

# STATE OF NEW YORK

2835

2021-2022 Regular Sessions

## IN SENATE

January 25, 2021

Introduced by Sen. SANDERS -- read twice and ordered printed, and when printed to be committed to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to declaring a climate emergency and placing a ban on new fossil fuel infrastructure

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. The environmental conservation law is amended by adding a  
2 new section 1-0103 to read as follows:

3 § 1-0103. Climate emergency declaration and policy.

4 1. The legislature finds and declares the following:

5 (a) A climate emergency exists that threatens the state of New York,  
6 the nation, and the world;

7 (b) Irrevocable damage to the environment has been caused by global  
8 warming of approximately one degree celsius demonstrating that the earth  
9 is already too hot for safety and justice, as attested by increased and  
10 intensifying wildfires, floods, rising seas, diseases, droughts, and  
11 extreme weather;

12 (c) On April twenty-second, two thousand sixteen, world leaders from  
13 one hundred seventy-four countries and the European Union recognized the  
14 threat of climate change and the urgent need to combat it by signing the  
15 Paris Agreement, agreeing to keep warming well below two degrees celsius  
16 above pre-industrial levels and to pursue efforts to limit the temper-  
17 ature increase to one and one-half degrees fahrenheit;

18 (d) On October eighth, two thousand eighteen, the United Nations  
19 International Panel on Climate Change ("IPCC") released a special  
20 report, which projected that limiting warming to the one and one-half  
21 degrees celsius target this century will require an unprecedented trans-  
22 formation of every sector of the global economy over the next twelve  
23 years;

EXPLANATION--Matter in italics (underscored) is new; matter in brackets  
[-] is old law to be omitted.

LBD05256-01-1

1 (e) On November twenty-third, two thousand eighteen, the United States  
2 Fourth National Climate Assessment ("NCA4") was released and details the  
3 massive threat that climate change poses to the American economy, our  
4 environment and climate stability, and underscores the need for immedi-  
5 ate climate emergency action at all levels of government;

6 (f) According to the National Aeronautics and Space Administration's  
7 (NASA) Goddard Institute for Space Studies (GISS), global temperatures  
8 in two thousand eighteen were eighty-three one-hundredths degrees celsi-  
9 us (one and one-half degrees fahrenheit) warmer than the nineteen  
10 hundred fifty-one to nineteen hundred eighty mean, and the past five  
11 years are collectively the warmest in modern history;

12 (g) World Wildlife Fund's 2018 Living Planet report finds that there  
13 has been a sixty per centum decline in global wildlife populations  
14 between nineteen hundred seventy and two thousand fourteen, with causes  
15 including overfishing, pollution and climate change;

16 (h) According to the intergovernmental science-policy platform on  
17 biodiversity and ecosystem services, human activity has already severely  
18 altered forty per centum of the marine environment, fifty per centum of  
19 inland waterways, and seventy-five per centum of the planet's land, and  
20 it is projected that five hundred thousand to one million species are  
21 threatened with extinction, many within the next few decades;

22 (i) Globally, eighteen of the nineteen hottest years on record have  
23 occurred since two thousand one;

24 (j) The state of New York is particularly vulnerable to the effects of  
25 climate change and has already been subjected to devastating disasters  
26 caused by global warming, including increasing superstorms and severe  
27 flooding;

28 (k) Marginalized populations in the state of New York and worldwide,  
29 including people of color, immigrants, indigenous communities, low-in-  
30 come individuals, people with disabilities, and the unhoused are already  
31 disproportionately affected by climate change, and will continue to bear  
32 an excess burden as temperatures increase, oceans rise, and disasters  
33 worsen;

34 (l) Restoring a safe and stable climate and reversing biodiversity  
35 loss requires an emergency mobilization on a scale not seen since World  
36 War II to attain zero greenhouse gas emissions across all sectors at  
37 wartime speed, to rapidly and safely draw down or remove all excess  
38 carbon from the atmosphere, and to implement measures to protect all  
39 people and species from the consequences of abrupt climate change and  
40 ecological destruction;

41 (m) Building a society that is resilient to the current, expected, and  
42 potential effects of climate change will protect health, lives, environ-  
43 ments, and economies. Resilience is best achieved by preparing for the  
44 most dramatic potential consequences of climate change; and

45 (n) Justice demands climate policy that addresses the specific experi-  
46 ences, vulnerabilities, and needs of the marginalized communities most  
47 affected by the effects of climate change, and includes those communi-  
48 ties in climate and ecological resilience planning, policy and actions.

