out
16	to be qualified to install, inspect, test, or maintain a water-based
17	fire protection system without being in the active employ of a licensed
18	New York state water-based fire protection contractor.
19	15. When applying for renewal, journeypersons, residential tradesper-
20	sons, and residential trainees shall prove sixteen hours of approved
21	continuing education units in the field of fire suppression work, safe-
22	ty, or other applicable course of study from a third party source of
23	education or training. Safety courses may be a maximum of eight hours of
24	the requirements and shall be OSHA sanctioned or approved programs.
25	On-line internet programs may obtain a maximum of four hours. All educa-
26	tion, courses of study, and training will require proof of successful
27	completion of all hours.
28	16. The department may issue a temporary license to a fitter prior to
29	such person taking an examination if such person meets the requirements
30	of "journeyperson fitter" as defined in this article. The temporary
31	license shall only be issued once to a person during his/her lifetime
32	and shall only be valid from the date of issuance until the date of the
33	next examination.
34	17. (a) If any person, eligible as a journeyperson or apprentice as
35	provided in this section, be in the military service at or during the
36	time an application is required to be filed with fee paid, according to
37	the provisions of this section, the period within which the application
38	may be filed and fee may be paid, is extended in behalf of such person
39	until three months after the termination of military service, notwith-
40	standing any provisions in this article to the contrary.
41	(b) In the case of persons who are or were in the military service and
42	have been or will be discharged under conditions other than dishonor-
43	able, the period of two years specified need not be continuous. The
44	length of time such person was employed as a specialist before entering
45	active military service may be added to any period of time during which
46	such person was or is engaged as a specialist after the termination of
47	<u>military service.</u>
48	§ 907. License: application; insurance; display; and duplicates. 1.
49	After a representative RME meets the provisions of this article as a
50	business qualifier, any business entity desiring a license to engage in
51	the business of layout, installing, inspecting, servicing, altering, or
52	maintaining of water-based fire protection systems under this article,
53	may make application to the department. The RME shall be subscribed by
54	the license applicant and affirmed by him or her as true under the
55	penalties of perjury. The license application shall be in such form and
56	shall contain such information relative to the RME NICET certification

1	number, category of discipline, and level of discipline. Each license
2	application shall be accompanied by a copy of required certifications as
3	established in this article proving the level of certification for
4	inspection by the department.
5	2. All licenses shall be for a period of two years.
б	3. No license shall be assignable or transferable except as hereinaft-
7	er provided.
8	4. A license issued to a limited liability company or to a corporation
9	to engage in the business of layout, installing, servicing, repairing,
10	inspecting, testing, or maintaining of water-based fire protection
11	systems shall require that such business be operated under the direction
12	of an RME of the limited liability company or corporation, who shall be
13	required to meet the certification requirements of this article on
14	behalf of the license holder and who, in the case of a corporation,
15	shall not be required to be an officer of the corporation. If such RME,
16	who shall have met the requirements of this article, ceases to act in
17	the capacity of RME for any reason whatsoever, the license holder shall
18	notify the department in writing within five business days from such
19	termination or cessation. The license holder may continue to conduct the
20	business of layout, installing, servicing, repairing, inspecting, test-
21	ing, or maintaining water-based fire protection systems for a period not
22	to exceed sixty days from the date of such termination or cessation; the
23	period of sixty days prior may be extended upon application to the
24	department and for good cause for an additional period not to exceed one
25	hundred and twenty days; by the end of such period a new RME must be
26	designated who has met the certification requirements of this article on
27	behalf of the license holder.
28	5. (a) As a prerequisite to issuance of a license, the department
29	shall require the business entity to submit satisfactory evidence that
30	the company has obtained appropriate water-based fire protection
31	contracting commercial general liability insurance showing proof of
32	appropriate coverage amounts doing business as described for the appro-
33	priate contractor level being applied for herein with a minimum of one
34	million dollars (\$1,000,000) for contractor I, contractor II, contractor
35	III, and contractor IV. This proof shall show appropriate coverage for
36	comprehensive general liability for bodily injury and property damages,
37	products liability, completed operations, contractual liability, and
38	workers' compensation. The board may adopt rules providing for the mini-
39	mal amount of insurance for all contractor classes.
40	(b) The water-based fire protection contractor certificate of insur-
41	ance shall provide that the insurance shall not be modified, any materi-
42	al change in coverage or any termination, non-renewal, or cancellation
43	unless thirty days prior notice shall be given to the department.
44	(c) The water-based fire protection contractor certificate of insur-
45	ance must include the policy number, date of expiration, and physical
46	address of each contractor location. The contractor's operation of
47	business must be noted in the description part of the certificate.
48	(d) The "State of New York" shall be named as the certificate holder.
49	(e) An insurer, which fails to so notify the department, shall be
50	subject to the penalties provided in this article.
51	6. Upon satisfaction of the requirements of this section, the license
52	shall be issued. However, no license shall remain in effect if, after
53	issuance, the license holder fails to maintain all insurance coverage
54	required by this section.
55	7. The department may, at any time subsequent to the issuance of the
56	license or its renewal, require, upon demand and in no event more than

