10185

IN ASSEMBLY

May 5, 2022

Introduced by COMMITTEE ON RULES -- (at request of M. of A. Englebright)
 -- read once and referred to the Committee on Environmental Conserva tion

AN ACT to amend the environmental conservation law, in relation to establishing an extended producer responsibility program for packaging; and to amend the state finance law, in relation to establishing the packaging responsibility fund

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1	Section 1. Article 27 of the environmental conservation law is amended		
2	1 5		
3	TITLE 33		
4	EXTENDED PRODUCER RESPONSIBILITY PROGRAM FOR PACKAGING		
5	Section 27-3301. Definitions.		
б	27-3303. Responsibilities of producers.		
7	27-3305. Producer responsibility program plan.		
8	27-3307. Collection and convenience.		
9	27-3309. Responsibilities of the department.		
10	27-3311. Funding mechanism.		
11	27-3313. Non-reusable packaging reduction requirements.		
12			
13	ments.		
14	27-3317. Toxic substances in packaging.		
15	27-3319. Biennial producer responsibility program report.		
16			
17	27-3323. Enforcement.		
18	27-3325. Labeling.		
19	27-3327. Regulations.		
20	§ 27-3301. Definitions.		
21	As used in this title:		
22	1. "Compost" means the biologically stable humus-like material derived		
23	from composting or the aerobic, thermophilic decomposition of organic		
24			
25	sewage or septage.		
	EXPLANATIONMatter in italics (underscored) is new; matter in brackets		

[-] is old law to be omitted.

LBD15702-01-2

1	
1	2. "Compostable" means amenable to the controlled aerobic biological
2	decomposition of organic matter through active management to produce
3	compost as certified by a third-party certifier and accepted and proc-
4	essed into compost by at least eighty percent of commercial compost
5	facilities within the state.
6	3. "Curbside recycling" means a recycling program that serves residen-
7	tial units, or schools, state or local agencies, or institutions where
8	such entities were eligible to be served under a contract with a munici-
9	pality by a municipality or a private sector hauler as of the effective
10	date of this title, and such recycling program is operated by a munici-
11	pality or pursuant to a contract with a municipality, private sector
12	hauler, or other public agency or through approved solid waste manage-
13	ment plans.
14	4. "Municipality" means a county, city, town, village, local public
15	authority or public benefit corporation, or solid waste management
16	district, that provides waste management services for a specific
17	geographical area.
18	5. "Non-reusable packaging" means packaging material that does not
19	meet the definition of "reusable".
20	<u>6. "Packaging material" means any part of a package or container,</u>
21	regardless of recyclability or compostability, including but not limited
22	to such material types as paper, plastic, glass or metal, that is used
23	for the containment, protection, handling, delivery, transport, distrib-
24	ution, and presentation of a product that is sold, offered for sale, or
25	distributed in the state. Bags and secondary or transport packaging
26	shall be included within this definition. Packaging material does not
27	include:
28	(a) material, or a category of material, intended to be used for long-
29	term storage or protection of a durable product that can be expected to
30	be usable for that purpose for a period of at least five years as
31	defined by the department pursuant to regulations;
32	(b) beverage containers subject to title 10 of this article;
32 33	(b) beverage containers subject to title 10 of this article; (c) packaging that is reusable;
32 33 34	(b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products
32 33 34 35	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S.
32 33 34 35 36	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic
32 33 34 35 36 37	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regu-
32 33 34 35 36 37 38	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act;
32 33 34 35 36 37 38 39	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diag-
32 33 34 35 36 37 38 39 40	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered
32 33 34 35 36 37 38 39 40 41	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under
32 33 34 35 36 37 38 39 40 41 42	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and
32 33 34 35 36 37 38 39 40 41 42 43	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the
32 33 34 35 36 37 38 39 40 41 42 43 44	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated pursuant to section 37-0103 of this chapter, or
32 33 34 35 36 37 38 39 40 41 42 43 44 45	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated pursuant to section 37-0103 of this chapter, or packaging products regulated by the federal Insecticide, Fungicide,
32 33 34 35 36 37 38 39 40 41 42 43 445 46	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated by the federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. sec. 136 et seq. or other applicable
32 33 34 35 36 37 38 39 40 41 42 43 445 46 47	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated pursuant to section 37-0103 of this chapter, or packaging products regulated by the federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. sec. 136 et seq. or other applicable federal law, rule or regulation.
32 33 34 35 36 37 38 39 40 41 42 43 44 45 46 47 48	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated by the federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. sec. 136 et seq. or other applicable federal law, rule or regulation.
32 33 34 35 36 37 38 39 40 41 42 43 445 467 48 49	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated pursuant to section 37-0103 of this chapter, or packaging products regulated by the federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. sec. 136 et seq. or other applicable federal law, rule or regulation. 7. "Post-consumer recycled material" means new material produced using material resulting from the recovery, separation, collection and reproc-
32 33 34 35 37 38 39 41 42 43 445 467 489 50	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated by the federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. sec. 136 et seq. or other applicable federal law, rule or regulation. 7. "Post-consumer recycled material" means new material produced using material resulting from the recovery, separation, collection and reprocessing of material that would otherwise be disposed of or processed as
32 33 34 35 36 37 38 39 40 41 42 43 445 467 48 49	 (b) beverage containers subject to title 10 of this article; (c) packaging that is reusable; (d) medical devices and packaging which are included with products regulated as a drug, medical device or dietary supplement by the U.S. Food and Drug Administration under the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., sec. 3.2(e) of 21 U.S. Code of Federal Regulations or the Dietary Supplement Health and Education Act; (e) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other covered materials regulated by the United States Department of Agriculture under the Virus, Serum, Toxin Act, 21 U.S.C. 151-159; and (f) packaging products used to contain substances hazardous to the environment, regulated pursuant to section 37-0103 of this chapter, or packaging products regulated by the federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. sec. 136 et seq. or other applicable federal law, rule or regulation. 7. "Post-consumer recycled material" means new material produced using material resulting from the recovery, separation, collection and reproc-

53 material, or material generated by means of combustion, incineration, 54 pyrolysis, gasification, solvolysis, chemical recycling and any high-

- 55 <u>heat or chemical conversion process.</u>
- 56 <u>8. "Producer" means a person who:</u>

