## STATE OF NEW YORK

6587--A

2019-2020 Regular Sessions

## IN SENATE

June 17, 2019

- Introduced by Sen. PARKER -- read twice and ordered printed, and when printed to be committed to the Committee on Rules -- recommitted to the Committee on Energy and Telecommunications in accordance with Senate Rule 6, sec. 8 -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee
- AN ACT to amend the public service law and the public authorities law, in relation to establishing a clean and resilient energy program

## The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1	Section 1. The public service law is amended by adding a new section
2	66-q to read as follows:
3	<u>§ 66-q. Clean and resilient energy program. 1. As used in this</u>
4	section:
5	(a) "Clean and resilient behind the meter distributed energy resource
б	project" means an electricity generating system located behind a custom-
7	er meter in the state that is configured to provide uninterrupted elec-
8	tric service to a customer throughout an extended outage of the elec-
9	tricity distribution system, and which:
10	(i) (1) generates electricity without producing greenhouse gases or
11	<u>local combustion related pollutants; or</u>
12	(2) generates electricity or electricity and thermal energy via a
13	non-combustion process at an annual average efficiency of no less than
14	fifty-five percent measured on a lower heating value basis; or
15	(3) generates electricity and thermal energy at an annual average
16	efficiency of no less than seventy percent measured on a lower heating
17	value basis and reduces the local combustion related air pollutant
18	oxides of nitrogen by at least fifty percent in comparison to the most
19	recent annual average marginal emission factors, accounting for line
20	losses, for the New York independent system operator zone in which the
21	project is located at the time of interconnection; and

EXPLANATION--Matter in <u>italics</u> (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD11992-03-0

S. 6587--A

1 (ii) is located at a community continuity asset or within the bounda-2 ries of an existing or planned microgrid. 3 (b) "Community continuity asset" means a public or private entity that 4 provides critical services to the public during an outage of the elec-5 tric distribution system. Community continuity assets shall include, but б are not limited to: telecommunications providers, large retail stores, 7 supermarkets, government agencies, data centers, transportation systems, 8 financial institutions, gas stations, educational institutions, health 9 care providers, large multi-family residential housing, community 10 centers, and other customers deemed by the commission to provide a critical service to the public that would promote or enhance health and 11 safety during an outage of the electric distribution system. 12 13 (c) "Extended outage" means an outage of the electric distribution 14 system that continues for a period of twenty-four hours or longer. (d) "Uninterrupted" means that the output of the system is delivered 15 16 to the end-use customer throughout an extended electric distribution system outage, with the exception of momentary interruptions associated 17 18 with transitions to and from grid parallel and grid islanded operations. 19 (e) "Microgrid" means a load or group of interconnected loads and 20 distributed energy resources within clearly defined electrical boundaries that acts as a single controllable entity with respect to the grid. 21 A microgrid can connect and disconnect from the grid to enable it to 22 operate in both grid-connected or island-mode. 23 2. Within one hundred eighty days of the effective date of this 24 25 section, the commission shall modify the clean energy fund investment 26 plan to allocate no less than five percent of annual clean energy fund 27 expenditures to encourage the development of clean and resilient behind the meter distributed energy resource projects. The program modifica-28 29 tions shall require: 30 (a) administration by the New York state energy research and develop-31 ment authority; 32 (b) planned annual expenditures that amount to no less than five percent of overall annual clean energy fund expenditures commencing in 33 34 calendar year two thousand twenty-one and sustained each year through 35 calendar year two thousand twenty-five; (c) incentive structures that maximize cost-effectiveness and practi-36 cality through competitive procurements, standing-offers, or production 37 38 incentives; (d) annual reports on the achievements and effectiveness of the 39 40 program; and 41 (e) any other requirements deemed appropriate by the commission to 42 effectuate the purposes of this section. 43 § 2. Section 1020-11 of the public authorities law, as renumbered by 44 chapter 520 of the laws of 2018, is renumbered section 1020-zz. 45 § 3. Sections 1020-jj, 1020-kk and 1020-ll of the public authorities 46 law, sections 1020-jj and 1020-kk as renumbered by chapter 520 of the 47 laws of 2018 and section 1020-ll as renumbered by chapter 415 of the laws of 2017, are renumbered sections 1020-ww, 1020-xx, and 1020-yy and 48 49 a new section 1020-jj is added to read as follows: 50 <u>§ 1020-jj. Clean and resilient energy initiative. 1. As used in this</u> 51 section: (a) "Clean and resilient behind the meter distributed energy resource 52 53 project" means an electricity generating system located behind a customer meter that is configured to provide uninterrupted electric service to 54 55 а customer throughout an extended outage of the electric distribution 56 system, and which:

S. 6587--A

(i) (1) generates electricity without producing greenhouse gases or 1 2 local combustion related pollutants; or 3 (2) generates electricity or electricity and thermal energy via a 4 non-combustion process at an annual average efficiency of no less than 5 fifty-five percent measured on a lower heating value basis; or б (3) generates electricity and thermal energy at an annual average 7 efficiency of no less than seventy percent measured on a lower heating 8 value basis and reduces the local combustion related air pollutant 9 oxides of nitrogen by at least fifty percent in comparison to the most 10 recent annual average marginal emission factors, accounting for line losses, for the New York independent system operator zone in which the 11 project is located at the time of interconnection; and 12 13 (ii) is located at a community continuity asset or within the bounda-14 ries of an existing or planned microgrid. 15 (b) "Community continuity asset" means a public or private entity that 16 provides critical services to the public during an outage of the electric distribution system. Community continuity assets shall include, 17 but are not limited to: telecommunications providers, large retail 18 19 stores, supermarkets, government agencies, data centers, transportation 20 systems, financial institutions, gas stations, educational institutions, 21 health care providers, large multi-family residential housing, community centers, and other customers deemed by the authority to provide a crit-22 ical service to the public that would promote or enhance health and 23 safety during an outage of the electric distribution system. 24 25 (c) "Extended outage" means an outage of the electric distribution 26 system that continues for a period of twenty-four hours or longer. (d) "Uninterrupted" means that the output of the system is delivered 27 to the end-use customer throughout an electric distribution system 28 29 outage, with the exception of momentary interruptions associated with transitions to and from grid parallel and grid islanded operations. 30 31 (e) "Microgrid" means a load or group of interconnected loads and 32 distributed energy resources within clearly defined electrical boundaries that acts as a single controllable entity with respect to the grid. 33 A microgrid can connect and disconnect from the grid to enable it to 34 35 operate in both grid-connected or island-mode. 2. Within one hundred eighty days of the effective date of this 36 section, the authority shall modify its existing programs that encourage 37 the development of clean and resilient behind the meter distributed 38 energy resource projects. The authority shall consult with the New York 39 state public service commission and the New York state energy research 40 and development authority in the design and implementation of such 41 42 program. The projects shall require: 43 (a) planned annual expenditures that amount to no less than fifteen 44 million dollars commencing in calendar year two thousand twenty-one and 45 sustained each year through calendar year two thousand twenty-five; 46 (b) incentive structures that maximize cost-effectiveness and practi-47 cality through competitive procurements, standing-offers, or production 48 incentives; 49 (c) annual reports on the achievements and effectiveness of the 50 program; and 51 (d) any other requirements deemed appropriate by the authority to effectuate the purposes of this section. 52 53 § 4. This act shall take effect immediately.
