STATE OF NEW YORK

5200--A

2019-2020 Regular Sessions

IN SENATE

April 16, 2019

- Introduced by Sens. METZGER, BAILEY, GOUNARDES, HARCKHAM, JACKSON, MAY, RAMOS, SALAZAR, SANDERS -- read twice and ordered printed, and when printed to be committed to the Committee on Energy and Telecommunications -- recommitted to the Committee on Energy and Telecommunications in accordance with Senate Rule 6, sec. 8 -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee
- AN ACT to amend the energy law, in relation to the mitigation of the severity of climate change; and to repeal certain provisions of the energy law relating thereto

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. This act shall be known and may be cited as the "freedom 2 from fossil fuels act".

3 § 2. Subdivisions 1, 4 and 5 of section 3-101 of the energy law, 4 subdivision 1 as amended by chapter 253 of the laws of 2013 and subdivi-5 sion 5 as amended by chapter 396 of the laws of 1978, are amended to 6 read as follows:

1. to obtain and maintain an adequate and continuous supply of safe, dependable and economical energy for the people of the state and to accelerate development and use within the state of renewable energy sources, all in order <u>to mitigate the severity of climate change</u>, to promote the state's economic growth, to create employment within the state, to protect [<u>its</u>] <u>the state's</u> environmental values and agricultural heritage, to husband its resources for future generations, and to promote the health and welfare of its people;

4. to encourage transportation modes and equipment which conserve the use of energy <u>and reduce and/or eliminate emissions of carbon dioxide</u> <u>and co-pollutants</u>;

18 5. to foster, encourage and promote the prudent development and wise 19 use of [all indigenous state] the state's renewable energy resources

EXPLANATION--Matter in <u>italics</u> (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD11128-03-0

S. 5200--A

including, but not limited to, [on-shore oil and natural gas, off-shore 1 2 oil and natural gas, natural gas from Devonian shale formations, small head hydro, [wood,] solar, wind, solid waste, energy from biomass, fuel 3 4 cells, geothermal, offshore wind and cogeneration; and 5 § 3. Subdivision 7 of section 3-101 of the energy law is REPEALED and б a new subdivision 7 is added to read as follows: 7 7. to conduct energy planning in an integrated and comprehensive 8 manner through development of a master plan designed to achieve the 9 goals set forth in the New York state climate leadership and community 10 protection act, which includes but is not limited to, the following: 11 a. By two thousand thirty, reducing greenhouse gas emissions by forty 12 percent, based on 1990 emissions levels, and meeting seventy percent of 13 electricity needs from renewable resources; 14 b. By two thousand fifty, reducing greenhouse gas emissions by eight-15 y-five percent, based on 1990 emissions levels, and meeting one hundred 16 percent of electricity needs from fossil fuel-free resources. 17 The master plan shall also be designed to meet the clean energy resource and energy efficiency targets set forth in section sixty six-p 18 of the public service law. 19 20 § 4. Subdivisions 1 and 2 of section 6-102 of the energy law, as 21 amended by chapter 195 of the laws of 2011, are amended to read as 22 follows: 1. There shall be established a state energy planning board, herein-23 after referred to as the "board", which shall consist of the chair of 24 25 the public service commission, the commissioner of environmental conser-26 vation, the commissioner of economic development, the commissioner of 27 transportation, the commissioner of labor, the commissioner of the divi-28 sion of homeland security and emergency services, the commissioner of 29 agriculture and markets, the commissioner of health, the secretary of 30 state and the president of the New York state energy research and devel-31 opment authority. The [governor, the] speaker of the assembly and the 32 temporary president of the senate shall each appoint [one] three addi-33 tional [representative] representatives to serve on the board. The representatives appointed by the speaker of the assembly and the tempo-34 35 rary president of the senate shall include at all times individuals with 36 expertise in issues relating to climate change mitigation and/or adapta-37 tion, such as environmental justice, energy planning, labor, public health and regulated industries. The presiding officer of the federally 38 39 designated electric bulk system operator (BSO) shall serve as a non-voting member of the board. Any decision or action by the board shall be by 40 41 majority vote. The president of the New York state energy research and 42 development authority shall serve as chair of the board. Members of the 43 board may designate an executive staff representative to participate on 44 the board on their behalf. 45 2. Regional planning councils shall be established. [Two] <u>Nine</u> regions 46 shall be established as follows: 47 (a) [Downstate region - New York City and Dutchess, Nassau, Orange, 48 Putnam, Rockland,] Region one: Nassau and Suffolk[, Ulster and Westches-49 ter] counties; 50 (b) [Upstate region - Albany, Allegany, Broome, Cattaraugus, Cayuga, 51 Chautauqua, Chemung, Chenango, Clinton, Columbia, Cortland, Delaware, Eric, Essex, Franklin, Fulton, Genesee, Greene, Hamilton, Herkimer, Jefferson, Lewis, Livingston, Madison, Monroe, Montgomery, Niagara, 52 53 Oneida, Onondaga, Ontario, Orleans, Oswego, Otsego, Rensselaer, Sarato-54 55 ga, Schenectady, Schoharie, Schuyler, Seneca, St. Lawrence, Steuben, Sullivan, Tioga, Tompking, Warren, Washington, Wayne, Wyoming and Yates 56