1	(a) manufactures or uses in a commercial enterprise, sells, offers for
1	
2	sale, or distributes the packaging material in the state under the brand
3	<u>of the manufacturer; or</u>
4	(b) if paragraph (a) of this subdivision does not apply, an entity
5	that is not the manufacturer of the packaging material but is the owner
б	or licensee of a trademark under which the packaging material is used in
7	commercial enterprise, sold, offered for sale, or distributed in the
8	state, whether or not the trademark is registered; or
9	(c) if paragraphs (a) and (b) of this subdivision do not apply, an
10	entity that sells packaging in the state which is intended to be filled
11	at the point of sale; or
12^{11}	(d) if paragraphs (a), (b) and (c) of this subdivision do not apply,
13	an entity that imports the packaging material into the United States or
14	the state for use in a commercial enterprise, sale, offer for sale, or
15	distribution in the state.
16	"Producer" includes a franchisor of a franchise located in the state
17	but does not include the franchisee operating that franchise.
18	9. "Readily-recyclable" means that the department has determined that
19	the packaging material:
20	(a) can be sorted by entities that process recyclable material gener-
21	ated in the state; and
22	(b) has a consistent market for purchase, as based on data from the
23	prior two calendar years, meaning that with respect to a type of packag-
24	ing material, entities processing recyclable material are willing to
25	purchase full bales of that type of fully sorted packaging material in
26	quantities equal to or in excess of the supply of that fully sorted
27	packaging material. "Readily-recyclable" does not include packaging
28	material that facilities accept in low qualities or sort out of material
29	during additional processing steps or if facilities cannot sell a full
30	bale due to a lack of market or inability to feasibly separate those
31	materials during additional processing steps. Packaging material cate-
32	gories or types shall not be considered readily-recyclable, generally
33	recyclable, compostable, or reusable if they contain a toxic substance.
34	10. "Recycling" means the series of activities by which material is:
35	(a) collected, sorted, and processed; (b) converted into a raw materi-
36	al with minimal loss of material quality; and (c) used in the production
37	of a new product to replace the use of virgin materials, including the
38	original material. "Recycling" does not include energy recovery or ener-
39	gy generation by any means, including but not limited to combustion,
40	incineration, pyrolysis, gasification, solvolysis, waste to fuel or any
41	chemical conversion process, or landfill disposal of discarded material
42	or discarded product component materials.
43	11. "Reusable" means:
44	(a) designed to be used repeatedly for a number of use cycles that
45	exceeds the minimum number of times necessary to achieve the same over-
46	all environmental impact as the non-reusable or disposable product it
47	replaces, based on a life cycle assessment of the product's impacts from
48	extraction through production and through disposal or end of life
49	management;
50	(b) compliant with any statutory or regulatory requirements for toxic
51	substances;
52	(c) safe for washing and sanitizing according to applicable state food
53	safety laws; and
54	(d) capable of being recycled at the end of use, with the exception of

55 <u>ceramic products.</u>

1	12. "Reuse and refill system" means a set of mechanisms designed to
2	facilitate multiple uses of a reusable container, in order to, at a
3	minimum, achieve the breakeven point for such reusable container. Mech-
4	anisms may include, but are not limited to, deposits, incentives, curb-
5	side collection, collection kiosks, refill stations, dishwashing facili-
6	ties, and re-distribution networks.
7	13. "Toxic substance" means a chemical substance identified in section
8	27-3317 of this title, or a chemical substance designated by the depart-
9	ment on the basis of identification by a government entity and/or iden-
10	tification on the basis of credible scientific evidence as being:
11	(a) a carcinogen, mutagenic, or reproductive or developmental toxi-
12	cant;
13	(b) endocrine disruptor;
14	(c) damaging to the nervous system, immune system, or organs or caus-
15	ing other systemic toxicity;
16	(d) persistent, bioaccumulative and toxic;
17	(e) highly persistent and highly mobile;
18	(f) persistent, mobile and toxic; or
19	(g) persistent and very bioaccumulative.
20	14. "Unit" means each discrete component of a package or container.
21	15. "Universal product code" or "UPC" shall have the same meaning as
22	subdivision 13 of section 27-1003 of this article.
23	16. "Waste reduction" means any action which causes a net reduction in
24	the generation of solid waste and includes, but is not limited to,
25	reducing the use of nonrecyclable materials, replacing disposable mate-
26	rials and products with reusable materials and products, reducing pack-
27	aging, and increasing the efficiency of the use of materials. Waste
28	reduction does not include replacing a recyclable material with a nonre-
29	cyclable material or a material that is less likely to be recycled, and
30	does not include a shift from a nonplastic material that currently is
31	recyclable to a plastic material.
32	<u>§ 27-3303. Responsibilities of producers.</u>
33	1. There is hereby established a packaging producer responsibility
34	program by which producers, participating individually or collectively,
35	shall be required to make changes to their product design to reduce
36	packaging consumption and increase waste reduction, shall be required to
37	pay fees based on the amount, by weight and type, of packaging material
38	sold, offered for sale, or distributed for sale in the state and shall
39	be responsible for packaging waste disposal.
40	2. The producer or producers shall provide all information necessary
41	for the determination of the producer's payment obligations and the
42	determination of the producer's compliance with respect to this title.
43	3. Within six months of the effective date of this title, the depart-
44	ment, or a third party, shall conduct a statewide reduction, reuse and
45	recycling needs assessment, hereafter "needs assessment", to identify
46	barriers and opportunities for reducing, reusing, and recycling packag-
47	ing. The needs assessment shall at a minimum include an evaluation of
48	capacity costs, gaps and needs for the following factors:
49	(a) current barriers affecting the creation of reduction, reuse and
50	refill programs;
51	(b) opportunities for the creation of reduction, reuse and refill
52	programs;
53 E4	(c) current municipal funding needs, both operational and capital,
54	impacting recycling access and availability and reuse and refill;
55	(d) existing state statutory provisions and funding sources for recy-

56 <u>cling, reuse, reduction, and recovery;</u>

1	(e) the existing collecting and hauling system for recyclable materi-		
2	als;		
3	(f) opportunities to improve access to recycling;		
4	(g) the capacity, cost, and needs associated with the collection and		
5	transportation of recyclable materials in the state;		
6	(h) the processing capacity, market conditions, and infrastructure for		
7	recyclable materials in the state and regionally;		
8	(i) current state packaging product recovery rates, recycling rates,		
9	and post-consumer recycled content rates, by material type;		
10	(j) accounting of greenhouse gas emissions associated with collection,		
11	processing, and marketing of packaging products;		
12	(k) an evaluation of state and regionally accepted recycling prac-		
13	tices;		
14^{-1}	(1) current barriers affecting equitable access to recycling and reuse		
15	programs;		
16	(m) barriers to the marketability of recyclable materials generated in		
17	the state, and potential solutions;		
18	(n) the amount, by weight, of material that is recycled by each recy-		
19	cling facility that accepts packaging material;		
20	(o) consumer education needs for reuse and refill systems, recycling,		
21	and reducing contamination in collected recyclable material that reduces		
22	its suitability for recycling;		
23	(p) the net cost of curbside collection, commercial collection, or		
24	transfer station operation, on-site processing cost for each readily-re-		
25	cyclable packaging material types, management cost of non-readily-re-		
26	cyclable packaging, transportation cost for each packaging material, and		
27	any other cost factors determined by the department;		
28	(q) the availability of opportunities in the recycling and reuse		
29	systems for minority- and women-owned business enterprises; and		
30	(r) the location of landfills, incinerators and transfer stations		
31	within the state, the socio-economic conditions where such facilities		
32	are sited and the permitted pollution levels at each facility.		
33	3. The department shall be responsible for updating and revising the		
34 25	needs assessment every three years.		
35	4. The department shall post the results of the needs assessment on		
36 37	<u>its website and issue a report to the legislature.</u> <u>§</u> 27-3305. Producer responsibility program plan.		
38	1. Within six months of the effective date of this title, each produc-		
39	er shall register with the department.		
40	2. Within eighteen months of the effective date of this title, each		
41	producer, either individually or acting collectively, shall submit a		
42	producer responsibility program plan (hereinafter "plan") to the depart-		
43	ment for approval. A producer may satisfy its obligations under this		
44	title individually or collectively.		
45	3. Each producer shall begin program implementation within six months		
46	after the date the plan is approved or no later than two years of the		
47	effective date of this title. If no plan is approved by that timeframe,		
48	the producer shall be subject to penalties for noncompliance.		
49	4. Any person that becomes a producer after the effective date of this		
50	<u>title shall submit an individual plan, or join with other producers,</u>		
51	within six months and begin program implementation within six months of		
52	plan approval or be subject to penalties for noncompliance.		
53	5. The submitted plan shall, at a minimum, address the following:		
54	(a) Contact information, including the name, electronic and physical		
55	address, and telephone number of the authorized representative of the		
F C	non-duran on modurana		

