б	district employees, vendors, and other entities with which the state and
7	school districts contract for student assessment purposes including
8	purchase and licensing costs, test development, test booklets, scoring
9	sheets and scoring costs;
10	(3) Logistical, preparation and administration costs including, but
11	not limited to, distributing and collecting assessment materials,
12	assessment directions, and storing materials;
13	(4) Cost of test preparation materials;
14	(5) Cost of data coaches;
15	(6) Cost of data analysis or dashboard systems, information technology
16	<u>maintenance, purchase, or upgrade;</u>

29	students taking all state and district assessments; time spent by school
30	administrators and teachers for administrative tasks such as distribut-

32	amount of time spent preparing students to take the assessments. Time
33	related data collected pursuant to this paragraph shall be disaggregated
34	by the following student groups: English language learners, students
35	receiving intervention or remediation services, students with disabili-
36	ties, general education students, and economically disadvantaged
37	students.
38	e. The commissioner shall submit the methodology used to calculate the
39	costs associated with student assessments to the comptroller before the

42	commissioner to determine the costs associated with student assessments.
43	The comptroller's analysis shall include a determination about the qual-
44	ity of the methodology used by the commissioner and the extent to which
45	the methodology will result in an analysis that properly accounts for
46	the actual costs incurred by school districts on student assessments and
