

# STATE OF NEW YORK

---

2878--B

2019-2020 Regular Sessions

## IN SENATE

January 30, 2019

---

Introduced by Sens. SANDERS, BIAGGI, COMRIE, MAY, PERSAUD -- read twice and ordered printed, and when printed to be committed to the Committee on Environmental Conservation -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee

AN ACT to establish a Green New Deal for New York task force; and providing for the repeal of such provisions upon expiration thereof

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

- 1 Section 1. Legislative findings and intent. 1. The legislature recog-  
2 nizes the duty of the New York state government to create a Green New  
3 Deal for New York. An October 2018 report entitled "Special Report on  
4 Global Warming of 1.5°C" by the Intergovernmental Panel on Climate  
5 Change and the November 2018 Fourth National Climate Assessment report  
6 found that:
- 7 (a) human activity is the dominant cause of observed climate change  
8 over the past century;
- 9 (b) a changing climate is causing sea levels to rise and an increase  
10 in wildfires, severe storms, droughts, and other extreme weather events  
11 that threaten human life, healthy communities, and critical infrastruc-  
12 ture;
- 13 (c) global warming at or above 2 degrees Celsius beyond preindustrial-  
14 ized levels will cause:
- 15 (i) mass migration from the regions most affected by climate change;  
16 (ii) more than \$500,000,000,000 in lost annual economic output in the  
17 United States by the year 2100;
- 18 (iii) wildfires that, by 2050, will annually burn at least twice as  
19 much forest area in the western United States than was typically burned  
20 by wildfires in the years preceding 2019;
- 21 (iv) a loss of more than 99 percent of all coral reefs on earth;

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD07108-04-9

1 (v) more than 350,000,000 more people to be exposed globally to deadly  
2 heat stress by 2050; and

3 (vi) a risk of damage to \$1,000,000,000,000 of public infrastructure  
4 and coastal real estate in the United States; and

5 (d) global temperatures must be kept below 1.5 degrees Celsius above  
6 preindustrialized levels to avoid the most severe impacts of a changing  
7 climate, which will require:

8 (i) global reductions in greenhouse gas emissions from human sources  
9 of 40 to 60 percent from 2010 levels by 2030; and

10 (ii) net-zero global emissions by 2050.

11 2. As the United States, including New York, has historically been  
12 responsible for a disproportionate amount of greenhouse gas emissions,  
13 having emitted 20 percent of global greenhouse gas emissions through  
14 2014, and has a high technological capacity, the United States and New  
15 York must take a leading role in reducing emissions through economic  
16 transformation.

17 3. The United States is currently experiencing several related crises,  
18 with:

19 (a) life expectancy declining while basic needs, such as clean air,  
20 clean water, healthy food, and adequate health care, housing, transpor-  
21 tation, and education, are inaccessible to a significant portion of the  
22 United States population;

23 (b) a 4-decade trend of wage stagnation, deindustrialization, and  
24 antilabor policies that has led to:

25 (i) hourly wages overall stagnating since the 1970's despite increased  
26 worker productivity;

27 (ii) the third-worst level of socioeconomic mobility in the developed  
28 world before the Great Recession;

29 (iii) the erosion of the earning and bargaining power of workers in  
30 the United States; and

31 (iv) inadequate resources for public sector workers to confront the  
32 challenges of climate change at local, state, and federal levels; and

33 (c) the greatest income inequality since the 1920's, with:

34 (i) the top 1 percent of earners accruing 91 percent of gains in the  
35 first few years of economic recovery after the Great Recession;

36 (ii) a large racial wealth divide amounting to a difference of 20  
37 times more wealth between the average white family and the average black  
38 family; and

39 (iii) a gender earnings gap that results in women earning approximate-  
40 ly 80 percent as much as men, at the median.

41 4. Climate change, pollution, and environmental destruction have  
42 exacerbated systemic racial, regional, social, environmental, and  
43 economic injustices (hereinafter referred to as "systemic injustices")  
44 by disproportionately affecting indigenous peoples, communities of  
45 color, migrant communities, deindustrialized communities, depopulated  
46 rural communities, the poor, low-income workers, women, the elderly, the  
47 unhoused, people with disabilities, and youth (hereinafter referred to  
48 as "frontline and vulnerable communities").