2

1	counties.] Region two: Kings, Bronx, New York, Queens, and Richmond
2	counties;
3	(c) Region three: Dutchess, Orange, Putnam, Rockland, Sullivan,
4	<u>Ulster, and Westchester counties;</u>
5	(d) Region four: Albany, Columbia, Delaware, Montgomery, Otsego, Rens-
б	selaer, Schenectady, and Schoharie counties;
7	(e) Region five: Clinton, Essex, Franklin, Fulton, Hamilton, Saratoga,
8	Warren, and Washington counties;
9	(f) Region six: Herkimer, Jefferson, Lewis, Oneida, and St. Lawrence
10	counties;
11	(g) Region seven: Broome, Cayuga, Chenango, Cortland, Madison, Ononda-
12	ga, Oswego, Tioga, and Tompkins counties;
13	(h) Region eight: Chemung, Genesee, Livingston, Monroe, Ontario, Orle-
14	ans, Schuyler, Seneca, Steuben, Wayne, and Yates counties; and
15	(i) Region nine: Allegany, Chautauqua, Cattaraugus, Erie, Niagara, and
16	Wyoming counties.
17	The governor, temporary president of the senate and the speaker of the
18	assembly shall each appoint [three] two regional planning council
19	members per region. Regional planning council members shall serve with-
20	out compensation, and shall have their principal residence within the
21	region for which they are appointed. Such regional council members may
22	solicit input from stakeholder interests within their region, including
23	but not limited to local governments, municipal utilities, rural elec-
24	tric cooperatives, utilities, labor unions, ratepayers, businesses,
25	trade associations, generators, social justice organizations, and commu-
26	nity organizations with a focus on, including but not limited to,
27	climate change mitigation, the environment, environmental justice,
28	and/or public health. Each regional planning council shall transmit to
29	the board a report containing any recommendations specific to its region
30	on a schedule determined by the board to be appropriate for consider-
31	ation of such report in the development of the draft energy plan.
32	§ 5. Subdivision 2 and paragraph (b) of subdivision 5 of section 6-104
33	of the energy law, as added by chapter 433 of the laws of 2009, para-
34	graph (a) of subdivision 2 as amended by chapter 195 of the laws of
35	2011, are amended and two new subdivisions 2-a and 6 are added to read
36	as follows:
37	2. The state energy plan shall include: (a) forecasts for a minimum
38	period of ten years, and for such other periods as the board may deter-
39	mine, of: (i) demand for electricity[, natural gas, coal, petroleum
40	products, including heating and transportation fuels] and other fuel
41	sources for heating, transportation and industrial processes, and alter-
42	nate fuels, including ethanol and other biofuels, to the extent possi-
43	ble, taking into account energy conservation, load management and other
44	demand-reducing measures including, but not limited to, carbon pricing,
45	which can be achieved in a cost-effective manner, including the basis
46	for such projection, including an examination of possible alternate
47	levels of demand and discussion of the forecasting methodologies and
48	input variables used in making the forecasts;
49	(ii) energy supply requirements needed to satisfy demand for electric-
50	ity, [natural gas, coal, petroleum products, including heating and
51	transportation fuels] and other fuel sources for heating, transporta-
52	tion, industrial processes, and alternate energy sources and fuels, for
53	each region of the state, and for the state as a whole, including with
54	respect to electricity, the amount of capacity needed to provide
55	adequate reserve margins and capacity needed to ensure reliability and
56	competitive markets in the various regions of the state <u>and to ensure</u>

