

# STATE OF NEW YORK

---

35

2017-2018 Regular Sessions

## IN SENATE

(Prefiled)

January 4, 2017

---

Introduced by Sen. HOYLMAN -- read twice and ordered printed, and when printed to be committed to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to global warming pollution control

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative findings. Global warming and the resulting  
2 extreme weather events pose a serious threat to the economic well-being,  
3 public health, natural resources and environment of New York.

4 Extreme weather events have become increasingly common, with Super-  
5 storm Sandy, and hurricanes Lee and Irene providing the most recent  
6 examples. The potential adverse impacts of global warming include the  
7 exacerbation of air quality problems, a reduction in the quality and  
8 supply of fresh water to the state, a rise in sea levels resulting in  
9 the displacement of coastal businesses, residents and infrastructure,  
10 damage to marine ecosystems and the natural environment, and an increase  
11 in the incidences of infectious diseases, asthma, and other human  
12 health-related problems. Global warming will have detrimental effects  
13 on some of New York's largest industries, including agriculture, fores-  
14 try, tourism, skiing, and recreational and commercial fishing.

15 The Intergovernmental Panel on Climate Change, which received the  
16 Nobel Peace Prize, determined that burning coal, oil and gas has led to  
17 higher temperatures that are already impacting physical and biological  
18 systems. The panel also projected temperatures would rise more rapidly  
19 if greenhouse gases are not abated. The panel concluded that reducing  
20 emissions 80 percent below current emissions by mid-century would  
21 prevent the worst impacts of global warming.

22 Action taken by New York and other states to reduce emissions of  
23 greenhouse gases will have far-reaching effects by encouraging the  
24 federal government, and other countries to act including encouraging the

[-] is old law to be omitted.

LBD04378-01-7

development of sustainable, non-polluting technologies such as solar, wind, geothermal and ocean currents.

§ 2. Article 19 of the environmental conservation law is amended by adding a new title 13 to read as follows:

TITLE 13

GLOBAL WARMING POLLUTION CONTROL

Section 19-1301. Definitions.

19-1303. Greenhouse gas reporting.

19-1305. Greenhouse gas limits.

§ 19-1301. Definitions.

When used in this title:

1. "Greenhouse gas" means carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, sulfur hexafluoride, and any other gas determined by the department to be a significant contributor to global warming.

2. "Major greenhouse gas emission source" means any source or category of sources of greenhouse gas emissions, determined by the department to be capable of being monitored for compliance, and shall at a minimum include emissions:

(a) associated with fossil fuels used in the state by entities that are manufacturers, producers and/or distributors of fossil fuels, including, but not limited to, oil refineries, oil storage facilities, and natural gas pipelines;

(b) from any utility generating or delivering electricity consumed in the state, whether the electricity is generated in the state, or generated outside the state and imported into the state, and accounting for transmission and distribution line losses;

(c) stationary sources permitted pursuant to section 19-0311 of this article; and

(d) from any additional entities that are emitters of greenhouse gases, as determined by the department.

§ 19-1303. Greenhouse gas reporting.

1. No later than May 1, 2018, the department shall promulgate rules and regulations requiring annual greenhouse gas emissions reporting from major greenhouse gas emission sources. The regulations shall:

(a) include greenhouse gas emissions from all major greenhouse gas emission sources expressed in tons of carbon dioxide equivalents;

(b) ensure rigorous and consistent accounting of emissions, and provide reporting tools and formats to ensure collection of necessary data; and

(c) ensure that each major greenhouse gas emission source maintains comprehensive emissions records of any greenhouse gas reported for at least five years.

2. The department shall:

(a) periodically review and update its emission reporting requirements at least every five years; and

(b) make reasonable efforts to make its reporting regulations consistent with international, federal and other states' greenhouse gas emission reporting programs.

(c) provide compliance assistance to small businesses pursuant to the provisions of sections 19-0313 and 19-0315 of this article.

3. No later than January 1, 2021, and every three years thereafter, the department shall issue a report on:

(a) the annual greenhouse gas emissions from all major greenhouse gas emission sources, including the relative contribution of each major

1 greenhouse gas emission source to statewide greenhouse gas emissions;  
2 and

3 (b) the progress made by the department in achieving the requirements  
4 of section 19-1305 of this title.  
5 § 19-1305. Greenhouse gas limits.

6 1. No later than January 1, 2019, the department, after a public hear-  
7 ing, and consultation with representatives of business interests, commu-  
8 nity organizations, environmental groups, municipal corporations and  
9 other stakeholders, shall promulgate rules and regulations setting an  
10 enforceable limit on the aggregate level of greenhouse gas emissions  
11 from all greenhouse gas emission sources provided, however, the aggre-  
12 gate limit shall not be greater than the aggregate level of greenhouse  
13 gas emissions for calendar year 1990.

14 2. (a) On January 1, 2022 the limit established in subdivision one of  
15 this section shall be reduced by 20 percent.

16 (b) On January 1, 2027 the limit established in subdivision one of  
17 this section shall be reduced by 30 percent.

18 (c) On January 1, 2032 the limit established in subdivision one of  
19 this section shall be reduced by 40 percent.

20 (d) On January 1, 2037 the limit established in subdivision one of  
21 this section shall be reduced by 50 percent.

22 (e) On January 1, 2042 the limit established in subdivision one of  
23 this section shall be reduced by 60 percent.

24 (f) On January 1, 2047 the limit established in subdivision one of  
25 this section shall be reduced by 70 percent.

26 (g) On January 1, 2052, and each year thereafter, the limit shall  
27 remain at 80 percent below the limit established in subdivision one of  
28 this section.

29 3. Any rule or regulation the commissioner adopts to comply with this  
30 section must:

31 (a) initially focus upon ensuring state facility compliance;

32 (b) not place or increase an additional environmental or health burden  
33 on a community that has a significant level of regulated air contam-  
34 inant source emissions within the community as compared with the county  
35 average;

36 (c) be compatible with other emissions reductions programs; and

37 (d) include a plan to the extent practicable to address adaptation to  
38 climate change including but not limited to terrestrial and aquatic  
39 habitats, plants and animal species, connectivity of habitats, and  
40 ecosystem services provided by natural resources including but not  
41 limited to flood control and drinking water supply.

42 § 3. This act shall take effect immediately.