thirty days after notice of the demand, the license holder to provide 1 proof of insurance coverage on a form provided by the department 2 3 containing confirmation of insurance coverage as required by this arti-4 cle. Failure to provide proof of insurance coverage as required, for 5 any length of time, shall result in the immediate suspension of the б license until proof of insurance is provided to and accepted by the 7 department. 8 8. The license issued to conduct the business of layout, installing, 9 servicing, repairing, inspecting, testing, or maintaining of water-based 10 fire protection systems shall be conspicuously posted upon the premises where the license holder is engaged in the business of layout, install-11 ing, servicing, repairing, inspecting, testing, or maintaining of 12 13 water-based fire protection systems. 9. Within one year of the effective date of this article, and after 14 obtaining a license issued pursuant to the terms of this article, all 15 documents or receipts issued by or on behalf of a business licensed 16 17 pursuant to this article must contain the identification number issued to such business in the phrase "New York State License # 18 19 10. Within one year of the effective date of this article, and after 20 obtaining a license issued pursuant to the terms of this article, all 21 advertising placed by a business entity licensed under this article must contain the following statement: "New York State License # ". 22 11. A duplicate license may be issued for one lost, destroyed or muti-23 lated upon application therefor on a form prescribed by the department 24 and the payment of the fee prescribed therefore by this article. Each 25 26 such duplicate license shall have the word "duplicate" clearly stamped 27 or watermarked across the face thereof and shall bear the same number as the one it replaces. All information from the original license shall be 28 29 transposed identically onto the duplicate license. 30 12. Notice in writing shall be given to the department by the holder 31 of a license to conduct the business of layout, installing, inspecting, servicing, altering, or maintaining of water-based fire protection 32 systems of any change in address of the business together with the 33 34 return of license, whereupon a properly signed endorsement will be made 35 on the face of the license as to such change and the license then returned to the license holder. A change of address by a license holder 36 without such notice and endorsement of license shall operate to cancel 37 38 the license. 13. A license to conduct the business of layout, installing, servic-39 ing, repairing, inspecting, testing, or maintaining of water-based fire 40 41 protection systems issued to a business entity may be used after the 42 death of the RME for a period of not more than sixty days from the date 43 of death of such individual. The period of sixty days aforesaid may be 44 extended upon application to the department and for good cause shown for 45 an additional period not to exceed one hundred and twenty days. 46 § 908. License: renewals and RME. The contractor shall submit application for license renewal with current RME information and qualifica-47 48 tions. 49 § 909. Inspection of water-based fire protection systems. 1. department or OFPC shall have the right to inspect any fire protection 50 51 system during and after construction to determine that such system meets the standards set forth in the laws and rules of the state and in 52 53 accordance with specific project requirements. This does not diminish 54 the capacity and duties of the local code enforcement office. 55 2. Water-based fire protection systems installed in public and private 56 properties, except one-family or two-family dwellings, in this state

1 2

3

4

shall be inspected following procedures established in the nationally recognized inspection, testing, and maintenance standard NFPA-25 as set forth in the edition adopted by the New York State Codes Council and New York State Article 19. Quarterly, annual, three-year, and five-year

5 inspections consistent with the contractual provisions with the owner 6 shall be conducted by the license holder's inspectors employed by the 7 license holder pursuant to provisions in this article. This section 8 does not prohibit governmental entities and code enforcement officials 9 in the performance of their duties from inspecting and enforcing New 10 York state adopted and referenced standards and codes.

