STATE OF NEW YORK

4055

2019-2020 Regular Sessions

IN ASSEMBLY

January 31, 2019

Introduced by M. of A. ENGLEBRIGHT, L. ROSENTHAL -- Multi-Sponsored by -- M. of A. GOTTFRIED -- read once and referred to the Committee on Governmental Operations

AN ACT to amend the environmental conservation law, in relation to enacting the "bird-friendly building council act"

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Short title. This act shall be known and may be cited as the "bird-friendly building council act".

3 § 2. Legislative findings. The legislature finds that:

4 (a) a federal multi-agency report issued in 2009, entitled "The State
5 of the Birds, United States of America", provides the most comprehensive
6 assessment to date on the status of bird populations;

7 (b) the multi-agency report concludes that nearly one-third of this 8 nation's 800 bird species are endangered, threatened or in significant 9 decline;

10 (c) daytime and nighttime collisions with man-made structures is the 11 most significant quantifiable cause of avian mortality and is increasing 12 with adverse effects being seen at a population level with estimates 13 ranging from several hundred million to one billion birds dying from 14 collisions annually in the United States;

(d) not only are birds beautiful, interesting and fascinating creatures that are eagerly welcomed by millions of Americans into their backyards every year, but birds also have significant positive impacts on the economies of the United States and New York state;

19 (e) the United States Fish and Wildlife Service has reported that 20 birdwatchers contribute thirty-six billion dollars annually to the econ-21 omy, and birds naturally provide billions of dollars worth of pest 22 control, benefitting farmers, forestry owners and consumers alike;

23 (f) bird-safe design features can be incorporated into new 24 construction and major renovation projects at no to minimal extra cost;

EXPLANATION--Matter in <u>italics</u> (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD04078-01-9

1	and existing buildings may be made bird-safe through the use of simple,
2	relatively low-cost adaptations;
3	(g) these design features have already been implemented in buildings
4	constructed and renovated both in New York state and throughout the
5	country;
б	(h) numerous municipalities and political subdivisions throughout the
7	country have developed guidelines and standards promoting bird-friendly
8	building design; and
9	(i) under the aegis of the department of environmental conservation
10	there is merit and value to the establishment of a bird-friendly build-
11	ing council whose mission is to undertake a comprehensive analysis and
12	develop a set of recommended responses to this significant wildlife
13	issue.
14	§ 3. The environmental conservation law is amended by adding a new
15	section 3-0121 to read as follows:
16	<u>§ 3-0121. Bird-friendly building council.</u>
17	1. There is hereby established in the department a bird-friendly
18	building council. Such council shall be composed of not less than eleven
19	members and no more than fifteen members, which shall include the
20	commissioner, who shall be the chair of the council and a minimum of ten
21	members and a maximum of fourteen members appointed by the commissioner.
22	The members appointed by the commissioner shall include persons repres-
23	enting the following interests: wildlife conservation organizations,
24	state and federal wildlife agencies, architects, landscape architects,
25	window manufacturers and distributors, commercial building managers, and
26	academia. The wildlife conservation organizations represented on the
27	council shall include the American Bird Conservancy, New York City Audu-
28	bon, New York State Audubon and the Long Island Audubon Council. The
29	federal wildlife agency representation shall include the Division of
30	Migratory Bird Management of the U.S. Fish and Wildlife Service. The
31	membership of the council shall be broadly representative of the
32	geographic areas of the state. Furthermore, the members of the council
33	shall receive no compensation for their services but shall be allowed
34	their actual and necessary expenses incurred in the performance of their
35	duties pursuant to this section. In addition, the commissioner of
36	general services shall serve as an ex-officio member of the council.
37	2. The bird-friendly building council shall:
38	a. develop such rules, regulations and procedures as necessary for it
39	to effectively administer its responsibilities;
40	b. attempt to assess and quantify the extent and magnitude of the problem statewide caused by diurnal and nocturnal birds colliding with
41	
42 42	buildings. This effort shall identify those species most commonly killed during daytime collisions, those species more commonly killed during
43 44	nighttime collisions and shall include an assessment on species at risk
44 45	due to rarity and endangerment;
46	<u>c. develop criteria and quidelines for identifying and prioritizing</u>
40 47	existing buildings which pose a danger to bird species due to the threat
48	of collisions;
49	<u>d.</u> identify existing and emerging products, technologies, strategies
50	and concepts which can reduce or eliminate bird mortality from building
50 51	collisions;
52	e. identify potential funding sources, to fund the retrofitting and/or
53	replacement of windows of existing problematic buildings which pose a
53 54	threat to birds and the implementation of other mitigative strategies;
55	f. promote public awareness of this issue and what members of the
55	The product of the second sport and made monther of the

56 <u>public can do to mitigate impacts;</u>

A. 4055

1	g. support and fund additional research to better understand partic-
2	ular aspects of the building-bird collision issue;
3	h. consult with other sustainable building design organizations; and
4	i. in cooperation with the department and the office of general
5	services, develop a set of proposed standards governing bird-friendly
б	building designs which include features, materials, technologies, strat-
7	egies, and concepts to reduce, minimize, and/or eliminate bird mortality
8	involving building collisions. The council shall develop these proposed
9	standards within eighteen months of its establishment and make a copy of
10	them available to the governor, senate majority leader, and speaker of
11	the assembly for their consideration of being codified in state law.
12	§ 4. This act shall take effect on the first of January next succeed-
13	ing the date on which it shall have become a law.