electric capacity for beneficial electrification of additional sectors 1 including, but not limited to heating, transportation and industrial 2 3 processes; 4 (iii) an assessment of the ability of the existing energy supply 5 sources and the existing transmission or fuel transportation systems, to б satisfy, together with those sources or systems reasonably certain to be available, such energy supply requirements, indicating planned additions, retirements, deratings, substantial planned outages, and any 7 8 9 other expected changes in levels of generating and production capacity; 10 (iv) additional electric capacity and/or transmission or fuel trans-11 portation systems needed to meet such energy supply requirements that will not be met by existing sources of supply and those reasonably certain to be available, where such analysis should identify system 12 13 14 constraints and possible alternatives available, both supply-side and 15 demand-side alternatives, including but not limited to distributed 16 generation, energy efficiency and conservation measures, to redress such 17 constraint; and 18 (v) projected greenhouse emissions assessed using a life-cycle method 19 of analysis for each fuel type. 20 (b) Identification and assessment of the costs, risks, benefits, 21 uncertainties and market potential of **all** energy supply source alternatives[, including demand-reducing measures, renewable energy resources 22 of electric generation, distributed generation technologies, cogenera-23 24 tion technologies, biofuels and other methods and technologies reasonably available for satisfying energy supply requirements which are not 25 26 reasonably certain to be met by the energy supply sources identified in paragraph (a) of this subdivision, provided that such analysis shall 27 include the factors identified in paragraph (d) of this subdivision]; 28 (c) Identification and analysis of emerging trends related to energy 29 30 supply, price and demand, including trends related to the transportation 31 sector; 32 (d) An assessment of current energy policies and programs, and their 33 contributions to achieving long-range energy planning objectives includ-34 ing, but not limited to, the least cost integration of energy supply 35 sources, energy transportation and distribution system and demand-reduc-36 ing measures for satisfying energy supply requirements, giving due 37 regard to such factors as required capital investments, cost, ratepayer 38 and climate impacts, security and diversity of fuel supplies and gener-39 ating modes, protection of public health and safety, adverse and benefi-40 cial environmental impacts, conservation of energy and energy resources, 41 the ability of the state to compete economically, and any other policy 42 objectives deemed appropriate; (e) In order to assist the board in such evaluation, the power author-43 44 ity of the state of New York and the Long Island power authority shall 45 individually submit to the planning board: (i) a strategic plan specify-46 ing the mission and goals of the authority, the policies and programs 47 utilized to fulfill such mission and goals, and an explanation of how such policies and programs relate to the state energy plan, (ii) an 48 annual five-year operating plan, and (iii) a ten-year projected capital 49 budget for their respective operations. Such plans shall include major 50 51 new capital and programmatic initiatives, as well as descriptions and 52 achievements of existing programs, including program objectives and the 53 numbers of clients and/or customers served for each service or program; 54 (f) An analysis of security issues, considering both natural and human 55 threats to the state's energy systems;

