

# STATE OF NEW YORK

---

25--B

Cal. No. 307

2019-2020 Regular Sessions

## IN SENATE

(Prefiled)

January 9, 2019

---

Introduced by Sens. HOYLMAN, CARLUCCI, HARCKHAM, KAPLAN, KRUEGER, SERRA-  
NO -- read twice and ordered printed, and when printed to be committed  
to the Committee on Environmental Conservation -- reported favorably  
from said committee, ordered to first and second report, ordered to a  
third reading, amended and ordered reprinted, retaining its place in  
the order of third reading -- passed by Senate and delivered to the  
Assembly, recalled, vote reconsidered, restored to third reading,  
amended and ordered reprinted, retaining its place in the order of  
third reading

AN ACT to amend the environmental conservation law, in relation to  
enacting the "bird-friendly building council act"

The People of the State of New York, represented in Senate and Assem-  
bly, do enact as follows:

1 Section 1. Short title. This act shall be known and may be cited as  
2 the "bird-friendly building council act".  
3 § 2. Legislative findings. The legislature finds that:  
4 (a) a federal multi-agency report issued in 2009, entitled "The State  
5 of the Birds, United States of America", provides the most comprehensive  
6 assessment to date on the status of bird populations;  
7 (b) the multi-agency report concludes that nearly one-third of this  
8 nation's 800 bird species are endangered, threatened or in significant  
9 decline;  
10 (c) daytime and nighttime collisions with man-made structures is the  
11 most significant quantifiable cause of avian mortality and is increasing  
12 with adverse effects being seen at a population level with estimates  
13 ranging from several hundred million to one billion birds dying from  
14 collisions annually in the United States;  
15 (d) not only are birds beautiful, interesting and fascinating crea-  
16 tures that are eagerly welcomed by millions of Americans into their

backyards every year, but birds also have significant positive impacts on the economies of the United States and New York state;

(e) the United States Fish and Wildlife Service has reported that birdwatchers contribute thirty-six billion dollars annually to the economy, and birds naturally provide billions of dollars worth of pest control, benefitting farmers, forestry owners and consumers alike;

(f) bird-safe design features can be incorporated into new construction and major renovation projects at no to minimal extra cost; and existing buildings may be made bird-safe through the use of simple, relatively low-cost adaptations;

(g) these design features have already been implemented in buildings constructed and renovated both in New York state and throughout the country;

(h) numerous municipalities and political subdivisions throughout the country have developed guidelines and standards promoting bird-friendly building design; and

(i) under the aegis of the department of environmental conservation there is merit and value to the establishment of a bird-friendly building council whose mission is to undertake a comprehensive analysis and develop a set of recommended responses to this significant wildlife issue.

§ 3. The environmental conservation law is amended by adding a new section 3-0121 to read as follows:

§ 3-0121. Bird-friendly building council.

1. a. There is hereby established in the department a bird-friendly building council. Such council shall be composed of fifteen members, which shall include the commissioner or his or her designee, who shall be the chair of the council, and fourteen members to be appointed as follows: six members appointed by the commissioner; three members appointed by the temporary president of the senate; one member appointed by the minority leader of the senate; three members appointed by the speaker of the assembly; and one member appointed by the minority leader of the assembly. In addition, the commissioner of general services or his or her designee shall serve as an ex-officio member of the council. The members of the council shall, to the extent practicable, include persons representing the following interests: wildlife conservation organizations, state and federal wildlife agencies, architects, landscape architects, window manufacturers and distributors, commercial building managers, and academia. The membership of the council shall be broadly representative of the geographic areas of the state.

b. Such council shall develop rules, regulations and procedures as necessary for it to effectively administer the council's responsibilities pursuant to this section. Such council shall also promote public awareness of this issue and consult with any entity including other sustainable building design organizations to carry out the provisions of this section.

c. The members of the council shall receive no compensation for their services but shall be allowed their actual and necessary expenses incurred in the performance of their duties pursuant to this section.

2. The bird-friendly building council shall conduct a study that shall include, but not be limited to, the following:

a. assess and quantify the extent and magnitude of the problem statewide caused by diurnal and nocturnal birds colliding with buildings. This effort shall identify those species most commonly killed during daytime collisions, those species more commonly killed during nighttime

1 collisions and shall include an assessment on species at risk due to  
2 rarity and endangerment;

3 b. recommend criteria and guidelines for identifying existing build-  
4 ings which pose a danger to bird species due to the threat of colli-  
5 sions;

6 c. identify existing and emerging products, technologies, strategies  
7 and concepts which can reduce or eliminate bird mortality from building  
8 collisions;

9 d. identify potential funding sources, for the retrofitting and/or  
10 replacement of windows of existing buildings which pose a threat to  
11 birds and the implementation of other mitigation strategies;

12 e. support research to better understand particular aspects of the  
13 building-bird collision issue; and

14 f. in cooperation with the department and the office of general  
15 services, develop a set of recommendations governing bird-friendly  
16 building designs which include features, materials, technologies, strat-  
17 egies, and concepts to reduce, minimize, and/or eliminate bird mortality  
18 involving building collisions.

19 3. Such council may request, and is authorized to receive, any infor-  
20 mation from any state agency that is relevant and material to the  
21 completion of such study. Such information received by such council  
22 shall be subject to the same requirements for confidentiality and limi-  
23 tations on use, if any, as are applicable to such state agency's use of  
24 such information.

25 4. Within eighteen months of the effective date of this section the  
26 council shall submit such study to the governor, the temporary president  
27 of the senate, and the speaker of the assembly. Such study shall also be  
28 posted on the department's website.

29 § 4. This act shall take effect on the first of January next succeed-  
30 ing the date on which it shall have become a law.
