WHEREAS, It is the intent of the Legislature to effectuate the timely passage of a State Budget; and

WHEREAS, The Senate Finance Committee has conducted an extensive study and review of the Governor's 2021-2022 Executive Budget submission and has recommended proposed amendments to such Budget submission in the above referenced Legislative Bills and Report on the Executive Budget; and

WHEREAS, An extensive study and review of the Governor's 2021-2022 Executive Budget submission has revealed that the construction of the budget bills submitted to the Legislature by the Governor constrains the Legislature in its ability to fully effectuate its intent in amending the Governor's budget submission; and

WHEREAS, The Senate, in addition to the Governor's 2021-2022 Executive Budget submission bills as amended by the Senate in the above referenced legislative bills, does hereby provide its recommendations as to provisions in the Governor's 2021-2022 Executive Budget submission; and

WHEREAS, It is the intent of the Legislature that upon the passage of the Governor's 2021-2022 Executive Budget submission as amended by the Senate, and the incorporated Report on the Amended Executive Budget may provide a basis for both houses of the Legislature to convene Committees on Conference pursuant to Joint Rule III of the Senate and Assembly for the purpose of reconciling any differences between the amendments to the Governor's budget as proposed by each house of the Legislature; now, therefore, be it

REPORT ON THE AMENDED EXECUTIVE BUDGET

ALL STATE AGENCIES AND OPERATIONS

The Senate rejects with prejudice the following language contained within the body of various appropriations:

* State Operations language (S.2500-A) provides the Executive broad authority to shift resources among departments, agencies or public authorities. While existing State Finance Law authorizes some transfer, interchange and suballocation authority, the new proposal would significantly expand such flexibility to restructure the Budget after enactment, potentially moving resources from one area to completely different programs or purposes. Any transfer of funds from State agencies to public authorities could reduce oversight and control of such resources. This means that agencies could spend more than what was authorized for a particular purpose, eliminating transparency and budgetary controls that are relied upon by decision makers in all branches of State government, bondholders, and State taxpayers.
* State Operations language limiting the certification and payment of operational funding for certain agencies unless the legislature has enacted appropriations in the Aid to Localities budgets for various state agencies.
* Aid to Localities language (S.2503) provides the Budget Director broad authority to withhold state aid if the budget is deemed unbalanced and that the budget will be deemed unbalanced if the State receives less than $3 billion in unrestricted federal aid.

The Senate understands the Governor's responsibility to ensure New York's budget is fiscally sound, but it is equally important to ensure that the constitutional limits on the Executive's powers are not exceeded. Failure to ensure reasonable limits on Executive authority would signal an irreversible abrogation of the Legislature's constitutionally guaranteed legislative responsibility.