1	(g) An environmental justice analysis including an analysis of the
2	barriers to, and opportunities for, community ownership of renewable
3	generation and energy efficiency services in low-income and environ-
4	<u>mental justice communities</u> ;
5	(h) An assessment of [the ability of urban planning alternative] land
б	use planning, including but not limited to smart growth [and], mass
7	transportation improvements to reduce energy and transportation fuel
8	demand, and building code changes which will reduce the use of energy,
9	carbon emissions, and other co-pollutants;
10	(i) An inventory of greenhouse gas emissions, and strategies for
11	facilitating and accelerating the use of <u>zero or</u> low carbon energy
12	sources and/or carbon mitigation measures;
13	(j) Recommendations, as appropriate and desirable, for administrative
14	and legislative actions to implement such policies, objectives and stra-
15	tegies;
16	(k) Assessment of the impacts of implementation of the plan upon
17	economic development, health, safety and welfare, environmental quality,
18	and energy costs for consumers, specifically low-income consumers; [and]
19	(1) <u>A statewide plan for the conversion to zero-emission vehicles</u>
20	including, but not limited to, the necessary infrastructure to reduce
21	range anxiety, the conversion of the state fleet to zero-emission vehi-
22	cles, and the overall electrification of the transportation sector;
23	(m) A statewide plan for development of non-fossil fuels for heating,
24	cooling and industrial processes; and
25	(n) Such additional information as the board deems appropriate, such
26	as but not limited to, information developed from consultation with the
27	BSO.
28	2-a. The state energy plan shall not include any provisions for new
29	construction or implementation of: (a) any infrastructure used to trans-
30	<u>fer fossil fuels or fuel gasses; or</u>
31	(b) electricity generation or storage electricity which utilize fossil
32	fuels gases.
33	(b) Any energy-related action or decision of a state agency, board,
34	commission or authority shall be [reasonably] consistent with the fore-
35	casts and the policies and long-range energy planning objectives and
36	strategies contained in the plan, including its most recent update [+
37	provided, however, that any such action or decision which is not reason-
38	ably consistent with the plan shall be deemed in compliance with this
39	section, provided that such action or decision includes a finding that
40	the relevant provisions of the plan are no longer reasonable or probable
41	based on a material and substantial change in fact or circumstance, and
42	a statement employing the basis for this finding. No state asons
43	a statement explaining the basis for this finding]. No state agency,
	board, commission, or authority shall act inconsistently with the
44	board, commission, or authority shall act inconsistently with the provisions of this section.
44 45	board, commission, or authority shall act inconsistently with the provisions of this section. 6. Any person may bring an action in his or her own name to enforce

issuance of a draft plan, to obtain views and comments of interested 1 2 persons on any aspect of, or issue addressed in, such draft plan; 3. As determined by the board in each instance to be appropriate with 3 4 respect to the particular entity or entities from which information, if 5 any, shall be required, the information to be provided to the board by б energy transmission [and], distribution and generation companies, elec-7 tric, gas, or steam corporations, major energy suppliers including 8 owners or operators of electric generation facilities, commodity and/or 9 end-use energy service providers, state agencies or authorities, includ-10 ing the power authority of the state of New York and the Long Island 11 power authority, and/or others, shall include the following: (a) Comprehensive long-range plans for future operations: 12 13 (i) a forecast of electricity demands over a period as the board may 14 determine appropriate, including annual in-state electric energy sales 15 and summer and winter peak loads by utility service area where applica-16 ble, and total any annual in-state electric energy sales and coincident 17 peak load, specifically identifying the extent to which energy conserva-18 tion, load management and other demand-reducing measures, and electric 19 energy generated by cogeneration, small hydro and [alternate energy 20 production facilities] distributed generation, energy generated by 21 fossil fuels and fuel gases, including renewable energy technologies and 22 fuel cells, consumed on site, have been incorporated within such fore-23 cast; 24 (ii) a forecast of electricity supply requirements over a period as 25 the board may determine appropriate, by utility service area where 26 applicable, specifically identifying the reserve margins required for 27 reliable electric service, the transmission and distribution losses 28 assumed, and the amount of out-of-state sales commitments; 29 (iii) an assessment of the ability of existing electricity supply 30 sources, and those reasonably certain to be available, to satisfy elec-31 tricity supply requirements, including electric generating facilities 32 which can be retained in service beyond their original design life 33 through routine maintenance and repairs and anticipatory estimates of beneficial electrification for new sectors including, but not limited 34 35 to, heating, cooling, cooking, transportation, and industrial processes; 36 (iv) an inventory of: (A) all existing electric generating and trans-37 mission facilities including those owned or operated by the power 38 authority of the state of New York and the Long Island power authority; 39 electric generating and transmission facilities planned or under (B) 40 construction including the power authority of the state of New York and 41 the Long Island power authority, including the dates for completion and 42 operation; (C) the anticipated retirement dates for any electric gener-43 ating facilities currently operated including those owned or operated by 44 the power authority of the state of New York and the Long Island power 45 authority; (D) land owned or leased including that owned or leased by 46 the power authority of the state of New York and the Long Island power 47 authority and held for future use as sites for major electric generating facilities; and (E) electric generating, transmission, and related 48 facilities operated, or planned to be operated, by others, to the extent 49 50 information concerning the same is known; 51 (v) recommended supply additions and demand reducing measures for