56 producer or producers.

1	(b) Identify the producer or producers participating in the plan
1	(b) Identify the producer or producers participating in the plan.
2	(c) A description of how the non-reusable packaging reduction require-
3 4	ments and recycling or post-consumer recycled material requirements are addressed.
5	(d) A comprehensive list of the types and brands of packaging products
6	for which the producer or producers are responsible for, including the
7	UPCs of the products associated with each type of packaging material.
8	(e) A description of the proposed funding mechanism, identified in
9	section 27-3311 of this title that meets the requirements of this title
10	and is sufficient to cover the cost of operating the program, updating
11	the plan, and maintaining a financial reserve sufficient to operate the
12	program in a fiscally prudent and responsible manner. At a minimum, the
13	following funding mechanism details shall be provided in the plan:
14	(i) proposed program fees, listed by producer, which are based on an
15	objective formula establishing a reimbursement rate, which covers obli-
16	gations identified in the needs assessment and takes into account vari-
17	able regional costs (including at a minimum those identified in clause
18	(A) of subparagraph (iv) of this paragraph, for participating munici-
19	palities or private sector haulers, approved by the department.
20	(ii) program fees determined based on eco-modulation. For purposes of
21	this title, "eco-modulation" shall provide that program charges are
22	structured to provide producers with financial incentives that reward
23	reduction of waste at the source and recycling compatibility innovations
24	and practices, reward producers for reusable packaging products, includ-
25	ing those that are contained within a reuse and refill system and that
26	disincentivize designs or practices that increase costs of managing the
27	packaging products.
28	(iii) the producer or producers may adjust charges to be paid by
29	participating producers, or may include a credit, based on factors that
30	affect system costs.
31	(iv) program fees shall also be variable based on:
32	(A) costs to provide recycling collection or other form of consumer
33	service that is, at minimum, as convenient as the previous waste
34	<u>collection schema in the particular jurisdiction for all consumers;</u>
35	
	(B) costs to process a producer's packaging products for sale to
36	secondary material markets;
37	(C) whether the packaging product would typically be readily-recycla-
38	ble except that as a consequence of the product's design, the product has the effect of disrupting recycling processes or the product includes
39 40	labels, inks, or adhesives containing heavy metals that would contam-
40 41	inate the recycling process;
42	(D) whether the packaging is specifically designed to be reusable or
	refillable, is contained within a reuse or refill system, and has a high
43 44	reuse or refill rate;
45	(E) the commodity value of packaging products; and
46	(F) contributions to greenhouse gas emissions from the production,
47	use, collection, processing, and marketing of the packaging product.
48	(f) A description of the process for participating municipalities or
49	private sector haulers to recoup reasonable costs as established by the
50	needs assessment from the producer, including, as applicable, any admin-
51	istrative, sorting, collection, transportation, public education or
52	processing costs if the producer uses services through a municipality or
53	obtains such services from a private hauler;
54	(g) A description of the characteristics of each type of packaging
55	material that are relevant to the eco-modulating factors set forth