49 5. Climate change constitutes a direct threat to the national security  
50 of the United States:

51 (a) by impacting the economic, environmental, and social stability of  
52 countries and communities around the world; and

53 (b) by acting as a threat multiplier.

54 6. The federal government-led mobilizations during World War II and  
55 the New Deal created the greatest middle class that the United States  
56 has ever seen, but many members of frontline and vulnerable communities

1 were excluded from many of the economic and societal benefits of those  
2 mobilizations.

3 7. The New York state government recognizes that a new national,  
4 social, industrial, and economic mobilization on a scale not seen since  
5 World War II and the New Deal era is a historic opportunity:

6 (a) to create millions of good, high-wage jobs in New York state;

7 (b) to provide unprecedented levels of prosperity and economic securi-  
8 ty for all people of New York state; and

9 (c) to counteract systemic injustices.

10 8. Now, therefore, be it resolved that it is the sense of the New York  
11 state legislature that:

12 (a) it is the duty of the New York state government to create a Green  
13 New Deal:

14 (i) to achieve net-zero greenhouse gas emissions through a fair and  
15 just transition for all communities and workers;

16 (ii) to create millions of good, high-wage jobs and ensure prosperity  
17 and economic security for all people of New York state;

18 (iii) to invest in the infrastructure and industry of New York state  
19 to sustainably meet the challenges of the twenty-first century;

20 (iv) to secure for all people of New York state for generations to  
21 come:

22 (A) clean air and water;

23 (B) climate and community resiliency;

24 (C) healthy food;

25 (D) access to nature; and

26 (E) a sustainable environment; and

27 (v) to promote justice and equity by stopping current, preventing  
28 future, and repairing historic oppression of frontline and vulnerable  
29 communities;

30 (b) the goals described in clauses (A) through (E) of subparagraph  
31 (iv) of paragraph (a) of this subdivision (hereinafter referred to as  
32 "Green New Deal for New York goals") should be accomplished through a  
33 10-year national mobilization (hereinafter referred to as "Green New  
34 Deal mobilization") that will require the following goals and projects:

35 (i) building resiliency against climate change-related disasters, such  
36 as extreme weather, including by leveraging funding and providing  
37 investments for community-defined projects and strategies;

38 (ii) repairing and upgrading the infrastructure in New York state,  
39 including:

40 (A) by eliminating pollution and greenhouse gas emissions as much as  
41 technologically feasible;

42 (B) by guaranteeing universal access to clean water;

43 (C) by reducing the risks posed by climate impacts; and

44 (D) by ensuring that any infrastructure bill considered by New York  
45 state government addresses climate change;

46 (iii) meeting 100 percent of the power demand in New York state  
47 through clean, renewable, and zero-emission energy sources, including:

48 (A) by dramatically expanding and upgrading renewable power sources;  
49 and

50 (B) by deploying new capacity;

51 (iv) building or upgrading to energy-efficient, distributed, and  
52 "smart" power grids, and ensuring affordable access to electricity;

53 (v) upgrading all existing buildings in New York state and building  
54 new buildings to achieve maximum energy efficiency, water efficiency,  
55 safety, affordability, comfort, and durability, including through elec-  
56 trification;

(vi) spurring massive growth in clean manufacturing in New York state and removing pollution and greenhouse gas emissions from manufacturing and industry as much as is technologically feasible, including by expanding renewable energy manufacturing and investing in existing manufacturing and industry;

(vii) working collaboratively with farmers and ranchers in New York state to remove pollution and greenhouse gas emissions from the agricultural sector as much as is technologically feasible, including:

(A) by supporting family farming;

(B) by investing in sustainable farming and land use practices that increase soil health; and

(C) by building a more sustainable food system that ensures universal access to healthy food;

(viii) overhauling transportation systems in New York state to remove pollution and greenhouse gas emissions from the transportation sector as much as is technologically feasible, including through investment in:

(A) zero-emission vehicle infrastructure and manufacturing;

(B) clean, affordable, and accessible public transit; and

(C) high-speed rail;

(ix) mitigating and managing the long-term adverse health, economic, and other effects of pollution and climate change, including by providing funding for community-defined projects and strategies;

(x) removing greenhouse gases from the atmosphere and reducing pollution by restoring natural ecosystems through proven low-tech solutions that increase soil carbon storage, such as land preservation and afforestation;

