6914. Definition of practice of certified registered nurse anesthetist.

6915. Practice of certified registered nurse anesthetist and use of the title "certified registered nurse anesthetist" or "nurse anesthetist."

18 § 6912. Introduction. This article applies to the profession of certi-

1 aspects of organization and delivery of all anesthesia services provided
2 by the hospital or ambulatory surgical center. That physician or another
3 individual qualified by education and experience shall direct the admin-
4 istrative aspects of the service, and shall be responsible, in conjunc-
5 tion with the medical staff, for recommending to the governing body
6 privileges to those persons qualified to administer anesthetics, includ-
7 ing the procedures each person is qualified to perform and the levels of
8 required supervision as appropriate.

9 (b) In office based surgery venues, "administration of anesthesia
10 services" means the anesthesia component of the medical or dental proce-
11 dure shall be supervised by an anesthesiologist, physician, dentist or
12 podiatrist qualified to supervise the administration of anesthesia and
13 who is available to immediately diagnose and treat the patient for anes-
14 thesia complications or emergencies, and certified registered nurse
15 anesthetists may be permitted to administer monitored anesthesia care,
16 and/or general anesthesia, regional anesthesia, and/or monitor the
17 patient.

18 2. "General anesthesia" means the administration of a medication by
19 the parenteral or inhalation routes which results in a controlled state
20 of unconsciousness accompanied by a complete loss of protective reflexes
21 including loss of the ability to independently and continuously maintain
22 patient airway and a regular breathing pattern. There is also an inabil-
23 ity to respond purposefully to verbal commands and/or tactile stimu-
24 lation.

25 3. "Local anesthesia" means the introduction of a local anesthetic
26 agent into a localized part of the body by topical application or local
27 infiltration in close proximity to a nerve, which produces a transient
28 and reversible loss of sensation. All local anesthetics possess both
29 excitatory (seizure) and depressant (loss of consciousness) central
30 nervous system effects in sufficient blood levels and may have profound
31 cardiovascular depressant effects. There may also be interactive effects
32 between local anesthetic agents and sedative medications.

33 4. "Monitored anesthesia care" means: (a) a minimally depressed level
34 of consciousness that retains the patient's ability to maintain adequate
35 cardiorespiratory function and the ability to independently and contin-
36 uously maintain an open airway, a regular breathing pattern, protective
37 reflexes, and respond purposefully and rationally to tactile stimulation
38 and verbal command. This does not include unsupplemented oral pre-opera-
39 tive medications or nitrous oxide analgesia; or

40 (b) the administration of medication by the oral, parenteral, or inha-
41 lation routes which results in a controlled state of depressed
42 consciousness accompanied by partial loss of protective reflexes. There
43 may be an inability to independently and continuously maintain an open
44 airway and/or regular breathing pattern with unconscious or deep
45 sedation, and the ability to appropriately and rationally respond to
46 physical stimuli and verbal commands is lost.

47 5. "Monitoring" means the continual clinical observation of a patient
48 and the use of instruments to measure, display, and record the values of
49 certain physiologic variables such as pulse, oxygen saturation, level of
50 consciousness, blood pressure, and respiration.

51 6. "Office-based surgery" means any surgical or other invasive proce-
52 dure, requiring general anesthesia, monitored anesthesia care, and any
53 liposuction procedure, where such surgical or other invasive procedure
54 or liposuction is performed by a licensee in a location other than a
55 hospital, as such term is defined in article twenty-eight of the public

1 health law, excluding minor procedures and procedures requiring minimal
2 sedation.

3 7. "Patient" means an individual who is under the care of a physician,
4 dentist, oral surgeon or podiatrist in a licensed facility or in an
5 office.

6 8. "Peri-anesthetic period" means the period of time commencing upon
7 the pre-operative evaluation of the patient before surgery and ending
8 upon the patient's post-operative discharge from the recovery room.

9 9. "Regional anesthesia" means the administration of local anesthesia
10 agents to interrupt nerve impulses in a major region of the body.
11 Including but not limited to in this category are spinal, epidural,
12 caudal, upper or lower extremity plexus block anesthesia, and intrave-
13 nous regional anesthesia.

14 10. "Supplemented local anesthesia" means the use of local anesthesia
15 supplemented with monitored anesthesia care.

16 11. "Unsupplemented local anesthesia" means the use of local anes-
17 thesia without supplementing with monitored anesthesia care.

