

STATE OF NEW YORK

6251--B

2021-2022 Regular Sessions

IN ASSEMBLY

March 10, 2021

Introduced by M. of A. CARROLL, FORREST, MITAYNES, SIMON, MAMDANI, COLTON, DINOWITZ, KELLES, DAVILA, GOTTFRIED, L. ROSENTHAL, SEPTIMO -- read once and referred to the Committee on Environmental Conservation -- recommitted to the Committee on Environmental Conservation in accordance with Assembly Rule 3, sec. 2 -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee -- again reported from said committee with amendments, ordered reprinted as amended and recommitted to said committee

AN ACT to amend the environmental conservation law, in relation to establishing the "pollution justice act of 2022" and implementing a plan to replace peaker plants with renewable energy systems

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. This act shall be known and may be cited as the "pollution justice act of 2022".

§ 2. Article 19 of the environmental conservation law is amended by adding a new title 13 to read as follows:

TITLE 13

PEAKER PLANTS

Section 19-1301. Statement of findings.

19-1303. Definitions.

19-1305. Mandatory replacement and compliance plan.

19-1307. Extensions for cause.

19-1309. Prohibitions.

19-1311. Exemptions.

§ 19-1301. Statement of findings.

1. Electric generating units that generally operate during periods of peak electricity demand are known as peaker plants. Many peaker plants in the state are older fossil fuel-fired units that emit greenhouse gases and a variety of other harmful air pollutants including sulfur oxides, nitrogen oxides, particulates and mercury.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD04461-06-2

2. A substantial number of peaker plants are located in or adjacent to disadvantaged communities in the city of New York that already bear disproportionate pollution burdens due to a history of siting pollution sources in those communities.

3. Pollutants from peaker plants contribute to significant public health problems. According to the New York city department of health and mental hygiene's air pollution and the health of New Yorkers report: "each year, PM2.5 pollution in (New York city) causes more than 3,000 deaths, 2,000 hospital admissions for lung and heart conditions, and approximately 6,000 emergency department visits for asthma in children and adults." According to the report, each year exposures to ozone concentrations above background levels cause an estimated "400 premature deaths, 850 hospitalizations for asthma and 4,500 emergency department visits for asthma."

4. Peaker plants often operate during summer months when air pollution levels are highest and their emissions add to existing pollution burdens in disadvantaged communities and contribute to adverse health effects in those communities from air pollution.

§ 19-1303. Definitions.

1. "Adjacent to" shall mean within a radius of one mile from the plant property boundary.

2. "Disadvantaged community" shall have the same meaning as in subdivision five of section 75-0101 of this chapter.

3. "Operating permit" shall have the meaning set forth in subdivision eighteen of section 19-0107 of this article.

4. "Renewable energy systems" shall have the meaning set forth in section sixty-six-p of the public service law and may also include firm zero emission resources such as long-duration energy storage.

5. "Replace" or "replacement" means the construction and operation of a renewable energy system or transmission and distribution infrastructure that enables the provision of the equivalent maximum annual power output achieved by the replaceable peaker plant during any single year during the ten years preceding the submission of an application to renew an operating permit.

6. "Replaceable peaker plant" means a major electric generating facility as defined in paragraph b of subdivision one of section 19-0312 of this article that burns coal, oil, diesel or natural gas and was operational and generated electricity less than fifteen percent of the year during at least two years between two thousand ten through two thousand nineteen and that is located in or adjacent to a disadvantaged community.

§ 19-1305. Mandatory replacement and compliance plan.