(xi) restoring and protecting threatened, endangered, and fragile ecosystems through locally appropriate and science-based projects that enhance biodiversity and support climate resiliency;

(xii) cleaning up existing hazardous waste and abandoned sites, ensuring economic development and sustainability on those sites;

(xiii) identifying other emission and pollution sources and creating solutions to remove them; and

(xiv) promoting the international exchange of technology, expertise, products, funding, and services, with the aim of making New York state the international leader on climate action, and to help other countries achieve a Green New Deal;

(c) a Green New Deal for New York must be developed through transparent and inclusive consultation, collaboration, and partnership with frontline and vulnerable communities, labor unions, worker cooperatives, civil society groups, academia, and businesses; and

(d) to achieve the Green New Deal for New York goals and mobilization, a Green New Deal for New York will require the following goals and projects:

(i) providing and leveraging, in a way that ensures that the public receives appropriate ownership stakes and returns on investment, adequate capital, including through community grants, public banks, and other public financing, technical expertise, supporting policies, and other forms of assistance to communities, organizations, federal, state, and local government agencies, and businesses working on the Green New Deal for New York mobilization;

(ii) ensuring that New York state government takes into account the complete environmental and social costs and impacts of emissions through:

(A) existing laws;

(B) new policies and programs; and

(C) ensuring that frontline and vulnerable communities shall not be adversely affected;

(iii) providing resources, training, and high-quality education, including higher education, to all people of New York state, with a focus on frontline and vulnerable communities, so that all people of New York state may be full and equal participants in the Green New Deal for New York mobilization;

(iv) making public investments in the research and development of new clean and renewable energy technologies and industries;

(v) directing investments to spur economic development, deepen and diversify industry and business in local and regional economies, and build wealth and community ownership, while prioritizing high-quality job creation and economic, social, and environmental benefits in frontline and vulnerable communities, and deindustrialized communities, that may otherwise struggle with the transition away from greenhouse gas intensive industries;

(vi) ensuring the use of democratic and participatory processes that are inclusive of and led by frontline and vulnerable communities and workers to plan, implement, and administer the Green New Deal for New York mobilization at the local level;

(vii) ensuring that the Green New Deal for New York mobilization creates high-quality union jobs that pay prevailing wages, hires local workers, offers training and advancement opportunities, and guarantees wage and benefit parity for workers affected by the transition;

(viii) guaranteeing a job with a family-sustaining wage, adequate family and medical leave, paid vacations, and retirement security to all people of New York state;

(ix) strengthening and protecting the right of all workers to organize, unionize, and collectively bargain free of coercion, intimidation, and harassment;

(x) strengthening and enforcing labor, workplace health and safety, antidiscrimination, and wage and hour standards across all employers, industries, and sectors;

(xi) enacting and enforcing trade rules, procurement standards, and border adjustments with strong labor and environmental protections:

(A) to stop the transfer of jobs and pollution overseas; and

(B) to grow domestic manufacturing in New York state;

(xii) ensuring that public lands, waters, and oceans are protected and that eminent domain is not abused;

(xiii) obtaining the free, prior, and informed consent of indigenous peoples for all decisions that affect indigenous peoples and their traditional territories, honoring all treaties and agreements with indigenous peoples, and protecting and enforcing the sovereignty and land rights of indigenous peoples;

(xiv) ensuring a commercial environment where every businessperson is free from unfair competition and domination by domestic or international monopolies; and

(xv) providing all people of New York state with:

(A) high-quality health care;

(B) affordable, safe, and adequate housing;

(C) economic security; and

(D) clean water, clean air, healthy and affordable food, and access to nature.

§ 2. Green New Deal for New York task force. 1. There shall be a task force for a Green New Deal for New York which shall consist of the following nineteen voting members: three members appointed by the

