

STATE OF NEW YORK

5708

2019-2020 Regular Sessions

IN ASSEMBLY

February 14, 2019

Introduced by M. of A. ENGLEBRIGHT, GALEF -- read once and referred to the Committee on Energy

AN ACT to amend the energy law, in relation to updating the state energy conservation construction code

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Subdivision 2 of section 3-101 of the energy law, as
2 amended by chapter 253 of the laws of 2013, is amended and a new subdivi-
3 sion 2-a is added to read as follows:

4 2. to encourage conservation of energy in the construction and opera-
5 tion of new commercial, industrial, agricultural and residential build-
6 ings, and in the rehabilitation of existing structures, through heating,
7 cooling, ventilation, lighting, insulation and design techniques and the
8 use of energy audits and life-cycle cost analysis, and through other
9 techniques required or authorized by the most recently published inter-
10 national energy conservation code and the most recently published
11 ANST/ASHRAE/IESNA standard 90.1;

12 2-a. to provide for a state energy code for residential buildings, and
13 for the administration and enforcement of such code in a manner that
14 achieves compliance with such code in at least ninety percent of new and
15 renovated residential building space in the state subject to such code;

16 § 2. Section 11-101 of the energy law, as amended by chapter 516 of
17 the laws of 1984, is amended to read as follows:

18 § 11-101. Purpose. In furtherance of the policy set forth in subdivi-
19 sion two of section 3-101 of this chapter, the legislature hereby
20 directs that a state energy conservation construction code be adopted to
21 protect the health, safety and security of the people of the state and
22 to assure a continuing supply of energy for future generations and that
23 such code mandate that [~~economically~~] reasonable energy conservation
24 techniques be used in the design and construction of all public and
25 private buildings in the state.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets
[-] is old law to be omitted.

LBD09632-01-9

§ 3. Subdivision 2 of section 11-103 of the energy law, as amended by chapter 560 of the laws of 2010, is amended to read as follows:

2. ~~[The]~~ (a) Each time a revised or updated edition of the international energy conservation code is published, the state fire prevention and building code council is hereby authorized and directed to promulgate, within eighteen months, rules and regulations amending those portions of the code that apply to residential buildings in such a manner to cause such portions of the code to be a building energy code for residential buildings throughout the state that meets or exceeds such revised or updated edition of the international energy conservation code or achieves equivalent or greater energy savings, or to affirmatively reject any provisions of the international energy conservation code which, in the judgment of the state fire prevention and building code council, is not appropriate for inclusion in the state building energy code and provide a reasoned elaboration of the decision to reject such provisions.

(b) In addition, the state fire prevention and building code council is authorized, from time to time as it deems appropriate and consistent with the purposes of this article, to review and amend the code, or adopt a new code, through rules and regulations ~~[provided that the code remains cost effective with respect to building construction in the state. In determining whether the code remains cost effective, the code council shall consider whether the cost of materials and their installation to meet its standards would be equal to or less than the present value of energy savings that could be expected over a ten year period in the building in which such materials are installed]~~. For residential buildings, the code shall meet or exceed the then most recently published International Energy Conservation Code, or achieve equivalent or greater energy savings; and for commercial buildings, the code shall meet or exceed ASHRAE 90.1-2007, or achieve equivalent or greater energy savings.

§ 4. The energy law is amended by adding a new section 11-111 to read as follows:

§ 11-111. Mandatory energy efficiency rating. 1. All new residential buildings shall be required to undergo a Home Energy Rating System (HERS) rating, as defined by the residential energy services network (RESNET), by a certified HERS rater, or a rating generated through an equivalent rating system that includes measuring actual building performance data, as approved by the New York state energy research and development authority.

2. All new residential buildings must demonstrate a twenty percent or greater reduction in modeled energy consumption as compared to a reference building of the same size and configuration incorporating all prescriptive standards of the state building energy code, as evidenced by achieving a minimum HERS rating of eighty-four on the current expanded HERS scoring system adopted by the state, or if approved by the New York state energy research and development authority an index of eighty or less as defined in the "2006 Mortgage Industry National Home Energy Rating Systems Standards," promulgated by the RESNET, or a rating or score that demonstrates equivalent energy performance as determined by any other successor rating system approved by the New York state energy research and development authority which includes measuring actual building performance data.

3. All new residential buildings including a single dwelling unit of six thousand feet or greater floor area must demonstrate a thirty-five percent or greater reduction in modeled energy consumption as compared

1 to a reference building of the same size and configuration built to the
2 minimum prescriptive standards of the state building energy code, as
3 evidenced by achieving a minimum HERS rating or eighty-seven on the
4 current expanded HERS scoring system adopted by the state, an index of
5 sixty-five or less as defined in the "2006 Mortgage Industry National
6 Home Energy Rating Systems Standards," promulgated by RESNET, or a
7 rating or score that demonstrates equivalent energy performance as
8 determined by any other successor rating system approved by the New York
9 state energy research and development authority which includes measuring
10 actual building performance data.

11 § 5. This act shall take effect immediately.
