FISCAL NOTE. -- Pursuant to Legislative Law, Section 50:

This bill would allow retirement at age 50 for certain members of the New York State and Local Employees' Retirement System, New York State Teachers Retirement System, New York City Teachers Retirement System, New York City Board of Education and the New York City Employees' Retirement System who have accrued at least 25 years of creditable service. It would also eliminate the early retirement reductions for members who have attained age 55 and have accrued at least 10 years of creditable service.

The exact number of members who would be affected by this cannot be readily determined.

If this bill is enacted during the 2021 legislative session, the additional cost for each member who receives these benefits will vary depending on the member's age, years of service, plans and final average salary. Eliminating the early age reductions for members retiring after attaining age 55 with at least 10 years of service credit is estimated to cost (on average for the group) 160% of the member's final average salary. Extending retirement eligibility to members who have attained age 50 with at least 25 years of service credit is estimated to cost (on average for the group) 160% of the member's final average salary. The estimated costs are identical. The final costs will be borne by each employer electing the incentive.

FISCAL NOTE. -- Pursuant to Legislative Law, Section 50:

This bill (legislative bill draft 03546-01-1) would provide a temporary retirement incentive to retirement system members throughout the state and NYC during fiscal year 2021-2022. This fiscal note concerns its impact on the New York State Teachers' Retirement System. This incentive would permit eligible members to retire without an early retirement reduction upon attainment of at least age 50 with 25 years of service, or at least age 55 with 10 years of service. Currently attainment of at least age 55 with 30 years of service, or at least age 62 with five years of service are required in order to retire without reduction for Tiers 2, 3 and 4 members. Tier 5 members currently must be at least age 57 with 30 years of service, or at least age 62 with ten years of service in order to retire without reduction. Currently Tier 6 members are required to attain age 63 with ten years of service in order to retire without reduction. In order to receive this benefit, a member of an employer who has elected to participate must retire during the designated open period, beginning on or after July 15, 2021 and not extending beyond October 15, 2021. Chief administrative officers of educational employers are not eligible to participate in this retirement incentive. Employers who elect to participate would pay the cost of the retirement incentive over a period not to exceed five years, beginning in the state fiscal year ending March 31, 2023.

The estimated increase in the present value of benefits due to this temporary retirement incentive is approximately \$1.118 billion. The estimated annual cost, over a five-year period, to the participating employers of members of the New York State Teachers' Retirement System for this retirement incentive benefit is estimated to be \$298.6 million, or 1.76% of payroll if this bill is enacted. Employers who elect to participate in this retirement incentive will be billed for their individual members who retire under the incentive.

Member data is from the System's most recent actuarial valuation files, consisting of data provided by the employers to the Retirement System. Data distributions and statistics can be found in the System's Comprehensive Annual Financial Report (CAFR). System assets are as reported in the System's financial statements, and can also be found in the CAFR. Actuarial assumptions and methods are provided in the System's S. 5559

Actuarial Valuation Report except rates of retirement have been modified to reflect anticipated participation in the incentive.

FISCAL NOTE. -- Pursuant to Legislative Law, Section 50:

SUMMARY OF BILL: This proposed legislation, as it relates to the New York City Retirement Systems (NYCRS), would provide for a temporary Early Retirement Incentive Program (ERI Program) to allow certain members of the New York City Employees' Retirement System (NYCERS), the New York City Teachers' Retirement System (TRS), and the New York City Board of Education Retirement System (BERS), who meet enumerated criteria, to elect immediate unreduced retirement.

The ERI Program is contingent upon a participating employer electing the ERI on or before September 1, 2021, but no later than 90 days after the effective date of the proposed legislation. Eligible NYCRS members would have a 90-day open period following the commencement date to retire under the ERI Program which would remove the application of early retirement reduction factors contained in Articles 11 and 15 for qualifying members.

A member is eligible to participate in the ERI Program if he or she is age 50 or older and has at least 25 years of service, or is age 55 or older and has at least 10 years of service. In addition, members must also:

Be in continuous active service from February 1, 2021 to the date immediately preceding the commencement date of the open period;

File for service retirement that is effective within the open period.

For purposes of this Fiscal Note, members covered by Article 14 are assumed to not benefit from the proposed legislation and have therefore been excluded.

Effective Date: Upon enactment

FINANCIAL IMPACT - OVERVIEW: There is no credible data available to estimate the number of members who will retire under the ERI Program and potentially benefit from this proposed legislation. Therefore, the estimated financial impact has been calculated on a per event basis equal to the average increase in the Present Value of future employer contributions and in the annual employer contributions for members who would benefit from the proposed legislation.

The Present Value of future employer contributions is the net result of the increase in the Present Value of Future Benefits (PVFB) and the decrease in the Present Value of future member contributions.