11 3. Only the appropriate water-based fire protection license holders may open valves or flowing water in water-based fire protection systems. 12 13 Alarm contractors are prohibited from doing so. The water-based system 14 inspector shall test the fire suppression system, is responsible to flow water and may reset the alarm panel when flow and tamper indicators 15 16 report. A security or fire alarm license shall not be required to 17 perform this portion of inspection, testing, and maintenance of any fire 18 suppression system.

19 4. A building owner or building owner's authorized representative 20 shall contract with a New York state licensed contractor for the means 21 of scheduled inspection and testing before any certificate of occupancy is issued. The inspecting contractor shall provide to the building owner 22 (other than detached one- and two-family homes) a copy of the inspection 23 report established detailing applicable New York state codes require-24 25 ments and NFPA 25 standard inspection, testing, and maintenance crite-26 ria. The maintenance of water-based fire protection systems as well as 27 corrective actions on deficient systems is the responsibility of the owner of the water-based fire protection system or hydrant connected 28 29 thereto. The limit of liability of inspecting contractors shall be that of the dollar value of the inspection, testing, and maintenance 30 31 contract. The installing water-based fire protection contractor shall be 32 reposed and may not be sued for latent construction defects, those not apparent by reasonable inspection, more than ten years after substantial 33 34 completion of a project.

35 5. Inspections and testing of automatic fire sprinkler systems for detached one-family dwellings, detached two-family dwellings, and manu-36 factured housing within the scope of NFPA 13D are the responsibility of 37 38 the building owner. The building owner is responsible for requesting 39 service from a licensed New York state contractor I or IV when any deficiency exists. The NFPA-25 inspection of exposed underground piping 40 supplying a water-based fire protection system from point of private 41 42 service shall be conducted under control of a contractor I.

43 6. Maintenance of fire protection systems as well as corrective 44 actions on deficient systems is the responsibility of the owner of the 45 system or private hydrant. Notwithstanding inspection contracts with 46 conflicting language, the owner of the fire protection system or private hydrant shall indemnify and hold harmless the other party to the 47 contract, their officers and employees, from liabilities, damages, loss-48 es and costs, including, but not limited to, reasonable attorney's fees, 49 to the extent caused by the negligence, recklessness, or intentional 50 51 failure of the owner to maintain or take corrective action to maintain a fire protection system or private hydrant. 52 53 7. Two years after the effective date of this article, the department

54 <u>shall require the NICET Level II "inspection and testing of water-based</u> 55 <u>fire protection systems" or equivalent training and education as deter-</u> 56 <u>mined by the department for the RME(s) qualifying a contractor II as</u>

proof that he or she is knowledgeable in nationally accepted standards 1 2 for the inspection of water-based fire protection systems. Each contrac-3 tor II RME shall maintain NICET Level II "inspection and testing of 4 water-based fire protection systems" certification or equivalent as a 5 condition of permit renewal. б 8. No municipality or county shall require any forms or documents for 7 fire protection system inspections, testing, and maintenance beyond what 8 is in the scope of the fire code of the state of New York and document 9 NFPA 25. All forms and documentation required shall come from the build-10 ing owner or their legal representative. 11 9. Building owners or their legal representatives shall cause a copy of all fire protection system inspection forms for their properties to 12 13 be forwarded to the appropriate code enforcement office within thirty business days of completion of inspection. 14 10. Code enforcement offices shall review all fire protection 15 16 inspection, testing and maintenance forms and documents for system defi-17 ciencies that are noted, and determine time limitations of correction of 18 deficiencies noted on fire protection system inspection reports with the appropriate building owner or their legal representative. 19 20 § 910. Fees. 1. The fee for a license to engage in the business of 21 layout, installing, servicing, repairing, inspecting, testing, or maintaining of water-based fire protection systems shall be two hundred 22 dollars. For each renewal thereof, the fee shall be one hundred dollars. 23 2. The fee for issuing a duplicate certificate or license in substi-24 tution for one lost, destroyed, or mutilated shall be twenty-five 25 26 dollars. 27 3. The fee for changing a name or address shall be ten dollars. 4. The department may charge a fee for the issuance of a specialist 28 29 license, which shall not exceed one hundred and fifty dollars. 30 5. Any journeyperson or apprentice license issued pursuant to this 31 article shall be valid for a period of two years. A licensee may renew 32 his/her license upon the payment of a fifty dollar renewal fee. Each 33 renewal license shall be valid for a two-year period. 6. The fees set forth herein shall be for registrations, certificates, 34 35 and licenses issued for the period of two years or for a fraction of such period. 36 § 911. Suspension and revocation of licenses. 1. A license to engage 37 38 in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining of water-based fire protection systems may be 39 suspended or revoked, or in lieu thereof a fine not exceeding one thou-40 41 sand dollars per violation payable to the department may be imposed or a 42 reprimand issued by the department or board, for any one or more of the 43 following causes: (a) fraud or bribery in securing a license; 44 45 (b) the making of any false statement as to a material matter in any 46 application or other statement or certificate required by or pursuant to 47 this article; 48 (c) incompetence; 49 (d) failure to display the license as provided in this article; (e) violation of any provision of this article, or of any rule or 50 51 regulation adopted hereunder; (f) conviction of a felony involving fraud, theft, perjury or bribery 52 53 or other cause which would permit disgualifications from receiving a