56 pursuant to section 27-3311 of this title,

 education program for consumers and other stakeholders that will at minimum; (i) be designed to achieve the management goals of packaging product under this title, including the prevention of contamination of products (i) incorporate, at a minimum. electronic, print, web-based at social media elements that municipalities could utilize at their discretion; (ii) consult with municipalities and other stakeholders, coordinat with and assist local municipal programs, municipal contracted programs solid wasts collection companies, and other entities providing services and develop and provide outreach and education to the diverse populations in the state. including utilizing a variety of outreach at education tools and ensuring materials are widely accessible and avail abel or mark packaging information in accordance with the requirements of section 27-3325 of this title; (iv) label or mark packaging information in accordance with the requirements of section 27-3325 of this title; (v) include details on the following components of the outreach at education program provided in the plan and make such details available to consumers and other stakeholders on the producer's or producer: (a) proper end-of-life management of packaging: (b) the location and availability of recycling collection: (c) how to prevent litter of packaging roducts; and (d) a description of the process for answering stakeholder question and resolving my issues. 5.  (C) how to prevent litter of packaging products; and (D) a description of the process for answering stakeholder question and resolving any issues. 6. A producer implementing an individual extended producer responses bility program or producers acting cooperatively shall undertage outreach, education, and communications that assist in attaining of exceeding the minimum post-consumer content, minimum recovery rates, arguminimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether to approve a plan: (a) whether the plan adequately addresses all elements described if this section; (b) whether the producer or producers have undertaken satisfactor of opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan arguming municipalities or private haulers provides for an equitable distribution of funding; (ii) an evaluation system for the program charge structure, which shall be evaluated on an annual basis and resubmitted to the department; 			
 (D) a description of the process for answering stakeholder question and resolving any issues. 6. A producer implementing an individual extended producer response bility program or producers acting cooperatively shall undertak outreach, education, and communications that assist in attaining of exceeding the minimum post-consumer content, minimum recovery rates, and minimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whethes to approve a plan: (a) whether the plan adequately addresses all elements described is this section: (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan are reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, which shall be evaluated on an annual basis and resubmitted to the department panually; 			
and resolving any issues. 6. A producer implementing an individual extended producer responsion bility program or producers acting cooperatively shall undertable outreach, education, and communications that assist in attaining of exceeding the minimum post-consumer content, minimum recovery rates, ar minimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether to approve a plan: (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan are reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department shall be approved to an annual basis and resubmitted to the department approve and and approve approve the program charge structure.			
 6. A producer implementing an individual extended producer responsibility program or producers acting cooperatively shall undertable outreach, education, and communications that assist in attaining or exceeding the minimum post-consumer content, minimum recovery rates, and minimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether to approve a plan: (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for; (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan and reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department shall be approved to an annual basis and resubmitted to the department of annually; 			
bility program or producers acting cooperatively shall undertable outreach, education, and communications that assist in attaining of exceeding the minimum post-consumer content, minimum recovery rates, and minimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whethet to approve a plan: (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan and reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, which shall be evaluated on an annual basis and resubmitted to the department annually;			
outreach, education, and communications that assist in attaining of exceeding the minimum post-consumer content, minimum recovery rates, and minimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whethes to approve a plan: (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan are reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, which shall be evaluated on an annual basis and resubmitted to the department annually;			
exceeding the minimum post-consumer content, minimum recovery rates, and minimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether to approve a plan: (a) whether the plan adequately addresses all elements described is this section: (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan and reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department annually;			
minimum recycling rates, as specified by the department in regulation. 7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether to approve a plan: (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan are reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department for annually;			
7. No later than ninety days after the submission of the plan, the department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether to approve a plan: (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan are reimbursing municipalities or private haulers provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department for annually; 			
department shall determine whether to approve the plan as submitted approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether to approve a plan: (a) whether the plan adequately addresses all elements described is this section: (b) whether the producer or producers have undertaken satisfactors consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan and reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the departments			
approve the plan with conditions; or deny the plan. 8. The department shall consider the following in determining whether (a) whether the plan adequately addresses all elements described is this section: (b) whether the producer or producers have undertaken satisfactors consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan: (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan are producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department			
to approve a plan: (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactors consultation with the public and municipalities and have provided at opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan are reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department annually;			
 (a) whether the plan adequately addresses all elements described is this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided a opportunity for input in the development of the plan prior to submission of the plan; (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan ar reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department 	35	8. The department shall consider the following in determining whether	
this section; (b) whether the producer or producers have undertaken satisfactor consultation with the public and municipalities and have provided at opportunity for input in the development of the plan prior to submission (c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan ar reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer or producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, which shall be evaluated on an annual basis and resubmitted to the department	36	to approve a plan:	
39 (b) whether the producer or producers have undertaken satisfactor 40 consultation with the public and municipalities and have provided a 41 opportunity for input in the development of the plan prior to submission 42 of the plan; 43 (c) whether the plan adequately provides for: 44 (i) the producer or producers collecting and funding the costs of 45 collecting and processing packaging materials covered by the plan an 46 reimbursing municipalities or private haulers providing such services; 47 (ii) the funding mechanism to cover the entire cost of the producer of 48 producers' program and whether such mechanism provides for an equitable 49 distribution of funding; 50 (iii) an evaluation system for the program charge structure, which 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;	37	(a) whether the plan adequately addresses all elements described in	
40 consultation with the public and municipalities and have provided a 41 opportunity for input in the development of the plan prior to submission 42 of the plan; 43 (c) whether the plan adequately provides for: 44 (i) the producer or producers collecting and funding the costs of 45 collecting and processing packaging materials covered by the plan an 46 reimbursing municipalities or private haulers providing such services; 47 (ii) the funding mechanism to cover the entire cost of the producer of 48 producers' program and whether such mechanism provides for an equitable 49 distribution of funding; 50 (iii) an evaluation system for the program charge structure, whice 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;	38		
41 opportunity for input in the development of the plan prior to submission 42 of the plan; 43 (c) whether the plan adequately provides for: 44 (i) the producer or producers collecting and funding the costs of 45 collecting and processing packaging materials covered by the plan an 46 reimbursing municipalities or private haulers providing such services; 47 (ii) the funding mechanism to cover the entire cost of the producer of 48 producers' program and whether such mechanism provides for an equitable 49 distribution of funding; 50 (iii) an evaluation system for the program charge structure, whice 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;			
42 of the plan; 43 (c) whether the plan adequately provides for: 44 (i) the producer or producers collecting and funding the costs of 45 collecting and processing packaging materials covered by the plan an 46 reimbursing municipalities or private haulers providing such services; 47 (ii) the funding mechanism to cover the entire cost of the producer of 48 producers' program and whether such mechanism provides for an equitable 49 distribution of funding; 50 (iii) an evaluation system for the program charge structure, whice 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;			
(c) whether the plan adequately provides for: (i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan and reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department			
(i) the producer or producers collecting and funding the costs of collecting and processing packaging materials covered by the plan an reimbursing municipalities or private haulers providing such services; (ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, whice shall be evaluated on an annual basis and resubmitted to the department annually;			
45 collecting and processing packaging materials covered by the plan ar 46 reimbursing municipalities or private haulers providing such services; 47 (ii) the funding mechanism to cover the entire cost of the producer of 48 producers' program and whether such mechanism provides for an equitable 49 distribution of funding; 50 (iii) an evaluation system for the program charge structure, whice 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;			
46 reimbursing municipalities or private haulers providing such services; 47 (ii) the funding mechanism to cover the entire cost of the producer of 48 producers' program and whether such mechanism provides for an equitable 49 distribution of funding; 50 (iii) an evaluation system for the program charge structure, which 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;			
(ii) the funding mechanism to cover the entire cost of the producer of producers' program and whether such mechanism provides for an equitable distribution of funding; (iii) an evaluation system for the program charge structure, which shall be evaluated on an annual basis and resubmitted to the department annually;			
48 producers' program and whether such mechanism provides for an equitable 49 distribution of funding; 50 (iii) an evaluation system for the program charge structure, whice 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;			
49 <u>distribution of funding;</u> 50 <u>(iii) an evaluation system for the program charge structure, whice</u> 51 <u>shall be evaluated on an annual basis and resubmitted to the department</u> 52 <u>annually;</u>			
50 (iii) an evaluation system for the program charge structure, whice 51 shall be evaluated on an annual basis and resubmitted to the department 52 annually;			
51 shall be evaluated on an annual basis and resubmitted to the departmen 52 annually;			
52 annually;			
53 (iv) effective consumer outreach and education;			
54 (v) whether the plan satisfactorily provides for how the producer of		(v) whether the plan satisfactorily provides for how the producer or	
55 producers implementing an individual extended producer responsibilit	55	producers implementing an individual extended producer responsibility	

