

STATE OF NEW YORK

8240--A

2019-2020 Regular Sessions

IN ASSEMBLY

June 10, 2019

Introduced by M. of A. WALKER -- read once and referred to the Committee on Energy -- recommitted to the Committee on Energy in accordance with Assembly Rule 3, sec. 2 -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee

AN ACT to amend the public service law and the public authorities law, in relation to establishing a clean and resilient energy program

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The public service law is amended by adding a new section 66-q to read as follows:

§ 66-q. Clean and resilient energy program. 1. As used in this section:

(a) "Clean and resilient behind the meter distributed energy resource project" means an electricity generating system located behind a customer meter in the state that is configured to provide uninterrupted electric service to a customer throughout an extended outage of the electricity distribution system, and which:

(i) (1) generates electricity without producing greenhouse gases or local combustion related pollutants; or

(2) generates electricity or electricity and thermal energy via a non-combustion process at an annual average efficiency of no less than fifty-five percent measured on a lower heating value basis; or

(3) generates electricity and thermal energy at an annual average efficiency of no less than seventy percent measured on a lower heating value basis and reduces the local combustion related air pollutant oxides of nitrogen by at least fifty percent in comparison to the most recent annual average marginal emission factors, accounting for line losses, for the New York independent system operator zone in which the project is located at the time of interconnection; and

(ii) is located at a community continuity asset or within the boundaries of an existing or planned microgrid.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD11992-02-0

(b) "Community continuity asset" means a public or private entity that provides critical services to the public during an outage of the electric distribution system. Community continuity assets shall include, but are not limited to: telecommunications providers, large retail stores, supermarkets, government agencies, data centers, transportation systems, financial institutions, gas stations, educational institutions, health care providers, large multi-family residential housing, community centers, and other customers deemed by the commission to provide a critical service to the public that would promote or enhance health and safety during an outage of the electric distribution system.

(c) "Extended outage" means an outage of the electric distribution system that continues for a period of twenty-four hours or longer.

(d) "Uninterrupted" means that the output of the system is delivered to the end-use customer throughout an extended electric distribution system outage, with the exception of momentary interruptions associated with transitions to and from grid parallel and grid islanded operations.

(e) "Microgrid" means a load or group of interconnected loads and distributed energy resources within clearly defined electrical boundaries that acts as a single controllable entity with respect to the grid. A microgrid can connect and disconnect from the grid to enable it to operate in both grid-connected or island-mode.

2. Within one hundred eighty days of the effective date of this section, the commission shall modify the clean energy fund investment plan to allocate no less than five percent of annual clean energy fund expenditures to encourage the development of clean and resilient behind the meter distributed energy resource projects. The program modifications shall require:

(a) administration by the New York state energy research and development authority;

(b) planned annual expenditures that amount to no less than five percent of overall annual clean energy fund expenditures commencing in calendar year two thousand twenty-one and sustained each year through calendar year two thousand twenty-five;

(c) incentive structures that maximize cost-effectiveness and practicality through competitive procurements, standing-offers, or production incentives;

(d) annual reports on the achievements and effectiveness of the program; and

(e) any other requirements deemed appropriate by the commission to effectuate the purposes of this section.

§ 2. Section 1020-ll of the public authorities law, as renumbered by chapter 520 of the laws of 2018, is renumbered section 1020-zz.

§ 3. Sections 1020-jj, 1020-kk and 1020-ll of the public authorities law, sections 1020-jj and 1020-kk as renumbered by chapter 520 of the laws of 2018 and section 1020-ll as renumbered by chapter 415 of the laws of 2017, are renumbered sections 1020-ww, 1020-xx, and 1020-yy and a new section 1020-jj is added to read as follows:

§ 1020-jj. Clean and resilient energy initiative. 1. As used in this section:

(a) "Clean and resilient behind the meter distributed energy resource project" means an electricity generating system located behind a customer meter that is configured to provide uninterrupted electric service to a customer throughout an extended outage of the electric distribution system, and which:

(i) (1) generates electricity without producing greenhouse gases or local combustion related pollutants; or

1 (2) generates electricity or electricity and thermal energy via a
2 non-combustion process at an annual average efficiency of no less than
3 fifty-five percent measured on a lower heating value basis; or

4 (3) generates electricity and thermal energy at an annual average
5 efficiency of no less than seventy percent measured on a lower heating
6 value basis and reduces the local combustion related air pollutant
7 oxides of nitrogen by at least fifty percent in comparison to the most
8 recent annual average marginal emission factors, accounting for line
9 losses, for the New York independent system operator zone in which the
10 project is located at the time of interconnection; and

11 (ii) is located at a community continuity asset or within the bounda-
12 ries of an existing or planned microgrid.

13 (b) "Community continuity asset" means a public or private entity that
14 provides critical services to the public during an outage of the elec-
15 tric distribution system. Community continuity assets shall include,
16 but are not limited to: telecommunications providers, large retail
17 stores, supermarkets, government agencies, data centers, transportation
18 systems, financial institutions, gas stations, educational institutions,
19 health care providers, large multi-family residential housing, community
20 centers, and other customers deemed by the authority to provide a crit-
21 ical service to the public that would promote or enhance health and
22 safety during an outage of the electric distribution system.

23 (c) "Extended outage" means an outage of the electric distribution
24 system that continues for a period of twenty-four hours or longer.

25 (d) "Uninterrupted" means that the output of the system is delivered
26 to the end-use customer throughout an electric distribution system
27 outage, with the exception of momentary interruptions associated with
28 transitions to and from grid parallel and grid islanded operations.

29 (e) "Microgrid" means a load or group of interconnected loads and
30 distributed energy resources within clearly defined electrical bounda-
31 ries that acts as a single controllable entity with respect to the grid.
32 A microgrid can connect and disconnect from the grid to enable it to
33 operate in both grid-connected or island-mode.

34 2. Within one hundred eighty days of the effective date of this
35 section, the authority shall modify its existing programs that encourage
36 the development of clean and resilient behind the meter distributed
37 energy resource projects. The authority shall consult with the New York
38 state public service commission and the New York state energy research
39 and development authority in the design and implementation of such
40 program. The projects shall require:

41 (a) planned annual expenditures that amount to no less than fifteen
42 million dollars commencing in calendar year two thousand twenty-one and
43 sustained each year through calendar year two thousand twenty-five;

44 (b) incentive structures that maximize cost-effectiveness and practi-
45 cality through competitive procurements, standing-offers, or production
46 incentives;

47 (c) annual reports on the achievements and effectiveness of the
48 program; and

49 (d) any other requirements deemed appropriate by the authority to
50 effectuate the purposes of this section.

51 § 4. This act shall take effect immediately.
