FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

SUMMARY OF BILL: This proposed legislation would amend Sections 448, 508, and 606 of the Retirement and Social Security Law (RSSL) and Section 13-148 of the Administrative Code of the City of New York (ACCNYS) to provide an alternate death benefit for Correction and Sanitation members in all Tiers and Plans of the New York City Employees' Retirement System (NYCERS).

Effective Date: Upon enactment.

IMPACT ON BENEFITS: Currently, NYCERS Correction and Sanitation members are generally entitled to a lump sum ordinary death benefit equal to a multiple of salary plus the return of member accumulated contributions and increased-take-home-pay (ITHP), if any. These death benefits are generally calculated as three times the final year's salary raised to the next highest multiple of \$1,000. Some of these death benefits are subject to salary caps and other reductions.

Under the proposed legislation, if enacted, the ordinary death benefit for members who are otherwise eligible to receive a service retirement benefit would be the greater of their current death benefit or the value of the pension reserve that would have been established had they retired on the date of their death. The pension reserve is the present value of all payments expected to be made on account of any pension, or benefit in lieu of any pension, granted under provisions of law and computed upon the basis of adopted mortality tables with regular interest (inclusive of accumulated member contributions and ITHP, if any). This type of lump sum pension reserve death benefit is sometimes referred to as a Death Gamble, and is afforded, in a similar form, to Tier 1 NYCERS members.

FINANCIAL IMPACT - PRESENT VALUES: Based on the actuarial assumptions and methods described herein, the enactment of this proposed legislation would increase the Present Value of Future Benefits (PVFB) by approximately \$18.8 million.

Under the Entry Age Normal cost method used to determine the employer contributions to NYCERS, there would be an increase in the Unfunded Accrued Liability (UAL) of approximately \$11.5 million and an increase in the Present Value of future employer Normal Cost of \$7.3 million.

FINANCIAL IMPACT - ANNUAL EMPLOYER CONTRIBUTIONS: In accordance with ACCNYS Section 13-638.2(k-2), new UAL attributable to benefit changes are to be amortized as determined by the Actuary, but are generally amortized over the remaining working lifetime of those impacted by the bene-

fit changes. As of June 30, 2019, the remaining working lifetime of the impacted NYCERS groups is approximately 13 years.

For the purposes of this Fiscal Note, the increase in UAL was amortized over a 13-year period (12 payments under the One-Year Lag Methodology (OYLM)) using level dollar payments. This payment plus the increase in the Normal Cost results in an increase in annual employer contributions of approximately \$2.2 million each year.

CONTRIBUTION TIMING: For the purposes of this Fiscal Note, it is assumed that the changes in the Present Value of future employer contributions and annual employer contributions would be reflected for the first time in the June 30, 2019 actuarial valuation of NYCERS. In accordance with the OYLM used to determine employer contributions, the increase in employer contributions would first be reflected in Fiscal Year 2021.

CENSUS DATA: The estimates presented herein are based on the census data used in the Preliminary June 30, 2019 (Lag) actuarial valuation of NYCERS to determine the Preliminary Fiscal Year 2021 employer contributions.

The 11,862 NYCERS Correction members as of June 30, 2019 include 10,015 active members and 1,847 non-active members. The active members had an average age of approximately 39.2 years, average service of approximately 9.0 years, and an average salary of approximately \$94,000.

The 8,113 NYCERS Sanitation members as of June 30, 2019 include 7,780 active members and 333 non-active members. The active members had an average age of approximately 43.0 years, average service of approximately 12.1 years, and an average salary of approximately \$97,800.

ACTUARIAL ASSUMPTIONS AND METHODS: The changes in the Present Value of future employer contributions and annual employer contributions presented herein have been calculated based on the actuarial assumptions and methods in effect for the June 30, 2019 (Lag) actuarial valuations used to determine the Preliminary Fiscal Year 2021 employer contributions of NYCERS.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the realization of the actuarial assumptions used, as well as certain demographic characteristics of NYCERS and other exogenous factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Costs are also dependent on the actuarial methods used, and therefore different actuarial methods could produce different results. Quantifying these risks is beyond the scope of this Fiscal Note.

Not measured in this Fiscal Note are the following:

- * The initial, additional administrative costs of NYCERS and other New York City agencies to implement the proposed legislation.

- * The impact of this proposed legislation on Other Postemployment Benefit (OPEB) costs.
