SENATE RESOLUTION in response to the 2019-2020 Executive Budget submission (Legislative Bills S1500B, S1501, S1503B, S1504B, S1505B, S1506B, S1507B, S1508B, S1509B, and S1510B) to be adopted as legislation expressing the position of the New York State Senate relating to the 2019-2020 New York State Budget

WHEREAS, It is the intent of the Legislature to effectuate the timely passage of a State Budget; and

WHEREAS, It is the intent of the Legislature to engage in the Budget Conference Committee process, which promotes increased participation by the members of the Legislature and the public; and

WHEREAS, The Senate Finance Committee has conducted an extensive study and review of the Governor's 2019-2020 Executive Budget submission and has recommended proposed amendments to such Budget submission in the above referenced Legislative Bills and Report on the Executive Budget; and

WHEREAS, Article VII of the New York State Constitution provides the framework under which the New York State Budget is submitted, amended and enacted. The New York State Courts have limited the Legislature in how it may change the appropriations bills submitted by the Governor. The Legislature can delete or reduce items of appropriation contained in the several appropriation bills submitted by the Governor in conjunction with the Executive Budget, and it can add additional items of appropriation to those bills provided that such additions are stated separately and distinctly from the original items of the bill and refer each to a single object or purpose; and

WHEREAS, An extensive study and review of the Governor's 2019-2020 Executive Budget submission has revealed that the construction of the budget bills submitted to the Legislature by the Governor constrains the Legislature in its ability to fully effectuate its intent in amending the Governor's budget submission; and

WHEREAS, The Legislature has amended the Governor's 2019-2020 Executive Budget submission to the fullest extent possible within the authority provided to it pursuant to Section 4 of Article VII of the New York State Constitution; and

WHEREAS, The Senate, in addition to the Governor's 2019-2020 Executive Budget submission bills as amended by the Senate in the above referenced legislative bills, does hereby provide its recommendations as to provisions in the Governor's 2019-2020 Executive Budget submission which reflect those items the Senate is constrained from effectuating as amendments to the 2019-2020 Executive Budget appended hereto; and

WHEREAS, It is the intent of the Legislature that upon the passage of the Governor's 2019- 2020 Executive Budget submission as amended by the Senate, and the incorporated Report on the Amended Executive Budget may provide a basis for both houses of the Legislature to convene Committees on Conference pursuant to Joint Rule III of the Senate and Assembly for the purpose of reconciling any differences between the amendments to the Governor's budget as proposed by each house of the Legislature; now, therefore, be it

RESOLVED, That, the above referenced legislative bills

(Legislative Bills S1500B, S1501, S1503B, S1504B, S1505B, S1506B, S1507B, S1508B, S1509B, and S1510B) be and are incorporated as part of this resolution and are hereby adopted as the New York State Legislature's budget proposal for the 2019-2020 New York State Budget.

REPORT ON THE AMENDED EXECUTIVE BUDGET

ALL STATE AGENCIES AND OPERATIONS

The Senate denies with prejudice the following new language contained within the body of various appropriations:

- Language included in S.1503-A (Aid to Localities) authorizing the Budget Director to uniformly reduce certain Local Assistance appropriations and disbursements by up to 3 percent to maintain a balanced budget if projected tax receipts for SFY 2019-20 are reduced by more than \$500 million from the Executive Budget projection.
- Numerous State Operations appropriations (S.1500-A) that provide the Executive broad authority to shift resources among departments, agencies or public authorities. While existing State Finance Law authorizes some transfer, interchange and suballocation authority, the new proposal would significantly expand such flexibility to restructure the Budget after enactment, potentially moving resources from one area to completely different programs or purposes. Any transfer of funds from State agencies to public authorities could reduce oversight and control of such resources.
- Language that would link State Operations and Aid to Localities budgets for multiple purposes to the Legislature's enactment of the Aid to Localities bill in an amount deemed sufficient by the Director of Budget.
- Language that would propose a new process by which the Executive would examine any bills passed after the enactment of the State Budget, which impact state financial plan assumptions. This language would divert from the Executive's responsibility to approve or veto legislation and give additional powers to the Director of the Budget.
- Language that would make funding for State Operations and Capital Projects budgets contingent on the enactment of separate Article VII legislation as outlined by the Executive.

While the Senate understands the Governor's responsibility to ensure New York's budget is fiscally sound, it is equally important to ensure the constitutional limits on the Executive's powers are not exceeded. Failure to ensure reasonable limits on Executive authority would signal an irreversible abrogation of our constitutionally guaranteed legislative responsibility.