56 program will meet the minimum post-consumer content rates, recovery

rates, and recycling rates, which will create or enhance markets for 1 2 recycled materials; and (vi) whether the plan creates a convenient system for consumers to 3 4 recycle packaging products that meets or exceeds the convenience crite-5 ria set forth in section 27-3307 of this title. 6 10. The department may deny a plan. (a) If a plan is denied, the 7 department shall inform the producer or producers implementing an individual extended producer responsibility program in writing as to any 8 9 deficiencies in such plan. The producer or producers implementing the 10 plan shall amend and resubmit any denied plans for reconsideration with-11 in sixty days of notification of the denial of such plan. The department 12 shall approve or deny such plan within thirty days of resubmission. (b) If a plan is denied a second time, the department shall provide 13 the producer or producers with direction for meeting any additional 14 15 required elements of the plan it deems necessary. If such requirements are not met within thirty days, the producer or producers shall be 16 17 subject to penalties for each day such plan is delayed. 11. The department may rescind the approval of an approved plan at any 18 time for just cause. If a plan is rescinded, the department shall inform 19 20 the producer or producers in writing as to any and all reasons why the 21 plan was rescinded. The producer or producers implementing the plan 22 shall amend and resubmit any rescinded plans for reconsideration within sixty days of such notification. The department shall approve or reject 23 any such amended plan within thirty days of resubmission. 24 25 12. The producer or producers shall notify the department of any proposed modification to the program. If the department determines that 26 27 the plan has been substantially modified, the producer or producers shall submit a proposed plan amendment describing the changes to the 28 department within ninety days of the determination. Within ninety days 29 30 of receipt of a proposed amended plan, the department shall determine whether the amended plan complies with this title. The department shall 31 32 send a letter notifying the producer or producers of: (a) approval; or 33 (b) disapproval, including the reasons for rejecting the plan. The producer or producers shall submit a revised plan within sixty days 34 35 after receipt of the letter of disapproval. 36 13. The producer or producers shall reimburse the department annually 37 at the time of annual reporting for all administrative costs associated with implementation and oversight of the program. 38 39 14. Beginning two calendar years following the effective date of this 40 title, a producer shall not: 41 (a) sell, offer for sale, or distribute, in the state, a product 42 contained, protected, delivered, presented or distributed in or using 43 packaging material for which the producer has not complied with all 44 applicable requirements of this title; or 45 (b) sell, offer for sale, or distribute packaging for use in New York 46 unless such packaging products are in compliance with all applicable 47 requirements of this title. 48 15. No person may charge a consumer point-of-sale or point of 49 collection fee to recoup the costs associated with meeting the obli-50 gations under this title. 51 16. A producer or producers shall annually report to the department: 52 (a) the total amount of packaging material, by weight, sold, offered for sale, or distributed into the state by the producer or producers in 53 the prior calendar year; 54

1	(b) the total amount of packaging material, by unit, sold, offered for
2	sale, or distributed into the state by the producer or producers in the
3	prior calendar year;
4	(c) the percentage of all packaging material the producer or producers
5	sold, offered for sale, or distributed for sale in the state through
6	internet transactions; and
7	(d) the following financial information:
8	(i) the total costs of implementing the program, as determined by an
9	independent financial audit;
10	(ii) a copy of the independent audit; and
11	(iii) a detailed description of whether the program compensates muni-
12	cipalities, solid waste collection, sorting and processing facilities
13	and other approved entities for their recycling efforts and other
14	related services provided and any amount of reimbursement provided.
15	17. In accordance with the regulations adopted by the department, a
16	producer or producers shall annually report to the department informa-
17	tion necessary for the department to make a determination of the produc-
18	er's or producers' compliance with:
19	(a) the non-reusable packaging reduction requirements of section
20	27-3313 of this title;
21	(b) the reuse and refill system requirements of section 27-3313 of
22	this title;
23	(c) the recycling or post-consumer recycled material requirements of
24	section 27-3315 of this title;
25	(d) the toxic substances in packaging requirements of section 27-3317
26	of this title; and
27	(e) the labeling requirements of section 27-3325 of this title.
28	18. Each producer shall pay fees, associated with the cost of the
29	needs assessment required by section 27-3311 of this title.
30	19. Notwithstanding any provision of this title to the contrary, a
31	producer shall be exempt from the requirements and prohibitions of this
32	<u>title:</u>
33	(a) in any calendar year in which the producer realized less than two
34	million dollars in total gross revenue during the prior calendar year;
35	or
36	(b) in any calendar year in which the producer sold, offered for sale,
37	or distributed for sale in the state during the prior calendar year
38	packaging materials/products contained, protected, delivered, presented,
39	or distributed in or using less than one ton of packaging material in
40	total; or
41	<u>(c) if the producer is a municipality.</u>
42	20. A producer claiming an exemption under this section shall provide
43	to the department sufficient information to demonstrate that the claim-
44	ant meets the requirements for an exemption under this section within
45	thirty days of receiving a request from the department.
46	§ 27-3307. Collection and convenience.
47	A producer or producers shall provide for widespread, convenient, and
48	equitable access to collection opportunities for the packaging materials
49	identified under the producer or producers' plan at no additional cost
50	to residents. Such opportunities shall be provided to all residents of
51	New York in a manner that is as convenient as the collection of munic-
52	ipal solid waste. A producer or producers shall ensure services continue
53	for curbside recycling programs that a municipality serves as of the
54	effective date of this title, either directly or through a contract to
55	provide services, and that such services are continued through the

56 plan. A plan may not restrict a resident's ability to contract directly

10

1	with third parties to obtain recycling collection services if residents
2	have the option to enter into such contracts as of the effective date of
3	this title, as long as the resident still voluntarily chooses to
4	contract directly with the third party. A producer or producers may
5	rely on a range of means to collect various categories of packaging so
6	long as options for packaging material include curbside recycling
7	collection services provided by municipal programs, municipal contracted
8	programs, solid waste collection companies, or other approved entities
9	as identified by the department if:
10	1. The category of packaging materials is suitable for residential
11	curbside recycling collection and can be effectively sorted by the
12	facilities receiving the curbside collected material.
13	2. The recycling facility providing processing and sorting service
14	agrees to include the category of packaging materials as an accepted
15	material.
16	3. The packaging material is not handled through a deposit and return
17	scheme or buy back system that relies on a collection system other than
18	curbside or multi-family collection.
19	4. The provider of the residential curbside recycling service agrees
20	<u>to participate.</u>
21	5. (a) The producer or producers shall adopt a list of minimum types
22	of readily recyclable materials and products based on the department's
23	identification of available collection and processing infrastructure and
24	recycling markets for packaging materials. The producer or producers
25	shall update and adopt the list on an annual basis, in consultation with
26	the department, in response to collection and processing improvements
27	and changes in recycling end markets. If there are multiple lists, the
28	department shall compile the lists and shall publish a compiled list
29	to the public. Such lists may vary by geographic region depending on
30	regional markets and regional collection and processing infrastructure.
31	(b) All municipalities or private recycling service providers shall
32	provide for the collection and recycling of all identified materials and
33	products contained on the list of minimum recyclables, based on
34	geographic regions, in order to be eligible for reimbursement; provided,
35	however, nothing shall penalize a municipality or private recycling
36	service for packaging materials that are generated in the municipality
37	or geographic region that are not included on the list of minimum types
38	of recyclable packaging materials or products as long as it can be
39	demonstrated that such materials have a market as determined by the
40	department in consultation with the producer or producers. Reimbursement
41	shall cover recycling of all packaging materials so long as the program
42	includes at least the minimum recyclable list.
43	<u>§ 27-3309. Responsibilities of the department.</u>
44	1. Within one year of the effective date of this title, the department
45	shall promulgate regulations setting recommended program fees for
46	producers to pay after consulting with multiple stakeholders, including
47	municipalities, businesses, institutions, and other extended producer
48	responsibility programs. Program fees shall be set at a rate that will
49	drive reductions in overall packaging, incentivize adoption of reuse
50	systems, increase post-consumer recycled material, and promote the use
51	of recyclable packaging.
52	2. The department shall revise recommended program fees every three
53	years, beginning three years after the first set of program fees is
54	established to reflect new data received about material use and manage-
55	ment, or whenever the targets set in sections 27-3313 and 27-3315 of

56 this title are not met to drive compliance with such targets.