51 (V) recommended supply additions and demand reducing measures for 52 satisfying the electricity supply requirements, not reasonably certain 53 to be met by electricity supply sources identified in subparagraph (iii) 54 of this paragraph, including the life extension of existing electric 55 generating facilities, and reasons therefor; (vi) a statement of research and development plans, including objectives and programs in the areas of energy conservation, <u>climate change</u> <u>mitigation, beneficial electrification</u>, load management, electric generation and transmission, new energy technologies and pollution abatement and control, which are not funded through regulatory required programs, recent results of such programs undertaken or funded to date, and an assessment of the potential impacts of such results;

8 (vii) a projection of estimated electricity prices to consumers over 9 the forecast period, and a sensitivity analysis of that forecast relat-10 ing to a number of factors including fuel prices and the levels of 11 available capacity and demand in the regions of the state;

(viii) a description of the load forecasting methodology and the assumptions and data used in the preparation of the forecasts, specifically including projections of demographic and economic activity and such other factors, statewide and by service area, which may influence electricity demand, and the bases for such projections;

17 (ix) proposed policies, objectives and strategies for meeting the 18 state's future electricity needs; and

19 (x) such additional information as the board may, by regulation, 20 require to carry out the purposes of this article.

(b) All providers of natural gas transmission, distribution and/or marketing services to customers shall individually prepare and submit a comprehensive long-range plan for future operations, which shall include, as appropriate:

(i) a forecast over a period as the board may determine appropriate, by utility service area, of estimated annual in-state gas sales, winter season sales and peak day sales by appropriate end-use classifications, specifically identifying the extent to which energy conservation measures and the sale of gas owned by persons other than natural gas transmission and distribution utilities have been incorporated within such forecast;

(ii) a forecast of gas supply requirements over a period as the board may determine appropriate, by utility service area, specifically identifying the amounts of gas needed to meet severe weather conditions, lost and unaccounted for gas, out-of-state sales commitments and internal use;

(iii) an assessment of the ability of existing gas supply sources, and those reasonably certain to be available, to satisfy gas supply requirements;

40 (iv) an inventory of: (A) all existing supply sources, storage facilities, and transmission facilities which are used in providing service 41 42 within the state, (B) the transmission and storage facilities under construction which would be used in providing service within the state, 43 44 their projected costs and capacities, including peaking capacity, (C) 45 transmission facility additions proposed to be constructed by natural 46 gas transmission and distribution utilities, (D) transmission facilities 47 operated, or planned to be operated, by others, to the extent informa-48 tion concerning the same is known;

(v) [recommended supply additions and demand-reducing measures for satisfying the gas supply requirements, not reasonably certain to be met by gas supply sources identified in subparagraph (iii) of this paragraph and the reasons therefor;

53 (vi)] a projection of estimated gas prices to consumers over the fore-54 cast period, and a sensitivity analysis of that forecast relating to a 55 number of factors including the levels of commodity supply availability,

1 of available pipeline and storage capacity, and of demand in the regions 2 of the state; [(vii)] (vi) a description of the load forecasting methodology and the 3 4 assumptions and data used in the preparation of the forecasts, specif-5 ically including projections of demographic and economic activity and б such other factors, statewide and by service area where applicable, 7 which may influence demand for natural gas, and the bases for such 8 projections; 9 [(viii)] (vii) a statement of research and development plans, includ-10 ing objectives and programs in the areas of energy conservation and new 11 energy technologies, recent results of such programs undertaken or funded to date, and an assessment of the potential impacts of such results; 12 13 [(ix)] (viii) proposed policies, objectives and strategies for meeting 14 the state's future gas needs; and 15 $\left[\frac{1}{(\mathbf{x})}\right]$ (ix) such additional information as the board may, by regu-16 lation, require to carry out the purposes of this article. (c) Such information from major petroleum suppliers and major coal 17 suppliers as the board may require to carry out the purposes of this 18 19 article. 20 (d) Such other information from owners and operators of electric 21 generating power plants as the board may require to carry out the purposes of this article. 22 [(e) A single comprehensive submission from industry groups, trade 23 associations, or combinations of such groups and associations in place 24 25 of submissions by individual member companies.] 26 § 7. No agency, commission, or authority shall approve or permit the 27 construction of any fossil fuel or fuel gas generation facility or infrastructure until the completion of an energy plan developed in 28

29 accordance with the provisions of this act.

30 § 8. This act shall take effect immediately.
