25 a percentage of annual wages in accordance with the preceding schedule
26 based upon a projection of annual wages provided by the employer.

27 § 2. This act shall take effect immediately.

FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

PROVISIONS OF PROPOSED LEGISLATION: This proposed legislation would
amend paragraph 2 of subdivision a of Section 613 of the Retirement and
Social Security Law (RSSL) to modify the member contribution rate on a
prospective basis for Tier 6 Transit Authority members who participate
in the Transit 25-Year/Age 55 Retirement Plan from the current graded
schedule of 3% to 6% based on the members' wages to a flat 2% of wages.

The Effective Date of the proposed legislation would be the date of
enactment.

FINANCIAL IMPACT - ACTUARIAL PRESENT VALUES: Based on the actuarial
assumptions and methods herein, the enactment of this proposed legis-
lation would decrease the Actuarial Present Value of Benefits (APVB) for
NYCERS by approximately \$13.5 million (as a result of a reduction in the
amount of refunds of member contributions upon termination of employ-
ment) and decrease the Actuarial Present Value of member contributions
by approximately \$255.4 million as of June 30, 2016.

Under the Entry Age Actuarial Cost Method (EAACM) used to determine
employer contributions to NYCERS, there would be an increase in the
Actuarial Present Value of Future Employer Normal Cost of \$228.3 million
and an increase in the Unfunded Actuarial Accrued Liability (UAAL) of
approximately \$13.6 million.

FINANCIAL IMPACT - ANNUAL EMPLOYER CONTRIBUTIONS: In accordance with
Section 13.638.2(k-2) of the Administrative Code of the City of New York
(ACNY), new UAAL attributable to benefit changes are to be amortized as
determined by the Actuary but generally over the remaining working life-
time of those impacted by the benefit changes, which has been estimated
to be approximately 17.9 years. Recognizing that this period will
decrease over time as the group of Tier VI Members matures, the Actuary

would likely choose to amortize the new UAAL attributable to this proposed legislation over a 15-year period.

With respect to NYCERS, based on the Actuary's actuarial assumptions and methods used in the Preliminary June 30, 2016 valuations of the NYCERS and those described later in this Fiscal Note, the enactment of this proposed legislation would increase annual employer contributions by approximately \$28.1 million per year.

This increase in employer contributions has been estimated assuming that the increase in UAAL would be financed over a 15-year period (14 payments under One-Year Lag Methodology) using level dollar payments.

If enacted into law during the 2017 Legislative Session, increased employer costs would be determined for Fiscal Year 2018.

CENSUS DATA: Estimates of increases in APVB, employer costs and employer contributions are based on the active census data used for the Preliminary June 30, 2016 actuarial valuations of NYCERS, including 7,684 Tier 6 25/55 NYCTA members with salaries of approximately \$507.2 million.

ACTUARIAL ASSUMPTIONS AND METHODS: Additional APVB, UAAL and employer costs presented herein have been calculated based on the Actuary's actuarial assumptions and methods in effect for the Preliminary June 30, 2016 (Lag) actuarial valuations used to determine the Preliminary Fiscal Year 2018 employer contributions of NYCERS.

STATEMENT OF ACTUARIAL OPINION: I. Sherry S. Chan, am the Chief Actuary for, and independent of, the New York City Pension Funds and Retirement Systems. I Am a Fellow of the Society of Actuaries, a Fellow of the Conference of Consulting Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

FISCAL NOTE IDENTIFICATION: This Fiscal Note 2017-16 Dated May 12, 2017, was prepared by the Chief Actuary for the New York City Employees' Retirement System. This estimate is intended for use only during the 2017 Legislative Session.