-			
1	3. The department shall annually compile a list of any producer		
2	noncompliance, and the steps being taken to bring noncompliant producers		
3	into compliance.		
4	4. The department shall annually provide a description of the infras-		
5	tructure and education investments made by producers in prior calendar		
6	years and an evaluation of how those investments were designed to		
7	increase access to recycling and refill or reuse systems in the state.		
8	5. The department shall provide an annual assessment of the progress		
9	made toward the achievement of any program goals, including but not		
10	limited to the requirements under sections 27-3313 and 27-3315 of this		
11	<u>title.</u>		
12	6. The department shall provide an annual assessment of the payment		
13	schedule adopted by producers pursuant to section 27-3311 of this title.		
14	7. The department shall provide an annual assessment of whether the		
15	plan has been successful in increasing the amount of packaging material		
16	that is readily recyclable, increasing the transition from non-reusable		
17	to reusable packaging, and incentivizing improvements to the design of		
18	packaging material.		
19	8. The department shall consider any proposals for changes to the		
20	program or investments in education and infrastructure designed to		
21	reduce the amount of packaging material used, increase access to recycl-		
22	ing, increase the recycling of or recyclability of packaging material,		
23	reduce program costs, or otherwise increase program efficiency, which		
24	may include an analysis of best practices for municipal recycling		
25	programs and material recovery facilities.		
26	9. The department shall consider the results of representative inbound		
27	and outbound audits of recyclable material processed and sold by materi-		
28	als recycling facilities in the state and waste characterization of		
29	municipal solid waste.		
30	10. The department shall review the results of a producers' third-par-		
31	ty financial audits.		
32	<u>§ 27-3311. Funding mechanism.</u>		
33	1. The department shall promulgate regulations setting forth the		
34	manner in which recommended producer program fees on packaging materials		
35	shall be calculated. Payments shall be calculated based on:		
36	(a) the packaging material type; and		
37	(b) the quantity of each packaging material type, by weight, that the		
38	producer sells, offers for sale, or distributes in the state.		
39	2. The list of packaging material types shall include, at a minimum,		
40	the following materials:		
41	(a) paper;		
42	(b) cardboard;		
43	(c) corrugated cardboard;		
44	(d) generic paper/cardboard;		
45	(e) wood;		
46	(f) glass;		
47	(g) polyethylene terephthalate (PET);		
48	(h) high density polyethylene (HDPE);		
49	(i) expanded polystyrene (EPS);		
50	(i) polystyrene;		
51	(k) bio-plastics;		
52	(1) generic plastics;		
53	(m) plastic film;		
54	(n) other plastics;		
55	<u>(o) steel or ferrous;</u>		
56	<u>(p) aluminum;</u>		

1	(q) tinplate; and	
2	<u>(r) generic metals.</u>	
3	3. (a) Program fees shall a	
4		ide collection or other form of residential
5		as convenient as curbside collection or as
6	— — — — — — — — — — — — — — — — — — — —	cycling collection plan in the particular
7	-	t as the previous refuse collection plan in
8		hould recycling collection not be provided;
9		aging materials for acceptance by secondary
10	<u>material markets;</u>	materials would typically be readily-re-
11 12		sequence of the product's design, the prod-
12		srupting recycling processes or the product
14^{13}		hesives containing heavy metals or other
15		contaminate the recycling process;
16		ging materials or product is specifically
17		fillable and has high reuse or refill rate;
18	-	a packaging material or product.
19		ed, or the producers may be provided a
20		rcentage of post-consumer recycled material
21		f post-consumer recycled content shall be
22	verified by an independent t	hird party approved to perform verification
23	services to ensure that su	ch percentage exceeds the minimum require-
24	ments in the packaging mate	rial, as long as the recycled content does
25	not disrupt the potential for	
26		for packaging material that is not readily-
27	<u>recyclable.</u>	
28		of packaging material shall be eco-modulat-
29		the environmental beneficial packaging
30	design in accordance with the	following:
31	Fees	Type of packaging
51	1000	<u>Type of packaging</u>
32	Fees are increased	Packaging is not readily-recyclable
33	Fees are lowered	Packaging is readily-recyclable
34		Packing is compostable
35		Packing incorporates post-consumer
36		recycled material
37	<u>No fee</u>	Reusable or refillable packaging contained
38		<u>within a reuse/refill system</u>
39	§ 27-3313. Non-reusable packa	
40		the total amount by unit, on average and in
41		le packaging across its brand in accordance
42	with the following schedule:	
43		s after the implementation of the producer
44	plan pursuant to section 27-3	
45 46		ent four years after plan implementation; ent six years after plan implementation;
40 47		cent eight years after plan implementation;
48	and	<u>cent eight years after plan implementation,</u>
40 49		<u>nt ten years after plan implementation.</u>
50		by subdivision one of this section shall be
51		amount of packaging the producer sold,
52		ributed for sale in the state during the
53	respective calendar year. For	producers who did not sell, offer for

1	sale, or distribute for sale any packaging during the calendar year, the
2	reductions required by subdivision one of this section shall be measured
3	against the first calendar year for which there is data regarding the
4	amount of packaging the producer sold, offered for sale, or distributed
5	for sale in the state.
6	3. These reductions may be achieved by eliminating non-reusable pack-
7	aging, including secondary packaging, or by transitioning away from
8	non-reusable packaging to a reuse and refill system.
9	4. The department shall promulgate regulations that address the manner
10	in which each producer will report its compliance with the requirements
11	of this section.
12	§ 27-3315. Recycling or post-consumer recycled material requirements.
13	1. Each producer shall ensure that all non-reusable packaging in the
14	aggregate, across its entire brand, either:
15	(a) is recycled at a rate consistent with the following schedule:
16	(i) fifty percent five years after implementation of the producer plan
17	pursuant to section 27-3305 of this title;
18	(ii) eighty percent eight years after plan implementation;
19	(iii) ninety percent twelve years after plan implementation; or
20	(b) incorporates, on average and in the aggregate, the following
21	amount by weight of post-consumer recycled material:
22	(i) fifty percent five years after plan implementation;
23	(ii) eighty percent five years after plan implementation; or
24	(iii) ninety percent twelve years after plan implementation.
25	2. Any producer that enters the market after the effective date of
26	this title shall meet the recycling requirements required by subdivision
20 27	one of this section as measured against the first calendar year for
28	which there is data regarding the amount of packaging the producer sold,
29	offered for sale, or distributed for sale in the state.
30	3. (a) For the purpose of determining a producer's compliance with the
31	post-consumer recycled material requirements of this section, a producer
32	shall rely on New York data regarding packaging sales and material use,
33	if available, or may alternatively rely on the same type of data appli-
34	cable to a region or territory of the United States that includes the
35	state of New York.
36	(b) If a producer elects to rely on data regarding packaging sales and
37	materials derived from data applicable to a region or territory of the
38	United States that includes the state of New York, the producer shall:
39	(i) pro-rate the regional or territorial data to determine New York
40	specific figures based on market share or population in a manner that
41	ensures that the percentage of post-consumer recycled material calcu-
42	lated for packaging material sold in New York is the same percentage as
43	calculated for that larger region or territory; and
44	(ii) document the methodology used to determine such New York specific
45	figures calculated under subparagraph (i) of this paragraph.
46	4. If a producer elects to comply with the provisions of this section
47	by meeting the post-consumer recycled material requirements, the depart-
48	ment may assess against a producer that fails to comply with those
49	requirements an administrative penalty calculated as follows:
50	(a) The department shall add the total amount by weight in pounds of
51	post-consumer recycled material and the total amount by weight in pounds
52	of material that is not post-consumer recycled material used by the
53	producer in all the packaging it sold, offered for sale, or distributed
54	for sale in the state during the prior calendar year. Unless otherwise
55	determined by the department, the figure calculated under this paragraph
56	shall be calculated using the information reported by the manufacturer.
	vio and and a second of the second of