- Elimination of language preventing reimbursement payments for any expenditure submitted more than twelve months after the expenditure is incurred by a county or provider of defense services.
- The Senate has concerns regarding the use of fees included in part DD of the public protection and general government article VII to pay for the increased funding for public defense services because of the impact that the increase in the biennial registration fee for attorneys will have on public interest lawyers and because the increase in the criminal history search fee could increase the likelihood that background check companies will use less accurate information sources which will negatively impact the very individuals this funding is intended to assist. The Senate believe the Governor should identify other sources to support these needed services.
- The Senate supports increasing the hourly compensation of assigned counsel under Article 18-B of the County Law. These attorneys, who represent children and parents in family matters as well as indigent criminal defendants, have not received an increase in compensation for over a decade. These attorneys are essential to providing access to justice for those who cannot afford representation. Comparable compensation in the federal courts has risen to \$140 per hour while attorneys in our state courts receive \$60 per hour for misdemeanor cases and \$75 per hour for other cases. The Senate believes that the Executive should commit state funds to support the increase in the assigned counsel rate under Article 18-B of the County Law.

The Senate and the Assembly have already passed a number of the proposals contained in the Executive's "Good Government & Ethics Reform" budget bill and remains committed to advancing additional reforms in these critical areas. The Senate believes many of these proposals require robust discussion, thoughtful consideration, and should be addressed outside of the budget in order to maximize public input and consideration.

Article VII Proposal (S.1510-B)

- PART E -- The Senate rejects the Executive proposal to consolidate primary elections, as both houses have already passed, and the governor has signed, legislation to enact this proposal.
- PART F -- The Senate omits the Executive proposal banning contributions to campaigns for corporations and LLCs at this time. Both houses have already passed, and the Governor has signed, legislation closing the "LLC" loophole which requires LLCs to be subject to the same contribution limits for corporations. The Senate will further review similar legislation which would ban corporate and LLC contributions, outside of the budget process.
- PART G -- The Senate rejects the Executive proposal to enact a system of Automatic Voter Registration. The Senate supports the concept of AVR and seeks to enact such a measure outside of the budget to further reform and modernize voter registration in the state.
- PART H -- The Senate rejects the Executive proposal that mandates employers give their employees three hours of paid time off to vote in all elections, since the proposal only grants employees one more hour of paid time off to vote than current law. - PART I -- The Senate accepts the executive proposal to make all primary voting hours uniform in the state.

- PART O -- The Senate rejects the Executive proposal to add new disclosure requirements on lobbyists.
- PART P -- The Senate omits the Executive proposal to ban political consultants from lobbying elected officials and emphasizes further consideration of the recommendations made by good government groups on this issue.
- PART Q -- The Senate rejects the Executive proposal that requires any 501(c)(3) corporation or entity to report to JCOPE the name and address of any individual, corporation, association or group that makes any monetary or in-kind donation in excess of \$2,500. The Senate is supportive of legislation that introduces greater transparency to our elections that is not unduly burdensome on communities seeking to make their voice heard.
- PART R -- The Senate rejects the Executive proposal to lower the lobbyist disclosure threshold to include certain advocacy organizations. Enactment of this proposal would have an adverse effect on grassroots advocacy which the Senate believes may stymie their speech.
- PART S -- The Senate rejects the Executive proposal to increase lobbyist penalties. While enhancing penalties may be justified in certain circumstances, the Senate believes additional consideration and thought must be given to this proposal.
- PART T -- The Senate rejects the Executive proposal to increase the post-employment lobby ban from two years to five years for legislative staff and members because banning former state officers, employees, legislators and legislative employees from registering as a lobbyist at all does not advance ethics.
- PART U -- The Senate rejects the Executive proposal that prohibits any employee of a statewide officeholder, state senator, or member of the assembly from volunteering for the campaign of that elected officeholder. The Senate believes such a proposal is overburdensome and a potential infringement on constitutionally protected speech.
- PART V -- The Senate accepts the Executive recommendation to require certain local elected officials to submit their financial disclosure forms to JCOPE for review and approval.
- PART W -- The Senate rejects the Executive proposal to establish a Lobbyist Code of Conduct, to be promulgated and enforced by JCOPE because it is too vague, general and contains no definitions.

seeks to enact such a measure.

The Senate believes prevailing wage should be paid to building service workers in these situations. However the Senate acknowledges similar legitimate concerns by various stakeholders as in the case of Part FF of the Education, Labor and Family Assistance

bill and supports all stakeholders on the building service worker wage component coming together to negotiate a mutually agreeable outcome.