18

54 <u>license upon the original application;</u>

1	(g) failure to supervise as defined in this article the installation
2	of the fire protection system covered by the building permit signed by
3	the RME;
4	(h) (i) a violation of any provision of this article or of any rule
5	adopted and promulgated pursuant to this article or (ii) the failure or
6	refusal to comply with any notice or order to correct a violation or any
7	cease and desist order by any RME or business holding a license is cause
8	for denial, non-renewal, revocation, or suspension of a person acting as
9	an RME qualifier for a license or license by the department after such
10	officer has determined quilt of such violation;
11	(i) improper layout, installing, servicing, repairing, inspecting,
12	testing, or maintaining a water-based fire protection system or private
13	underground water supply main connecting to the system;
14^{13}	(j) rendering inoperative a water-based fire protection system except
15	during such time as the system is being inspected, tested, serviced,
16	repaired, or maintained, or except pursuant to a court order;
17	(k) while holding a certificate or license, (i) allow another person
18	to use the certificate or license number, or (ii) use a certificate or
19	license number other than the valid certificate or license number; and
20	(1) fail to provide proof of insurance to the department or fail to
21	maintain in force the insurance coverage required by this article.
22	2. An order of suspension shall state the period of time of such
23	suspension, which period may not be in excess of two years from the date
24	of such order. Such orders shall affect suspension or revocation of an
25	RME qualifier or licenses then held by the business entity and during
26	such period of time no license shall be issued to such business entity.
27	During the suspension or revocation of any license, the former holder
28	shall not engage in or attempt or profess to engage in any transaction
29	or business for which a license is required under this chapter or
30	directly or indirectly own, control, or be employed in any manner by any
31	firm, business, or corporation for which a license under this chapter is
32	required. If, during the period between the beginning of proceedings and
33	the entry of an order of suspension or revocation by the department, a
34	new license has been issued to the business entity so charged, the order
35	of suspension or revocation shall operate to suspend or revoke such new
36	license held by such business entity.
37	3. The department shall not, so long as the revocation or suspension
38	remains in effect, grant any new license for the establishment of any
39	new firm, business, or corporation of any person, business partnership,
40	or qualifier that has or will have the same or similar management,
41	ownership, control, employees, or license holders, or will use a same or
42	similar name as a previously revoked or suspended firm, business, corpo-
43	ration, person, or qualifier. In addition, the department shall not
44	issue a new license if it finds that the circumstances for which the
45	license was previously revoked or suspended still exist or are likely to
46	recur.
47	4. Whenever the license to engage in the business of layout, install-
48	ing, inspecting, servicing, testing, repairing, or maintaining of
49	water-based fire protection systems is revoked, such license shall not
50	be reinstated or reissued until after the expiration of a period of five
51	years from the date of such revocation.
52	5. The filing of a petition in bankruptcy, either voluntary or invol-
53	untary, or the making of a composition of creditors or the appointment
54	of a receiver for the business entity's license may be considered by the
EE	dementment of furt source for suspension of a lisense

55 department as just cause for suspension of a license.