1. The owner or operator of a replaceable peaker plant in a city with a population of one million or more, within or adjacent to a disadvantaged community, shall submit to the department as part of an application to issue an operating permit or renew an operating permit, a mandatory replacement and compliance plan that shall include, at a minimum, the following:

a. The number of days and hours such plant operated during each of the previous ten years;

b. The annual power output of such plant for each of the previous ten years;

c. The fuel or fuels utilized by such plant to generate power;

d. A proposed strategy to replace the plant with renewable energy systems. The strategy shall, at a minimum, set forth the type or types of renewable energy systems to be utilized, the proposed location or

1 locations of such renewable energy systems, and the electric generating
2 capacity of such renewable energy systems;

3 e. A timetable for implementation of the proposed replacement strategy
4 that shall not exceed five years from the date of renewal of the operat-
5 ing permit and that shall ensure that the renewable energy systems are
6 fully operational, and the operations of the peaker plant can be
7 completely replaced, on or before five years from the date of renewal of
8 the operating permit; and

9 f. A demonstration of how the proposed renewable energy systems and
10 timetable for implementation will comply with the renewable energy goals
11 set forth in section sixty-six-p of the public service law.

12 2. The department shall provide public notice of the mandatory
13 replacement and compliance plan and an opportunity for public comment on
14 the plan of not less than sixty days. The department shall hold at least
15 two public hearings on the plan in the affected disadvantaged community
16 or communities that provide meaningful opportunities for public partic-
17 ipation and maximize participation and accessibility.

18 3. After review and consideration of public comments, the department
19 shall approve, approve with modifications or disapprove the plan.

20 4. Upon approval of the mandatory replacement and compliance plan, the
21 owner or operator of the replaceable peaker plant shall implement the
22 plan in accordance with the schedule set forth in the plan and provide
23 to the department an annual compliance and progress report beginning one
24 year after the department approves the plan. The department shall make
25 each annual compliance and progress report available on its website.

26 5. If the department disapproves a proposed plan, the department shall
27 inform the owner or operator of the replaceable peaker plant in writing
28 of the reasons for such disapproval and shall identify the portions of
29 the disapproved plan that need to be modified. The owner or operator
30 shall submit a modified plan within sixty days of receiving the depart-
31 ment's written notice of disapproval. The modified plan shall be subject
32 to the notice and public comment and hearing procedures set forth in
33 this section.

34 § 19-1307. Extensions for cause.

35 1. The owner or operator of a replaceable peaker plant may apply to
36 the department for a single five-year extension of the deadline for
37 replacement set forth in section 19-1305 of this title.

38 2. The department shall provide public notice of the application for
39 any such extension, and an opportunity for public comment on such appli-
40 cation, of not less than sixty days. The department shall hold at least
41 two public hearings on the application in the affected disadvantaged
42 community or communities that provide meaningful opportunities for
43 public participation and maximize participation and accessibility.

44 3. After review and consideration of public comments, the department
45 shall approve, approve with modifications, or disapprove the application
46 for a single five-year extension.

47 4. The department may only grant an application for an extension
48 request upon a showing by the applicant, by clear and convincing
49 evidence, that (a) replacement of the plant with renewable energy
50 systems by the deadline is not feasible, (b) the department of public
51 service, in consultation with the New York independent system operator,
52 has made a written determination that extending the deadline for the
53 plant is necessary to maintain reliability of the electric grid, and (c)
54 the continued operation of the peaker plant would not result in adverse
55 health impacts for the impacted disadvantaged communities.

56 § 19-1309. Prohibitions.

1 1. No person shall operate a replaceable peaker plant that is not in
2 compliance with the requirements of this title and the department shall
3 not issue an operating permit or renew an operating permit for a
4 replaceable peaker plant that does not have an approved mandatory
5 replacement and compliance plan.

6 2. The department shall not issue an operating permit or renew an
7 operating permit for a replaceable peaker plant that has not completed
8 implementation of a mandatory replacement and compliance plan by the
9 deadline set forth in the plan.

10 § 19-1311. Exemptions.

11 1. A replaceable peaker plant is not subject to the requirements of
12 this title if the owner or operator of the plant has submitted written
13 notification to the department of public service that the plant will be
14 permanently retired on or before the first day of January, two thousand
15 twenty-seven.

16 2. The department shall, effective on or before the first day of Janu-
17 ary, two thousand twenty-seven, revoke the operating permit of a
18 replaceable peaker plant for which written notification has been
19 provided to the department of public service pursuant to subdivision one
20 of this section.

21 § 3. This act shall take effect on the one hundred eightieth day after
22 it shall have become a law and shall apply to all permit applications or
23 renewals on or after such date.