18 § 6914. Definition of practice of certified registered nurse anes-
19 thetist. 1. In addition to the provisions of practice for registered
20 professional nursing outlined in section sixty-nine hundred two of this
21 title, the practice of a certified registered nurse anesthetist further
22 includes, but is not limited to, administration of anesthesia, which
23 includes general anesthesia, monitored anesthesia care, local anes-
24 thesia, regional anesthesia, spinal, epidural, caudal anesthesia,
25 supplemented local anesthesia, and unsupplemented local anesthesia to a
26 patient during the peri-anesthetic period; performing and documenting a
27 preanesthetic assessment and evaluation of the patient, including
28 requesting consultations and diagnostic studies; selecting, obtaining,
29 ordering, and administering preanesthetic medications and fluids; and
30 obtaining informed consent for anesthesia, developing and implementing
31 an anesthetic plan; initiating the anesthetic technique; monitoring the
32 patient including selecting, applying, and inserting appropriate nonin-
33 vasive and invasive monitoring modalities for continuous evaluation of
34 the patient's physical status; selecting, obtaining, and administering
35 the anesthetics, adjuvant and accessory drugs, and fluids necessary to
36 manage the anesthetic; managing a patient's airway and pulmonary status
37 using current practice modalities; facilitating emergence and recovery
38 from anesthesia by selecting, obtaining, ordering and administering
39 medications, fluids, and ventilatory support; discharging the patient
40 from a postanesthesia care area and providing postanesthesia follow-up
41 evaluation and care; implementing acute and chronic pain management
42 modalities; and responding to emergency situations by providing airway
43 management, administration of emergency fluids and drugs, and using
44 basic or advanced cardiac life support techniques.

45 2. Nurse anesthesia must be provided in collaboration with a licensed
46 physician qualified to determine the need for anesthesia services,
47 provided such services are performed in accordance with a written prac-
48 tice agreement and written practice protocols as set forth in subdivi-
49 sion four of this section or pursuant to collaborative relationships as
50 set forth in subdivision five of this section, whichever is applicable.

51 3. Prescriptions for drugs, devices, and anesthetic agents, anesthesia
52 related agents, and pain management agents may be issued by a certified
53 registered nurse anesthetist during the peri-anesthetic period, in
54 accordance with the written practice agreement and written practice
55 protocols described in subdivision four of this section if applicable.
56 The certified registered nurse anesthetist shall obtain a certificate

1 from the department upon successfully completing a program including an
2 appropriate pharmacology component, or its equivalent, as established by
3 the commissioner's regulations, prior to prescribing under this subdivi-
4 sion. The license issued under this article shall state whether the
5 certified registered nurse anesthetist has successfully completed such a
6 program or equivalent and is authorized to prescribe under this subdivi-

12 experience to determine the need for anesthesia.

13 (a) The written practice agreement shall include explicit provisions
14 for the resolution of any disagreement between the collaborating physi-
15 cian and the certified registered nurse anesthetist regarding a matter
16 of anesthesia or pain management treatment that is within the scope of
17 practice of both. To the extent the practice agreement does not so
18 provide, then the collaborating physician's treatment shall prevail.

20 by the collaborating physician in a timely fashion but in no event less

22 nurse anesthetist and the collaborating physician shall be clearly post-
23 ed in the practice setting of the certified registered nurse anesthe-
24 tist.

26 nursing practice. The protocols shall be filed with the department with-

28 periodically. The commissioner shall make regulations establishing the
29 procedure for the review of protocols and the disposition of any issues
30 arising from such review.

32 cle and practicing for more than thirty-six hundred hours shall have
33 collaborative relationships with one or more licensed physicians quali-

35 licensed under article twenty-eight of the public health law, that
36 provides services through licensed physicians qualified to determine the
37 need for anesthesia services and having privileges at such institution.

38 (a) For purposes of this subdivision, "collaborative relationships"
39 shall mean that the certified registered nurse anesthetist shall commu-
40 nicate, whether in person, by telephone or through written (including
41 electronic) means, with a licensed physician qualified to determine the
42 need for anesthesia services or, in the case of a hospital, communicate
43 with a licensed physician qualified to determine the need for anesthesia
44 services and having privileges at such hospital, for the purposes of
45 exchanging information, as needed, in order to provide comprehensive
46 patient care and to make referrals as necessary.

47 (b) As evidence that the certified registered nurse anesthetist main-
48 tains collaborative relationships, the certified registered nurse
49 anesthetist shall complete and maintain a form, created by the depart-

51 that describes such collaborative relationships. Such form shall also