20

1 <u>The lapse or suspension of a license by operation of law or by</u> 6. order of the department or a court or its voluntary surrender by a 2 3 license holder does not deprive the department to investigate or act in 4 disciplinary proceedings against the license holder. 5 7. Application for a license following a revocation of a previous б license in any category for a water-based fire protection contractor 7 shall follow all procedures for obtaining a new license. 8 § 912. Hearing on charges; decision. No certificate or license shall 9 be suspended or revoked nor shall any fine or reprimand be imposed until 10 after a hearing had before an officer or employee of the department, designated for such purpose by the department, upon notice to the 11 certificate or license holder of at least ten days. The department 12 shall consider the recommendations of the board. The notice shall be 13 14 served either personally or by registered mail and shall state the date and place of hearing and set forth the ground or grounds constituting 15 16 the charges against the certificate or license holder. The certificate 17 or license holder shall have the opportunity to be heard in his defense either in person or by counsel and may produce witnesses and testify in 18 19 his behalf. A stenographic record of the hearing shall be taken and preserved. The hearing may be adjourned from time to time. The person 20 21 conducting the hearing shall make a written report of his findings and a recommendation to the department for decision. The department shall 22 review such findings and the recommendation and, after due deliberation, 23 shall issue an order accepting, modifying or rejecting such recommenda-24 25 tion and dismissing the charges or suspending or revoking the certif-26 icate or license or in lieu thereof imposing a fine or reprimand upon 27 the certificate or license holder. For the purpose of this article, the department or any officer or employee of the department designated by 28 29 the secretary of state, may administer oaths, take testimony, subpoena 30 witnesses and compel the production of books, papers, records, photo-31 graphs, and documents deemed pertinent to the subject of investigation. 32 § 913. Judicial review. The action of the department in suspending, 33 revoking or refusing to issue or renew a certificate or license, or imposing a fine or reprimand on the holder thereof may be reviewed by a 34 proceeding brought under and pursuant to article seventy-eight of the 35 36 civil practice law and rules. 37 § 914. Violations and penalties. Any person or business entity who 38 shall directly or indirectly engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-39 based fire protection systems or hold oneself out to the public as being 40 able so to do without a license therefor, or who shall violate any of 41 42 the provisions of this article, or having had a license suspended or 43 revoked, shall continue to engage in the business of layout, installing, servicing, repairing, inspecting, testing, or maintaining water-based 44 45 fire protection systems or who, without a license to engage in the busi-46 ness of layout, installing, servicing, repairing, inspecting, testing, 47 or maintaining water-based fire protection systems, directly or indirectly employs, permits or authorizes an uncertified person to engage in 48 the business of layout, installing, servicing, repairing, inspecting, 49 testing, or maintaining water-based fire protection systems, shall be 50 51 guilty of a misdemeanor and, upon conviction, shall be punishable by 52 imprisonment of not more than six months, or by a fine of not more than 53 one thousand dollars or by both such fine and imprisonment upon the 54 first conviction and by imprisonment of not more than one year or by a 55 fine of not less than one thousand dollars nor more than five thousand 56 dollars or by both such fine and imprisonment upon a subsequent