1 governor, one of which shall serve as the chair of the task force; pres-  
2 ident of the New York state energy research and development authority,  
3 or his or her designee; the chair of the public service commission, or  
4 his or her designee; the commissioner of environmental conservation; or  
5 his or her designee; president of empire state development or his or her  
6 designee; the commissioner of transportation, or his or her designee;  
7 the commissioner of health, or his or her designee; and the commissioner  
8 of agriculture and markets, or his or her designee; the president of the  
9 New York state AFL-CIO or his or her designee; the three members  
10 appointed by the temporary president of the senate, one of whom shall be  
11 a representative from the private sector; three members appointed by the  
12 speaker of the assembly, one of whom shall be a representative from the  
13 private sector; one member appointed by the minority leader of the  
14 senate; and one member appointed by the minority leader of the assembly;  
15 and in consultation with the following and other relevant state agen-  
16 cies, public authorities, local governments, the federal government and  
17 non-governmental organizations: the department of health, the department  
18 of labor, the department of state, the division of homeland security and  
19 emergency services, the power authority of the state of New York, the  
20 Long Island power authority, the department of taxation and finance, the  
21 metropolitan transportation authority, the state university of New York,  
22 the city university of New York, the New York independent system opera-  
23 tor, and others.

24 2. No member of the task force shall be disqualified from holding any  
25 public office or employment, nor shall he or she forfeit any such office  
26 of employment by virtue of his or her appointment pursuant to this  
27 section.

28 3. Members of the task force shall receive no compensation for their  
29 services, but shall be allowed their actual and necessary expenses  
30 incurred in the performance of their functions pursuant to this section.

31 4. The task force shall hold at least five public hearings. To the  
32 extent practicable, such hearings shall be held in different regions of  
33 the state. During the public hearings, the task force shall hear the  
34 testimony of voluntary witnesses.

35 5. The task force shall develop a detailed statewide, industrial,  
36 economic mobilization plan (hereinafter referred to as the "plan for a  
37 Green New Deal for New York" or the "plan") for the transition of the  
38 New York economy to become greenhouse gas emissions neutral by 2030, or  
39 as soon as feasible, by eliminating pollution and greenhouse gas emis-  
40 sions as much as technologically feasible, by transitioning rapidly to  
41 clean renewable energy technologies and to significantly draw down  
42 greenhouse gases from the atmosphere and oceans and to promote economic  
43 and environmental justice and equality. In furtherance of the foregoing,  
44 the plan shall:

45 (a) be prepared in consultation with experts and leaders from busi-  
46 ness, labor, state and local governments, tribal nations, academia and  
47 broadly representative civil society groups and communities;

48 (b) be driven by the state government, in collaboration, co-creation  
49 and partnership with business, labor, local governments, tribal nations,  
50 research institutions and civil society groups and communities, and the  
51 federal government;

52 (c) be executed in no longer than 10 years from the start of execution  
53 of such plan;

54 (d) provide opportunities for high income work, entrepreneurship and  
55 cooperative and public ownership; and

(e) additionally, be responsive to, and in accordance with, the goals and guidelines relating to social, economic, racial, regional and gender-based justice and equality.

6. In addition to preparing the plan, the task force shall prepare draft legislation for the enactment of the plan in accordance with this section. Such draft legislation may be prepared concurrently with the development of the plan, or as the task force may otherwise deem appropriate, provided that such finalized draft legislation shall be completed in accordance with the timing set forth in subparagraph (ii) of paragraph (b) of subdivision 9 of this section.

7. The task force shall have the authority to investigate, study, make findings, convene experts and leaders from industry, academia, local communities, labor, finance, environmental justice, technology and any other industry or group that the select committee deems to be a relevant resource. The task force may, at its discretion and as its members may deem appropriate, hold public hearings in connection with any aspect of its investigative functions.

8. To enable the task force to carry out the purposes of this article, the task force will use existing staff and resources from appropriate agencies.

9. (a) The task force shall submit a preliminary report on the plan to the governor, senate and assembly and online for the public by September 1, 2019 and as it deems appropriate from time to time the results of its investigations and studies, together with such detailed findings and interim recommendations or proposed plan or draft legislation, or portion thereof, as it may deem advisable.

(b)(i) The task force shall complete the plan for a Green New Deal for New York and issue a report to the governor, the temporary president of the senate, and the speaker of the assembly by a date no later than January 1, 2020.

(ii) The task force shall complete the finalized draft legislation and submit it to the governor, the temporary president of the senate, and the speaker of the assembly by a date no later than the date that is 90 calendar days after the task force has completed the plan and, in any event, no later than March 1, 2020.

(iii) The task force shall ensure that the plan and the draft legislation prepared in accordance with this section shall, upon completion be made available to the general public in widely accessible formats including, but not limited to, via at least one dedicated website and a print publication, by a date no later than 30 calendar days following the respective dates for completion.

