STATE OF NEW YORK

7199

2021-2022 Regular Sessions

IN ASSEMBLY

April 29, 2021

Introduced by M. of A. THIELE -- read once and referred to the Committee on Education

AN ACT to amend the education law, in relation to the definition of a student with a disability

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Subdivision 1 of section 4401 of the education law, as 2 amended by chapter 378 of the laws of 2007, is amended to read as 3 follows:

1. A "child with a disability" or "student with a disability" means a 4 5 person under the age of twenty-one who is entitled to attend public schools pursuant to section thirty-two hundred two of this chapter and б 7 who, because of mental, physical or emotional reasons can only receive 8 appropriate educational opportunities from a program of special educa-9 tion. Such term does not include a child whose educational needs are due 10 primarily to unfamiliarity with the English language, environmental, cultural or economic factors. Lack of appropriate instruction in read-11 ing, including in the essential components of reading instruction as 12 13 defined in subsection three of section twelve hundred eight of the 14 elementary and secondary education act of nineteen hundred sixty-five, 15 or lack of appropriate instruction in mathematics or limited English 16 proficiency shall not be the determinant factor in identifying a student as a student with a disability. Such disabilities shall include but not 17 18 be limited to:

19 (a) Autism means a developmental disability significantly affecting 20 verbal and nonverbal communication and social interaction, generally 21 evident before age three, that adversely affects a student's educational 22 performance. Other characteristics often associated with autism are 23 engagement in repetitive activities and stereotyped movements, resist-24 ance to environmental change or change in daily routines, and unusual 25 responses to sensory experiences. The term does not apply if a student's

EXPLANATION--Matter in <u>italics</u> (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD11131-01-1

_	
1	educational performance is adversely affected primarily because the
2	student has an emotional disturbance as defined in paragraph (d) of this
3	subdivision. A student who manifests the characteristics of autism after
4	age three could be diagnosed as having autism if the criteria in this
5	<u>paragraph are otherwise satisfied.</u>
6	(b) Deafness means a hearing impairment that is so severe that the
7	student is impaired in processing linguistic information through hear-
8	ing, with or without amplification, that adversely affects a student's
9	educational performance.
10	(c) Deaf-blindness means concomitant hearing and visual impairments,
11	the combination of which causes such severe communication and other
12	developmental and educational needs that they cannot be accommodated in
13	special education programs solely for students with deafness or students
14	with blindness.
15	(d) Emotional disturbance means a condition exhibiting one or more of
16	the following characteristics over a long period of time and to a marked
17	degree that adversely affects a student's educational performance:
18	(1) an inability to learn that cannot be explained by intellectual,
19	sensory, or health factors;
20	(2) an inability to build or maintain satisfactory interpersonal
21	relationships with peers and teachers;
22	(3) inappropriate types of behavior or feelings under normal circum-
23	stances;
24	(4) a generally pervasive mood of unhappiness or depression; or
25	(5) a tendency to develop physical symptoms or fears associated with
26	personal or school problems. The term includes schizophrenia. The term
27	does not apply to students who are socially maladjusted, unless it is
28	determined that they have an emotional disturbance.
	accermined that they have an emotional appearbance.
	(e) Hearing impairment means an impairment in hearing, whether perma-
29	(e) Hearing impairment means an impairment in hearing, whether perma-

(h) Multiple disabilities means concomitant impairments (such as intellectual disability-blindness, intellectual disability-orthopedic impairment, etc.), the combination of which cause such severe education program solely for one of the impairments. The term does not include deaf-blindness. (i) Orthopedic impairment means a severe orthopedic impairment that
29012333345678901223456789012	 (e) Hearing impairment means an impairment in hearing, whether permanent or fluctuating, that adversely affects the child's educational performance but that is not included under the definition of deafness in this section. (f) Learning disability means a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which manifests itself in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations. The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, and developmental aphasia. The term does not include learning problems that are primarily the result of visual, hearing or motor disabilities, of an intellectual disability, of emotional disturbance, or of environmental, cultural or economic disadvantage. (g) Intellectual disability means significantly subaverage general intellectual functioning, existing concurrently with deficits in adaptive behavior and manifested during the developmental period, that adversely affects a student's educational performance. (h) Multiple disabilities means concomitant impairments (such as intellectual disability-olindness, intellectual disability-orthopedic impairment, etc.), the combination of which cause such severe educational performances.