1	conviction. Each violation of this article shall be deemed a separate
2	offense.
3	§ 915. Official acts used as evidence. The official acts of the secre-
4	tary of state and the department shall be prima facie evidence of the
5	facts therein and shall be entitled to be received in evidence in all
6	actions at law and other legal proceedings in any court or before any
7	<u>board, body or officer.</u>
8	§ 916. Disposition of fees. Fees collected pursuant to this article
9	shall be paid into an appropriate account for the department pursuant to
10	the state finance law, for administration of this article. All remaining
11	moneys derived from the operation of this article shall on or before the
12	tenth day of each month be paid into the general fund of the state trea-
13	sury to the credit of the state purposes account therein.
14	§ 917. Severability. If any part or provision of this article or the
15	application thereof to any person or circumstance be adjudged invalid by
16	any court of competent jurisdiction, such judgment shall be confined in
17	its operation to the part, provision or application directly involved in
18	the controversy in which such judgment shall have been rendered and
19	shall not affect or impair the validity of the remainder of this article
20	or the application thereof to other persons or circumstances and the
21	legislature hereby declares that it would have enacted this article or
22 23	the remainder thereof had the invalidity of such provision or applica-
23 24	tion thereof been apparent. § 918. Applicability. 1. This article shall not apply to water-based
25	fire suppression work in New York city or Nassau county. Any munici-
26	pality or local governmental agency located in New York city or Nassau
27	county may require other licenses or evidence of a person's competence
28	to layout, install, repair, inspect, test, or maintain all types of
29	water-based fire protection systems and components. Nothing in this
30	section shall be construed to imply a holder of a New York city or
31	Nassau county license or licenses as having any standing outside the
32	boundaries of New York city or Nassau county.
33	2. This article shall not apply to:
34	(a) a person who performs water-based fire suppression work with
35	respect to any one- or two- family dwelling owned or leased by that
36	person; or
37	(b) a person who, while employed by a public utility or its affiliate,
38	performs water-based fire suppression work in connection with the
39	furnishing of public utility service; or
40	(c) any work covered by any national, state or municipal electrical
41	code including but not limited to pull stations, strobes, heat detec-
42	tors, smoke detectors, fire alarms or bells, and any electrical wiring
43	including conduit connected to raceway control cabinets.
44	3. The provisions of this article shall govern notwithstanding any
45	other law to the contrary; provided, however, that local law shall
46	govern with respect to inspection of water-based fire protection systems
47 40	by a code enforcement official under such local law and local laws to the contrary shall not diminish the level established by the provisions
48 49	of the currently adopted edition of NFPA 25, the New York State Fire
49 50	Prevention and Building Code, which shall be considered a statewide
51	minimum level of inspection criteria for water-based fire protection
52	systems, or more restrictive local standards; and provided, further,
53	that this article shall not be held to invalidate any provision of the
54	laws of this state or any subdivision thereof unless there is a direct
55	conflict between the provision of this article and the provision of such
56	law or unless such law is duplicative of this article, in which case

this article shall prevail. No local law shall require any fee, license 1 certificate for the layout, installing, servicing, repairing, 2 or 3 inspecting, testing, or maintaining of water-based fire protection 4 systems, except when the fire sprinkler company is located within a 5 political jurisdiction who then may apply business licensure criteria б consistent with fees imposed on other businesses. 7 4. Nothing in this act limits the power of a municipality or county to 8 regulate the quality and character of work performed by contractors 9 through a system of permits, fees, and inspections which are designed to 10 secure compliance with, and aid in the implementation of, state and 11 local building laws or to enforce other local laws for the protection of the public health and safety. However, business certificates shall not 12 13 be required unless the company operates offices or facilities within the 14 jurisdiction. 5. Nothing in this act limits the power of a municipality or county to 15 16 adopt any system of permits requiring submission to and approval by the 17 municipality or county of plans and specifications for work to be performed by contractors before commencement of the work, except that no 18 municipality or county shall require a water-based fire protection 19 20 system contractor's shop drawings to be sealed by a professional engi-21 neer. 22 6. Any elected or appointed official authorized to issue building or 23 fire protection or other related permits shall ascertain that the applicant contractor is duly certified before issuing the permit. The 24 evidence shall consist only of the exhibition to him or her of evidence 25 26 of the current water-based fire protection license. If the fire 27 protection contractor is not known at the time of permit request by a general contractor or other party applying for permit, the required 28 information above shall be supplied before any above ground fire 29 30 protection work commences. Any permits at state or local levels for the 31 layout, installing, servicing, repairing, inspecting, testing, or maintaining or repair of a water-based fire protection system may only be 32 33 issued to a licensed water-based fire protection contractor of the 34 appropriate classification to conduct the work. 35 § 919. Contractual agreements. 1. Any portion of any agreement or 36 contract for or in connection with, or any guarantee of or in connection 37 with any layout, installing, servicing, repairing, inspecting, testing, 38 maintaining, or demolition of a water-based fire protection system 39 between an owner of real property or general contractor and the waterbased fire protection system contractor wherein any party referred to 40 41 herein promises to indemnify or hold harmless the other party to the 42 agreement, contract, or guarantee for liability for damages to persons 43 or property caused in part by any act, omission, or default of the indemnitee arising from the contract or its performance, shall be void 44 45 and unenforceable unless the contract contains a monetary limitation on 46 the extent of the indemnification that bears a reasonable commercial 47 relationship to the contract and is part of the project specifications or bid documents, if any. Notwithstanding the foregoing, the monetary 48 49 limitation on the extent of the indemnification provided to the owner of real property by any party in privities of contract with such owner 50 51 shall not be less than one million dollars per occurrence, unless otherwise agreed by the parties. Indemnification provisions in any such 52 53 agreements, contracts, or guarantees may not require that the indemnitor 54 indemnify the indemnitee for damages to persons or property caused by 55 the sole negligence of another party, or in whole or in part by any act, 56 omission, or default of a party other than:

