

STATE OF NEW YORK

1609

2019-2020 Regular Sessions

IN SENATE

January 15, 2019

Introduced by Sen. PARKER -- read twice and ordered printed, and when printed to be committed to the Committee on Energy and Telecommunications

AN ACT to authorize and direct the department of public service to study and report on the current status of cable television systems operating and providing services to the customer premises over fiberoptic cables

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative findings. The legislature hereby declares that
2 the public interest is furthered by the broadest possible deployment of
3 consumer-available high-speed internet service at reasonable prices, to
4 the largest number of New York households and businesses as is practica-
5 ble. Due to the ubiquity of such service provided by cable television
6 companies, and such companies' provision of high-speed internet to the
7 home and workplace, and the greater speeds demonstrated around the rest
8 of the world by systems providing high-speed internet by fiberoptic
9 cable to the premises, the legislature finds that it has a compelling
10 interest in closer oversight of the cable television systems, whether
11 completed or under construction, that provide such services and allow
12 the citizens of the state of New York to access government or other
13 services from home or otherwise remotely.

14 § 2. Study. a. The department of public service shall, within thirty
15 days of the effective date of this act, undertake a study, pursuant to
16 its duty under subdivision 11 of section 215 of the public service law,
17 of the current status of cable television systems operating and provid-
18 ing services to the customer premises over fiberoptic cables. This study
19 shall include:

20 (i) the total number of franchises such companies have or operate
21 where service is provided to the customer premises over fiberoptic
22 cable;

EXPLANATION--Matter in italics (underscored) is new; matter in brackets
[-] is old law to be omitted.

LBD07222-01-9

1 (ii) the complete list of municipalities of franchises such companies
2 have or operate where service is provided to the customer premises over
3 fiberoptic cable;

4 (iii) a demographic analysis of the racial, ethnic and income charac-
5 teristics of the residents of each municipality by franchise such compa-
6 nies have or operate where service is provided to the customer premises
7 over fiberoptic cable based on the results of the most recent decennial
8 census conducted by the census bureau of the United States;

9 (iv) a demographic analysis of the racial, ethnic and income charac-
10 teristics of the residents of each municipality where such companies do
11 not have or do not operate a franchise where service is provided to the
12 customer premises over fiberoptic cable based on the results of the most
13 recent decennial census conducted by the census bureau of the United
14 States; and

15 (v) a further breakdown by county, where applicable, and region of the
16 state of New York as defined by the empire state development corporation
17 of the demographic analysis of the racial, ethnic and income character-
18 istics of the residents of both the municipalities with which such
19 companies have or operate a franchise where service is provided to the
20 customer premises over fiberoptic cable and the municipalities with
21 which such companies do not have or do not operate a franchise where
22 service is provided to the customer premises over fiberoptic cable.

23 b. In furtherance of such study, the department of public service
24 shall require cable television companies operating or constructing cable
25 television systems providing service over fiberoptic cables to the
26 customer premises, to report to the department within sixty days of the
27 effective date of this act the following:

28 (i) the total number of franchises such companies have or operate
29 where service is provided to the customer premises over fiberoptic
30 cable;

31 (ii) the percentage of completion of infrastructure construction and
32 activation in each franchise such companies have or operate;

33 (iii) an analysis of such companies' franchises, broken down by region
34 of the state, county and municipality, as applicable, showing the aver-
35 age time to completion of the infrastructure buildout of each franchise,
36 or of the current status of a franchise buildout if it is not completed;

37 (iv) an analysis of such companies' franchises, broken down by census
38 tract, showing the status of buildout of such census tracts, the average
39 time to completion of the buildout in each census tract, and including
40 data on whether any or all of such census tracts are distressed census
41 tracts, as such are defined by the census bureau of the United States,
42 and whether and how the time to completion of the buildout in any such
43 distressed census tracts differs from the time to completion of buildout
44 in non-distressed census tracts; and

45 (v) an analysis of the data provided for such report by the relevant
46 cable companies, which shows any disparate buildout completion speed or
47 franchise area coverage by race, ethnicity or income demographics.

48 c. Within ninety days of the effective date of this act, the depart-
49 ment of public service shall report the results of the study required
50 pursuant to subdivision a of this section to the public service commis-
51 sion, the governor, the temporary president of the senate, the speaker
52 of the assembly, and the chair of both the senate and assembly standing
53 committees on corporations, authorities and commissions.

54 d. Within one hundred twenty days of the effective date of this act,
55 the public service commission shall open a proceeding to inquire into
56 the progress of such cable television systems as are being built, or

1 have been built since 1996, which provide cable television and other
2 services to the customer premises over fiberoptic cable. Such proceeding
3 shall inquire into such factors the commission finds necessary and
4 prudent, including, but not limited to, whether, despite its economic
5 feasibility, the construction or operation of a franchised or certifi-
6 cated cable television system providing service over fiberoptic cable
7 to the customer premises has been unreasonably delayed, or that the
8 extension of service to any persons or areas within the territory of a
9 cable television company providing service over fiberoptic cable to the
10 customer premises has been unreasonably withheld, and whether a remedial
11 order pursuant to such commission's powers under section 224 of the
12 public service law might be required by the public interest.

13 § 3. Severability. If any provision of this act, or the application
14 thereof to any person or circumstance, shall be adjudged by any court of
15 competent jurisdiction to be invalid or unconstitutional, such judgment
16 shall not affect, impair or invalidate the remainder thereof, but shall
17 be confined in its operation to the provision of this act, or in its
18 application to the person or circumstance, directly involved in the
19 controversy in which such judgment shall have been rendered.

20 § 4. This act shall take effect immediately.