1	bone tuberculosis, etc.), and impairments from other causes (e.g., cere-
2	bral palsy, amputation, and fractures or burns which cause contrac-
3	tures).
4	(j) Other health-impairment means having limited strength, vitality or
5	alertness, including a heightened alertness to environmental stimuli,
б	that results in limited alertness with respect to the educational envi-
7	ronment, that is due to chronic or acute health problems, including but
8	not limited to a heart condition, tuberculosis, rheumatic fever, nephri-
9	tis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning,
10	leukemia, diabetes, attention deficit disorder or attention deficit
11	hyperactivity disorder or tourette syndrome, which adversely affects a
12	student's educational performance.
13	(k) Speech or language impairment means a communication disorder, such
14^{-10}	as stuttering, impaired articulation, a language impairment or a voice
15	impairment, that adversely affects a student's educational performance.
16	(1) Traumatic brain injury means an acquired injury to the brain
17	caused by an external physical force or by certain medical conditions
18	such as stroke, encephalitis, aneurysm, and anoxia or brain tumors with
19	resulting impairments that adversely affect educational performance. The
20	term includes open or closed head injuries or brain injuries from
21	certain medical conditions resulting in mild, moderate or severe impair-
22	ments in one or more areas, including cognition, language, memory,
23	attention, reasoning, abstract thinking, judgment, problem solving,
24	sensory, perceptual and motor abilities, psychosocial behavior, physical
25	functions, information processing, and speech. The term does not include
26	injuries that are congenital or caused by birth trauma.
20 27	(m) Visual impairment including blindness means an impairment in
28	vision that, even with correction, adversely affects a student's educa-
29	tional performance. The term includes both partial sight and blindness.
30	(n) Dyslexia means a specific learning disability that is neurobiolog-
31	ical in origin. It is characterized at the level of a keen observer as
32	frustration, withdrawal, anxiety, aversion to homework and schoolwork,
33	underperformance, and an undoing of the personal sense of ability,
34	psycho-somatic symptoms that are triggered by school-failure to read or
35	perform well at spelling, written expression or other language tasks, or
36	mixing up right and left hands. Other observable characteristics
37	include difficulties with accurate and/or fluent word recognition and by
38	poor spelling and decoding abilities. These difficulties typically
39	result from a deficit in the phonological component of language that is
40	often unexpected in relation to other cognitive abilities and the
40 41	provision of effective classroom instruction. Secondary consequences may
42 42	include problems in reading comprehension and reduced reading experience
42 43	that can impede growth of vocabulary and background knowledge.
43 44	<u>1-a.</u> "Special education" means specially designed instruction which
45	includes special services or programs as delineated in subdivision two
46	of this section, and transportation, provided at no cost to the parents
40 47	to meet the unique needs of a child with a disability. A "child with a
49 48	handicapping condition " means a child with a disability. A child with a handicapping condition " means a child with a disability.
40 49	§ 2. Subdivision 1 of section 4401 of the education law, as amended by
50 51	chapter 311 of the laws of 1999, is amended to read as follows:
51 52	1. A "child with a disability" or "student with a disability" means a
52 52	person under the age of twenty-one who is entitled to attend public
53 E4	schools pursuant to section thirty-two hundred two of this chapter and
54 55	who, because of mental, physical or emotional reasons can only receive
55	appropriate educational opportunities from a program of special educa-
56	tion. Such term does not include a child whose educational needs are due

primarily to unfamiliarity with the English language, environmental, 1 cultural or economic factors. Lack of instruction in reading or math-2 ematics or limited English proficiency shall not be the determinant 3 4 factor in identifying a student as a student with a disability. Such 5 disabilities shall include but not be limited to: б (a) Autism means a developmental disability significantly affecting 7 verbal and nonverbal communication and social interaction, generally 8 evident before age three, that adversely affects a student's educational 9 performance. Other characteristics often associated with autism are 10 engagement in repetitive activities and stereotyped movements, resist-11 ance to environmental change or change in daily routines, and unusual responses to sensory experiences. The term does not apply if a student's 12 13 educational performance is adversely affected primarily because the 14 student has an emotional disturbance as defined in paragraph (d) of this 15 subdivision. A student who manifests the characteristics of autism after 16 age three could be diagnosed as having autism if the criteria in this 17 paragraph are otherwise satisfied. (b) Deafness means a hearing impairment that is so severe that the 18 19 student is impaired in processing linguistic information through hear-20 ing, with or without amplification, that adversely affects a student's 21 educational performance. (c) Deaf-blindness means concomitant hearing and visual impairments, 22 the combination of which causes such severe communication and other 23 developmental and educational needs that they cannot be accommodated in 24 25 special education programs solely for students with deafness or students 26 with blindness. 27 (d) Emotional disturbance means a condition exhibiting one or more of the following characteristics over a long period of time and to a marked 28 29 degree that adversely affects a student's educational performance: 30 (1) an inability to learn that cannot be explained by intellectual, 31 sensory, or health factors; 32 (2) an inability to build or maintain satisfactory interpersonal 33 relationships with peers and teachers; (3) inappropriate types of behavior or feelings under normal circum-34 35 stances; 36 (4) a generally pervasive mood of unhappiness or depression; or 37 (5) a tendency to develop physical symptoms or fears associated with 38 personal or school problems. The term includes schizophrenia. The term does not apply to students who are socially maladjusted, unless it is 39 40 determined that they have an emotional disturbance. (e) Hearing impairment means an impairment in hearing, whether perma-41 42 nent or fluctuating, that adversely affects the child's educational 43 performance but that is not included under the definition of deafness in 44 this section. 45 (f) Learning disability means a disorder in one or more of the basic 46 psychological processes involved in understanding or in using language, spoken or written, which manifests itself in an imperfect ability to 47 listen, think, speak, read, write, spell, or to do mathematical calcu-48 lations. The term includes such conditions as perceptual disabilities, 49 brain injury, minimal brain dysfunction, and developmental aphasia. The 50 51 term does not include learning problems that are primarily the result of visual, hearing or motor disabilities, of an intellectual disability, of 52 53 emotional disturbance, or of environmental, cultural or economic disad-54 vantage. (q) Intellectual disability means significantly subaverage general 55