1	(b) The department shall multiply the figure calculated under para-
2	graph (a) of this subdivision by the minimum post-consumer recycled
3	material percentage required under paragraph (b) of subdivision one of
4	this section during the prior calendar year.
5	(c) The department shall subtract from that figure calculated under
б	paragraph (b) of this subdivision the total amount by weight in pounds
7	of post-consumer recycled material used by the producer in all products
8	it sold, offered for sale, or distributed for sale in packaging in the
9	state during the prior calendar years.
10	(d) The department shall multiply that figure calculated under para-
11	graph (c) of this subdivision by twenty cents. If the figure calculated
12	under this paragraph is less than or equal to zero, the department may
13	<u>not assess an administrative penalty.</u>
14	<u>§ 27-3317. Toxic substances in packaging.</u>
15	1. Beginning December thirty-first, two thousand twenty-four, in addi-
16	tion to the requirements of title two of article thirty-seven of this
17	chapter, no person may sell, offer for sale, distribute for sale, or
18	distribute for use in this state, any packaging material containing the
19	following toxic substances above the practical quantification limit, as
20	such term is defined in section 37-0901 of this chapter:
21	<u>(a) ortho-phthalates;</u>
22	(b) bisphenols;
23	(c) per- and polyfluoroalkyl substances (PFAS);
24	(d) lead and lead compounds;
25	(e) hexavalent chromium and compounds;
26	(f) cadmium and cadmium compounds;
27	(g) mercury and mercury compounds;
28	(h) benzophenone and its derivatives;
29	<u>(i) halogenated flame retardants;</u>
30	(j) perchlorate;
31	(k) formaldehyde; and
32	(1) toluene.
33	2. Beginning one year after the effective date of this title, no
34	person may sell, offer for sale, distribute for sale, or distribute for
35	use in this state, any packaging products containing the following toxic
36	substances above the practical quantification limit, as such term is
37	defined in section 37-0901 of this chapter:
38	(a) polyvinyl chloride;
39	(b) polystyrene; or
40	(c) polycarbonate.
41	3. Beginning three years after the effective date of this title, and
42	every three years thereafter, the department shall designate at least
43	ten additional toxic substances, unless it determines there are not ten
44	chemicals that meet the definition of toxic substances. If the depart-
45	ment determines there are not ten toxic substances that meet such defi-
46	nition, it shall publish a detailed statement of findings and conclu-
47	sions supporting such determination.
48 49	4. Within one hundred eighty days of designating a toxic substance,
49 50	the department shall adopt regulations to prohibit the newly designated
50 E 1	toxic substance in packaging, with an effective date no later than two
51 52	years after such regulations are finalized.
52 52	6. Any producer that violates this section shall be subject to a fine
53 54	for each violation not to exceed twenty-five thousand dollars for each violation
54 55	violation.
55	<u>§ 27-3319. Biennial producer responsibility program report.</u>

1	1 Designing one user often the implementation of the modules plan
1	1. Beginning one year after the implementation of the producer plan
2	pursuant to section 27-3305 of this title, and every two years thereaft-
3 ⊿	er, the department shall generate a producer responsibility program
4 5	<u>report.</u> 2. The report shall include, at a minimum, the following information:
6	(a) a list of all participating producers and the brands of products
7	associated with those producers;
8 9	(b) a baseline report of the number of units of packaging and type of packaging products, both non-reusable and reusable, that were sold,
10	offered for sale, or distributed into the state;
11	<u>(c) a list of all materials that are readily-recyclable in the state;</u>
12	(d) results of an audit of inbound and outbound recyclable material
13	processed and sold within the state;
14	(e) a waste characterization study that specifies the quantity in tons
15	of packaging material in the waste stream according to types of uses;
16	(f) a statewide litter survey that identifies the quantity of packag-
17	ing material in litter according to types of packaging material and the
18	brands which produce the material;
19	(g) a list of the amount of packaging material and packaging material
20	type sold or offered for sale within the state that year;
21	(h) a description of all funding issued pursuant to the plan; and
22	(i) the compliance of producers with the toxic substances prohibition
23	provided in section 27-3317 of this title.
24	§ 27-3321. Producer compliance information.
25	1. The department shall make available on its publicly accessible
26	website a regularly updated list of UPCs of products for which the
27	department has determined the producer has complied with all applicable
28	requirements of this title and a list of producers and, where applica-
29	ble, specific products and the UPCs of those products, for which the
30	department has determined the producer has not complied with all appli-
31	cable requirements of this title.
32	2. Each producer shall annually provide to the department a certif-
33	icate of compliance signed by an authorized official stating that all
34 25	packaging materials meet the requirements of this title provided howev- er, where compliance is achieved under an exemption provided in section
35	
36 37	27-3305 of this title, the certificate shall state the specific basis
38	upon which the exemption is claimed.
30 39	<u>§ 27-3323. Enforcement.</u> <u>1. The department may bring an administrative enforcement action</u>
40	against any producer or other entity to enjoin activity in violation of
41	any provision of this title, and to assess and recover penalties as
42	provided in this title.
43	2. The office of the attorney general may bring an action in any court
44	of competent jurisdiction to enjoin any violation of the requirements of
45	this title, and to recover penalties as provided in this title.
46	3. All penalties recovered pursuant to this section shall be deposited
47	in the packaging responsibility fund.
48	§ 27-3325. Labeling.
49	1. Producers shall indicate on all packaging material sold, offered
50	for sale, or distributed for sale in or into the state either:
51	(a) the percentage of post-consumer recycled material;
52	(b) whether the packaging material is readily-recyclable and how to
53	recycle such unit; or
54	(c) whether the unit is compostable.
55	2. Such labels shall be in a form deemed appropriate by the department
56	pursuant to regulations.

