2 or another individual qualified by education and experience shall direct
3 the administrative aspects of the service, and shall be responsible, in
4 conjunction with the medical staff, for recommending to the governing
5 body privileges to those persons qualified to administer anesthetics,
6 including the procedures each person is qualified to perform and the
7 levels of required supervision as appropriate.

8 (b) In office based surgery venues, "administration of anesthesia
9 services" means the anesthesia component of the medical or dental proce-
10 dure shall be supervised by an anesthesiologist, physician, dentist or
11 podiatrist qualified to supervise the administration of anesthesia and
12 who is available to immediately diagnose and treat the patient for anes-
13 thesia complications or emergencies, and certified registered nurse
14 anesthetists may be permitted to administer monitored anesthesia care,
15 and/or general anesthesia, regional anesthesia, and/or monitor the
16 patient.

17 2. "General anesthesia" means the administration of a medication by
18 the parenteral or inhalation routes which results in a controlled state
19 of unconsciousness accompanied by a complete loss of protective reflexes
20 including loss of the ability to independently and continuously maintain
21 patient airway and a regular breathing pattern. There is also an
22 inability to respond purposefully to verbal commands and/or tactile
23 stimulation.

24 3. "Local anesthesia" means the introduction of a local anesthetic
25 agent into a localized part of the body by topical application or local
26 infiltration in close proximity to a nerve, which produces a transient
27 and reversible loss of sensation. All local anesthetics possess both

29 nervous system effects in sufficient blood levels and may have profound
30 cardiovascular depressant effects. There may also be interactive
31 effects between local anesthetic agents and sedative medications.

32 4. "Monitored anesthesia care" means (a) A minimally depressed level
33 of consciousness that retains the patient's ability to maintain adequate
34 cardiorespiratory function and the ability to independently and contin-
35 uously maintain an open airway, a regular breathing pattern, protective
36 reflexes, and respond purposefully and rationally to tactile stimulation
37 and verbal command. This does not include unsupplemented oral pre-opera-
38 tive medications or nitrous oxide analgesia; or

39 (b) The administration of medication by the oral, parenteral, or inha-
40 lation routes which results in a controlled state of depressed
41 consciousness accompanied by partial loss of protective reflexes. There
42 may be an inability to independently and continuously maintain an open
43 airway and/or regular breathing pattern with unconscious or deep
44 sedation, and the ability to appropriately and rationally respond to
45 physical stimuli and verbal commands is lost.

46 5. "Monitoring" means the continual clinical observation of a patient
47 and the use of instruments to measure, display, and record the values of
48 certain physiologic variables such as pulse, oxygen saturation, level of
49 consciousness, blood pressure, and respiration.

50 6. "Office-based surgery" means any surgical or other invasive proce-
51 dure, requiring general anesthesia, monitored anesthesia care, and any
52 liposuction procedure, where such surgical or other invasive procedure
53 or liposuction is performed by a licensee in a location other than a
54 hospital, as such term is defined in article twenty-eight of the public
55 health law, excluding minor procedures and procedures requiring minimal
56 sedation.

7. "Patient" means an individual who is under the care of a physician, dentist, oral surgeon or podiatrist in a licensed facility or in an office.

8. "Peri-anesthetic period" means the period of time commencing upon the pre-operative evaluation of the patient before surgery and ending upon the patient's post-operative discharge from the recovery room.

9. "Regional anesthesia" means the administration of local anesthesia agents to interrupt nerve impulses in a major region of the body; including but not limited to in this category are spinal, epidural, caudal, upper or lower extremity plexus block anesthesia, and intravenous regional anesthesia.

10. "Supplemented local anesthesia" means the use of local anesthesia supplemented with monitored anesthesia care.

11. "Unsupplemented local anesthesia" means the use of local anesthesia without supplementing with monitored anesthesia care.

2. Nurse anesthesia must be provided in collaboration with a licensed physician qualified to determine the need for anesthesia services, provided such services are performed in accordance with a written practice agreement and written practice protocols as set forth in subdivision four of this section or pursuant to collaborative relationships as set forth in subdivision five of this section, whichever is applicable.

3. Prescriptions for drugs, devices, and anesthetic agents, anesthesia related agents, and pain management agents may be issued by a certified registered nurse anesthetist during the peri-anesthetic period, in accordance with the written practice agreement and written practice protocols described in subdivision four of this section if applicable. The certified registered nurse anesthetist shall obtain a certificate from the department upon successfully completing a program including an appropriate pharmacology component, or its equivalent, as established by

1 the commissioner's regulations, prior to prescribing under this subdivi-
2 sion. The license issued under this article shall state whether the
3 certified registered nurse anesthetist has successfully completed such a
4 program or equivalent and is authorized to prescribe under this subdivi-

14 of anesthesia or pain management treatment that is within the scope of
15 practice of both. To the extent the practice agreement does not so
16 provide, then the collaborating physician's treatment shall prevail.

17 (b) Each practice agreement shall provide for patient records review
18 by the collaborating physician in a timely fashion but in no event less
19 often than every three months. The names of the certified registered
20 nurse anesthetist and the collaborating physician shall be clearly post-
21 ed in the practice setting of the certified registered nurse anes-

42 services and having privileges at such hospital, for the purposes of
43 exchanging information, as needed, in order to provide comprehensive
44 patient care and to make referrals as necessary.

45 (b) As evidence that the certified registered nurse anesthetist main-
46 tains collaborative relationships, the certified registered nurse
47 anesthetist shall complete and maintain a form, created by the depart-
48 ment, to which the certified registered nurse anesthetist shall attest,
49 that describes such collaborative relationships. Such form shall also
50 reflect the certified registered nurse anesthetist's acknowledgement
51 that if reasonable efforts to resolve any dispute that may arise with
52 the collaborating physician or, in the case of a collaboration with a
53 hospital, with a licensed physician qualified to determine the need for
54 anesthesia services and having privileges at such hospital, about a
55 patient's care are not successful, the recommendation of the physician
56 shall prevail. Such form shall be updated as needed and may be subject

1 to review by the department. The certified registered nurse anesthetist