55 (g) Intellectual disability means significantly subaverage general 56 intellectual functioning, existing concurrently with deficits in adap-

4

1	tive behavior and manifested during the developmental period, that
2	adversely affects a student's educational performance.
3	(h) Multiple disabilities means concomitant impairments (such as
4	intellectual disability-blindness, intellectual disability-orthopedic
5	impairment, etc.), the combination of which cause such severe educa-
6	tional needs that they cannot be accommodated in a special education
7	program solely for one of the impairments. The term does not include
8	deaf-blindness.
9	(i) Orthopedic impairment means a severe orthopedic impairment that
10	adversely affects a student's educational performance. The term includes
11	impairments caused by congenital anomaly (e.g., clubfoot, absence of
12	some member, etc.), impairments caused by disease (e.g., poliomyelitis,
13	bone tuberculosis, etc.), and impairments from other causes (e.g., cere-
14	bral palsy, amputation, and fractures or burns which cause contrac-
15	tures).
16	(j) Other health-impairment means having limited strength, vitality or
17	alertness, including a heightened alertness to environmental stimuli,
18	that results in limited alertness with respect to the educational envi-
19	ronment, that is due to chronic or acute health problems, including but
20	not limited to a heart condition, tuberculosis, rheumatic fever, nephri-
21	tis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning,
22	leukemia, diabetes, attention deficit disorder or attention deficit
23	hyperactivity disorder or tourette syndrome, which adversely affects a
24	student's educational performance.
25	(k) Speech or language impairment means a communication disorder, such
26	as stuttering, impaired articulation, a language impairment or a voice
27	impairment, that adversely affects a student's educational performance.
28	(1) Traumatic brain injury means an acquired injury to the brain
29	caused by an external physical force or by certain medical conditions
30	such as stroke, encephalitis, aneurysm, and anoxia or brain tumors with
31	resulting impairments that adversely affect educational performance. The
32	term includes open or closed head injuries or brain injuries from
33	certain medical conditions resulting in mild, moderate or severe impair-
34	ments in one or more areas, including cognition, language, memory,
35	attention, reasoning, abstract thinking, judgment, problem solving,
36	sensory, perceptual and motor abilities, psychosocial behavior, physical
37	functions, information processing, and speech. The term does not include
38	injuries that are congenital or caused by birth trauma.
39	(m) Visual impairment including blindness means an impairment in
40	vision that, even with correction, adversely affects a student's educa-
41	tional performance. The term includes both partial sight and blindness.
42	(n) Dyslexia means a specific learning disability that is neurobiolog-
43	ical in origin. It is characterized at the level of a keen observer as
44	frustration, withdrawal, anxiety, aversion to homework and schoolwork,
45	underperformance, and an undoing of the personal sense of ability,
46	psycho-somatic symptoms that are triggered by school-failure to read or
47	perform well at spelling, written expression or other language tasks, or
48	mixing up right and left hands. Other observable characteristics
49	include difficulties with accurate and/or fluent word recognition and by
50	poor spelling and decoding abilities. These difficulties typically
51	result from a deficit in the phonological component of language that is
52	often unexpected in relation to other cognitive abilities and the
53	provision of effective classroom instruction. Secondary consequences may
54	include problems in reading comprehension and reduced reading experience
55	that can impede growth of vocabulary and background knowledge.

1 <u>1-a.</u> "Special education" means specially designed instruction which 2 includes special services or programs as delineated in subdivision two 3 of this section, and transportation, provided at no cost to the parents 4 to meet the unique needs of a child with a disability. A "child with a 5 handicapping condition" means a child with a disability.

6 § 3. This act shall take effect immediately; provided, however, that 7 it shall not affect any student's individualized education program that 8 has been approved for the 2021-2022 school year; provided, further, that 9 the amendments to subdivision 1 of section 4401 of the education law 10 made by section one of this act shall be subject to the expiration and 11 reversion of such subdivision pursuant to section 22 of chapter 352 of 12 the laws of 2005, as amended, when upon such date the provisions of 13 section two of this act shall take effect.