3. All packaging material sold in the state shall conform with the 1 labeling requirements in this section within two years of the effective 2 3 date of this title. Packaging that does not meet the requirements of 4 this section may not be sold, offered for sale, or distributed for sale 5 into the state. 6 § 27-3327. Regulations. 7 1. The department shall promulgate regulations as necessary to imple-8 ment and administer this title. 9 2. The department shall solicit input from interested parties in the 10 development of any draft regulations to implement this title, solicit 11 public comment on such draft regulations for a period of at least sixty 12 days, and hold at least one public hearing on such draft regulations. The regulations adopted by the department pursuant to this title 13 3. 14 shall include, at a minimum: 15 (a) a process for annually determining a schedule of producer 16 payments, which shall include, but not be limited to, provisions regard-17 ing the timing of producer payments. (i) The payment schedule adopted under this paragraph shall delineate 18 criteria to be used to adjust producer payments in a manner that 19 20 complies with section 27-3311 of this title; and 21 (ii) Shall include a description of the methods to be used to deter-22 mine the amount reported for each type of packaging material associated with its products. 23 (b) a process for a producer or producers that are unable to fully 24 25 satisfy the reporting requirements due to a failure to obtain sufficient information regarding the characteristics of the packaging of the 26 27 producer's products that are sold, offered for sale, or distributed for sale in or into the state to, alternatively, report to the department an 28 estimate of the total amount of such packaging based on unit quantities, 29 30 as long as such alternative reporting includes a description of methods 31 used by the producer to calculate the estimate; 32 (c) a process for determining on an annual basis those types of pack-33 aging materials that are readily-recyclable which shall at a minimum 34 involve consultation with the municipalities and recycling establish-35 ments and shall include a transitional period between the time that the 36 type of packaging material is determined to be recyclable or to not be recyclable and the time that such determination shall be in effect for 37 the purposes of calculating producer payments; 38 39 (d) requirements for the assessment of program performance, including: 40 (i) the non-reusable packaging reduction requirements set forth in section 27-3313 of this title; 41 42 (ii) standards for reuse and refill systems to ensure they achieve the break-even point for reusable packaging; 43 44 (iii) the recycling or post-consumer recycled material requirements 45 set forth in section 27-3315 of this title; 46 (iv) the toxic substances in packaging requirements set forth in 47 section 27-3317 of this title; 48 (v) the labeling requirements set forth in section 27-3325 of this 49 title; and 50 (vi) material-specific recycling rates for each type of packaging material for which a fee has been set pursuant to section 27-3311 of 51 52 this title. The material specific recycling rate goals shall reflect the following recycling standards: 53 (A) sorted glass shall be considered recycled if it does not require 54 further processing before entering a glass furnace or before use in the 55

1	production of filtration media, abrasive materials, glass fiber insu-
2	lation or construction;
3	(B) sorted metal shall be considered recycled if it does not require
4	further processing before entering a smelter or furnace;
5	(C) sorted paper shall be considered recycled if it does not require
б	further processing before entering a pulping operation; and
7	(D) plastic separated by polymer shall be considered recycled if it
8	does not require further processing before entering a pelletization,
9	extrusion or molding operation, or in the case of plastic flakes, does
10	not require further processing before use in a final product;
11	(e) requirements for the producer to conduct representative audits of
12	recyclable material processed and sold by facilities that process
13	recyclable material generated in the state, of municipal solid waste
14	disposed of in the state, and waste littered in the state, which shall
15	include, at minimum:
16	(i) provisions regarding the sampling techniques to be used in those
17	audits, which must include random sampling; and
18	(ii) for audits of recyclable materials, provisions regarding:
19	(A) how such audits shall be designed to collect information regarding
20	the extent to which recycled material processed and sold by those facil-
21	ities reflects the tons of each type of packaging material collected in
22	the state for recycling and the amount of each type of packaging materi-
23	al recycled in the state, as well as the ultimate destination of and
24	intended use for such recycled material;
25	(B) how such audits shall be designed so that information collected
26	through the audit of one facility shall not be used to infer information
27	about a different facility that uses different processing equipment,
28	different sorting processes, or different staffing levels to conduct
29	processing;
30	(C) for audits of municipal solid waste, provisions regarding how such
31	audits will be designed to collect information regarding the types and
32	amount, by weight, of packaging in the waste stream and the percentage
33	by weight of the waste stream that is composed of packaging; and
34	(D) for audits of waste littered in the state, provisions regarding
35	how such audits will be designed to collect information regarding the
36	packaging material type by amount, weight, in sampled litter, identifi-
37	cation of the producer or producers of the packaging in sampled litter,
38	if identifiable, and an evaluation based on those audits regarding the
39	areas of the state in which litter accumulation is greatest;
40	(f) a process by which the producer or producers shall develop and
41	submit for department review and a process by which the department shall
42	review and approve or deny: (i) a proposed investment in recycling
43	infrastructure and education and (ii) a proposed investment in reusable
44	or refillable infrastructure and education. The process shall set forth
45	the manner in which the producer or producers are required to solicit
46	and incorporate input in the development of proposed investments from
47	producers, recycling establishments, and municipalities;
48	(g) a process for soliciting information necessary for, and a process
49	for rendering a determination regarding:
50	(i) a producer's compliance with the non-reusable packaging reduction
51	requirements of section 27-3313 of this title;
52	(ii) a producer's compliance with the reuse and refill system require-
53	ments of section 27-3313 of this title;
54 55	(iii) a producer's compliance with the recycling or post-consumer
55	recycled material requirements of section $27 = 3315$ of this title.

1	(iv) a producer's compliance with the toxic substances in packaging
2	requirements of section 27-3317 of this title; and
3	(v) a producer's compliance with the labeling requirements of section
4	27-3325 of this title;
5	(h) a process for determining how the producer or producers will
6	<u>distribute funds to municipalities; and</u>
7	(i) a process for determining the minimum number of reuse or refill
8	cycles required for each type of packaging material to be considered
9	reusable or refillable, pursuant to section 27-3313 of this title.
10	§ 2. The state finance law is amended by adding a new section 92-kk to
11	read as follows:
12	<u>§ 92-kk. Packaging responsibility fund. 1. There is hereby established</u>
13	in the joint custody of the comptroller and the commissioner of the
14	department of taxation and finance a special fund to be known as the
15	packaging responsibility fund.
16	2. Such fund shall consist of all penalties collected pursuant to
17	title thirty-three of article twenty-seven of the environmental conser-
18	vation law, and any other monies deposited into the fund pursuant to
19	law.
20	3. Moneys of the fund shall be made available to fund third-party,
21	independent audits of both inbound and outbound recyclable material
22	generated in the state, disposal of both inbound and outbound materials,
23	and litter audits. Such audits shall be conducted at least every two
24	years and shall be posted on the department of environmental conserva-
25	tion's website.
26	§ 3. The department of health shall, within one year of the effective
27	date of this act, examine its rules and regulations to identify any
28	barriers to the implementation of refill systems, including in food
29	production and wineries.
30	§ 4. This act shall take effect immediately.