10. (a) The plan for a Green New Deal and the draft legislation shall be developed with the objective of reaching the following outcomes within the target window of 10 years from the start of execution of the plan:

(i) dramatically expand existing renewable power sources and deploy new production capacity with the goal of meeting 100 percent of New York state power demand through clean renewable sources;

(ii) building a statewide, energy-efficient, "smart" grid;

(iii) upgrading every residential and industrial building for state-of-the-art energy efficiency, comfort and safety;

(iv) eliminating greenhouse gas emissions from the manufacturing, agricultural and other industries, including by investing in local-scale agriculture in communities across the state;

1 (v) eliminating greenhouse gas emissions from, repairing and improving  
2 transportation and other infrastructure, and upgrading water infrastruc-  
3 ture to ensure universal access to clean water;

4 (vi) funding massive investment in the drawdown of greenhouse gases;

5 (vii) making "green" technology, industry, expertise, products and  
6 services a major export of New York state, with the aim of becoming the  
7 undisputed international leader in helping other states and countries  
8 transition to completely greenhouse gas neutral economies and bringing  
9 about a global Green New Deal; and

10 (viii) explain how these actions will be financed and what the econom-  
11 ic impact will be if we take these actions and if we do not take these  
12 actions.

13 (b) The plan for a Green New Deal and the draft legislation shall  
14 recognize that a state, industrial, economic mobilization of this scope  
15 and scale is a historic opportunity to virtually eliminate poverty in  
16 New York state and to make prosperity, wealth and economic security  
17 available to everyone participating in the transformation. In further-  
18 ance of the foregoing, the plan and the draft legislation shall:

19 (i) provide all members of our society, across all regions and all  
20 communities, the opportunity, training and education to be a full and  
21 equal participant in the transition, including through a job guarantee  
22 program to assure a living wage job to every person who wants one;

23 (ii) diversify local and regional economies, with a particular focus  
24 on communities where the fossil fuel industry holds significant control  
25 over the labor market, to ensure workers have the necessary tools,  
26 opportunities, and economic assistance to succeed during the energy  
27 transition;

28 (iii) require strong enforcement of labor, workplace safety, and wage  
29 standards that recognize the rights of workers to organize and unionize  
30 free of coercion, intimidation, and harassment, and creation of meaning-  
31 ful, quality, career employment;

32 (iv) ensure a 'just transition' for all workers, low-income communi-  
33 ties, communities of color, indigenous communities, rural and urban  
34 communities and the front-line communities most affected by climate  
35 change, pollution and other environmental harm including by ensuring  
36 that local implementation of the transition is led from the community  
37 level and by prioritizing solutions that end the harms faced by front-  
38 line communities from climate change and environmental pollution;

39 (v) protect and enforce sovereign rights and land rights of tribal  
40 nations;

41 (vi) mitigate deeply entrenched racial, regional and gender-based  
42 inequalities in income and wealth including, but not limited to, ensur-  
43 ing that state and other investment will be equitably distributed to  
44 historically impoverished, low income, deindustrialized or other margi-  
45 nalized communities in such a way that builds wealth and ownership at  
46 the community level;

47 (vii) include additional measures such as basic income programs,  
48 universal health care programs and any others as the task force may deem  
49 appropriate to promote economic security, labor market flexibility and  
50 entrepreneurship;

51 (viii) deeply involve state and local labor unions to take a leader-  
52 ship role in the process of job training and worker deployment; and

53 (ix) explain how these actions will be financed and what the economic  
54 impact will be if these actions are taken and if these actions are not  
55 taken.

(c) The plan for a Green New Deal and the draft legislation shall recognize that innovative public and other financing structures are a crucial component in achieving and furthering the goals and guidelines relating to social, economic, racial, regional and gender-based justice and equality and cooperative and public ownership. The plan and the draft legislation shall, accordingly, ensure that the majority of financing of the plan shall be accomplished by the state government, using a combination of a new public bank or a system of regional and specialized public banks, public venture funds and such other vehicles or structures that the task force deems appropriate, in order to ensure that interest and other investment returns generated from public investments made in connection with the plan will be returned to the state, reduce taxpayer burden and allow for more investment.

§ 3. This act shall take effect immediately and shall expire and be deemed repealed April 1, 2020.