For the purposes of this Fiscal Note, the increase in Present Value of future employer contributions was amortized over a five-year period (four payments under the One-Year Lag Methodology (OYLM)) using level dollar payments, the maximum allowable period under the proposed legislation. This amortized value is the estimated increase in annual employer contributions.

There will also be future savings in Employer Contributions assuming that these members are not replaced. This additional savings is not included here. S. 5559

With respect to an individual member, the additional cost of this proposed legislation could vary greatly depending on the member's length of service, age, and salary history.

FINANCIAL IMPACT - SUMMARY: Based on the census data and the actuarial assumptions and methods described herein, the enactment of this proposed legislation would result in an increase in the Present Value of Employer Contributions and annual employer contributions. The estimated pension financial impact has been calculated as the average increase per person. A breakdown of the financial impact by NYCRS is shown in the table below:

NYCRS	Additional Present Value of Future Employer Contributions (\$ Per Person)	Estimated Annual Employer Contributions (\$ Per Person)
NYCERS	\$101,400	\$31,000
TRS	51,400	15,700
BERS	79,400	24,200
Average	\$89,300	\$27,300

CONTRIBUTION TIMING: For the purposes of this Fiscal Note, it is assumed that the changes in the Present Value of future employer contributions and annual employer contributions would be reflected for the first time in the Final June 30, 2020 actuarial valuations of NYCERS, TRS, and BERS. In accordance with the OYLM used to determine employer contributions, the increase in employer contributions would first be reflected in Fiscal Year 2022.

CENSUS DATA: For purposes of this Fiscal Note, it was assumed that the census data had the same age, gender, and service characteristics as the census data used in the Preliminary June 30, 2019 (Lag) actuarial valuations of NYCERS, TRS, and BERS to determine the Preliminary Fiscal Year 2021 employer contributions. Active members' salaries have been adjusted to reflect estimated salary increases from June 30, 2019 to June 30, 2020.

The table below contains the census data for members who meet the eligibility requirements and would be impacted by the proposed legislation (Potential Elections), and for a subset of those members who would benefit actuarially (Assumed to Elect).

	Census Data					
Potential Elections	Count	Avg Age	Avg Svc	Avg Salary		
NYCERS	24,764	56.8	23.7	\$86,900		
TRS	12,555	56.5	20.3	99,600		
BERS	2,147	57.1	20.1	63,300		
Total	39,466	56.7	22.4	\$89,700		
Assumed to Elect	Count	Avg Age	Avg Svc	Avg Salary		
NYCERS	18,237	56.7	26.7	\$88,000		
TRS	5,537	55.2	25.2	109,400		
BERS	1,034	57.5	25.8	67,800		
Total	24,808	56.4	26.3	\$91,900		

ACTUARIAL ASSUMPTIONS AND METHODS: The changes in the Present Value of future employer contributions and annual employer contributions

presented herein have been calculated based on the actuarial assumptions and methods in effect for the June 30, 2019 (Lag) actuarial valuations used to determine the Preliminary Fiscal Year 2021 employer contributions of NYCERS, TRS, and BERS.

The Actuary is proposing a set of changes for use in the June 30, 2019 (Lag) actuarial valuations of NYCRS to determine the Final Fiscal Year 2021 Employer Contributions (2021 A&M). If the 2021 A&M is enacted it is estimated that it would produce increases in the Present Value of Employer Contributions and annual employer contributions that are approximately 1.5% larger than the results shown above.

To determine the impact of the elective nature of the proposed legislation, a subgroup based on who could potentially benefit actuarially was used. The Present Value of future employer costs (i.e. the PVFB less the Present Value of future member contributions) of each member's benefit was determined under their current plan and as if retiring immediately under the ERI Program. If the Present Value of future employer cost under the ERI Program was greater than or equal to the Present Value of future employer cost under the member's current plan, then the member was deemed to benefit actuarially.

Based on this analysis, the costs presented in this Fiscal Note are borne only from current NYCERS, TRS, and BERS members who are assumed to benefit from, and thus opt to retire under the ERI Program.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the realization of the actuarial assumptions used, as well as certain demographic characteristics of NYCERS, TRS, and BERS, and other exogenous factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Costs are also dependent on the actuarial methods used, and therefore different actuarial methods could produce different results. Quantifying these risks is beyond the scope of this Fiscal Note.

Not measured in this Fiscal Note are the following:

The offsetting reduction in salary due to retirements earlier than expected.

The impact of potential new hires replacing members who retire due to the ERI Program.

The initial, additional administrative costs to implement the proposed legislation.

The impact of this proposed legislation on Other Postemployment Benefit (OPEB) costs.