1	(a) the indemnitors
1	(a) the indemnitor;
2	(b) any of the indemnitor's contractors, subcontractors, sub-subcon-
3	tractors, materialspersons, or agents of any tier or their respective
4	employees; or
5	(c) the indemnitee or its officers, directors, agents, or employees.
6	However, such indemnification shall not include claims of, or damages
7	resulting from, gross negligence, or willful, wanton or intentional
8	misconduct of the indemnitee or its officers, directors, agents or
9	employees, or for statutory violation or punitive damages except and to
10	the extent the statutory violation or punitive damages are caused by or
11	result from the acts or omissions of the indemnitor or any of the
12	indemnitor's contractors, subcontractors, sub-subcontractors, material-
13	spersons, or agents of any tier or their respective employees.
14	2. A construction contract for a public agency or in connection with a
15	public agency's project may not require one party to indemnify, defend,
16	or hold harmless the other party, its employees, officers, directors, or
17	agents from any liability, damage, loss, claim, action, or proceeding,
18	and any such contract provision is void as against public policy of this
19	<u>state.</u>
20	3. This section shall not apply to any contracts, agreements, or guar-
21	antees entered into before the effective date of this section but
22	affects renewals thereof when such renewal takes place after the effec-
23	tive date of this section.
24	4. Water-based fire protection contractors shall be granted sufficient
25	time to inspect any perceived construction defect in a building that
26	they may disprove or accept as in their purview before any legal actions
27	or suits are brought forth. If a contractor takes responsibility for the
28	defect, reasonable time shall be allowed for the contractor or its
29	representative or representatives to correct without fear of any legal
30	actions or suit. A water-based fire protection contractor shall not be
31	held liable for economic damages caused by others.
32	5. The owner has an obligation to install fire protection systems in
33	compliance with adopted fire protection system standards.
34	§ 2. The general business law is amended by adding a new section 905
35	to read as follows:
36	§ 905. Licensing and certification requirements for existing contrac-
37	tor. An existing contractor shall be entitled to a license under this
38	article if such contractor shall present to the department: 1. satisfac-
39	tory evidence that the business has been actively engaged in the proper
40	class of contracting in the scope of the license applied for in layout,
40 41	installing, servicing, repairing, inspecting, testing, or maintaining of
42	water-based fire protection systems as a contractor I, contractor II, or
43	contractor III within the state for at least five years within the peri-
44	od of six years immediately prior to the effective date of this article;
45	or
46	2. proof of proper insurance as a water-based fire protection contrac-
47	tor within the state and proof of five years insurance immediate to
48	application as a water-based fire protection contractor. Proof of five
49	years insurance shall include the latest NCCI Rating Sheet for workers'
50	compensation showing the appropriate code for fire sprinkler fitters. No
51	license issued pursuant to the provisions of this section shall be
52	renewed.
53	
54	§ 3. This act shall take effect on the first of January next succeed- ing the date upon which it shall have become a law; provided, however,

55 that:

1 a. section 905 of the general business law as added by section one of 2 this act shall expire and be deemed repealed one year after the effec-3 tive date of this act, when upon such date, the provisions of section 4 two of this act shall take effect; and

5 b. section 905 of the general business law as added by section two of 6 this act shall expire and be deemed repealed two years after the effec-7 tive date of this act.