49 2. It is hereby declared to be the policy of the state of New York to  
50 restore an optimal safe climate and to provide maximum protection from  
51 climate change to all people and species, globally, including the most  
52 vulnerable.

53 3. It is the intent of the legislature that the state do all of the  
54 following in furtherance of such policy:

55 (a) Convert the economy to net zero greenhouse gas emissions as quick-  
56 ly as possible.

1 (b) Immediately initiate a multigenerational effort to draw down  
2 greenhouse gases already in the atmosphere in as short a time as possi-  
3 ble, and develop research in support of this goal.

4 (c) Immediately initiate a massive effort to restore ecosystems.

5 (d) Respond to the climate emergency based on a just transition frame-  
6 work that focuses on equity, self-determination, culture, tradition,  
7 democracy, and the fundamental human right of all people to clean, heal-  
8 thy, and adequate air, water, land, food, education, and shelter.

9 (e) Engage the public in climate-emergency-related deliberations so  
10 that citizens can see their influence on the policy and resource deci-  
11 sions that impact their daily lives and their future.

12 (f) Encourage nongovernment actors to contribute to the development  
13 and implementation of solutions.

14 (g) A sweeping overhaul of the economy that centers on equity and  
15 justice in its solutions is vital to our future and must include the  
16 following goals: dramatically expand existing renewable power sources  
17 and deploy new production capacity with the goal of meeting one hundred  
18 per centum of national power demand through renewable sources; build a  
19 national, energy-efficient, "smart" grid; upgrade every residential and  
20 industrial building for state-of-the-art energy efficiency, comfort and  
21 safety; eliminate greenhouse gas emissions from manufacturing, agricul-  
22 tural and other industries, including by investing in local-scale agri-  
23 culture in communities across the country; repair and improve transpor-  
24 tation and other infrastructure, and upgrade water infrastructure to  
25 ensure universal access to clean water; fund massive investment in the  
26 drawdown of greenhouse gases; and make "green" technology, industry,  
27 expertise, products and services a major export of the United States,  
28 with the aim of becoming the international leader in helping other coun-  
29 tries become greenhouse gas neutral economies and bringing about a  
30 global transition.

31 (h) Support efforts for an emergency mobilization to restore a safe  
32 climate in other states and at the federal and global level.

33 § 2. Article 23 of the environmental conservation law is amended by  
34 adding a new title 29 to read as follows:

35 TITLE 29

36 BAN ON NEW FOSSIL FUEL INFRASTRUCTURE

37 Section 23-2901. Ban on new fossil fuel infrastructure.

38 § 23-2901. Ban on new fossil fuel infrastructure.

39 1. Legislative intent. New York state faces an existential climate,  
40 ecological, economic, and security emergency which threatens our munici-  
41 palities, state, nation, and the world; a World War II-scale mobiliza-  
42 tion is needed to eliminate greenhouse gas emissions. Human-caused  
43 climate change and air pollution are due to using fossil fuels. Climate  
44 change disproportionately impacts communities of color, children, elder-  
45 ly, Native Americans, indigenous peoples, the ill, the poor, farmers,  
46 and future generations. The state shall promote a controlled reduction  
47 of fossil fuel utilization and a transition to clean, renewable energy  
48 for the purpose of improving safety, public health, environmental  
49 protection, economic growth, and energy reliability as well as providing  
50 cost savings, creating jobs, and preventing climate catastrophe.

51 2. For the purposes of this section, "fossil fuel" shall mean coal,  
52 petroleum products and fuel gases.

53 3. For the purposes of this section, "fossil fuel infrastructure"  
54 shall mean a structure, such as a natural gas plant, coal power plant,  
55 natural gas compressor station, or ancillary facilities used to move  
56 fossil fuel from one location to another, such as a natural gas or oil

1 pipeline. The phrase does not include: motor vehicles; gas stations;  
2 underground tanks or pipes located on the site of a motor vehicle  
3 service station; retail, manufacturing or other facilities not primarily  
4 used to produce or store fossil fuels; retail products; or pipes leading  
5 to a residential or commercial building from a fuel tank to which fuel  
6 is delivered by motor vehicle. Furthermore it includes:

7 a. large-scale uses and facilities engaged in the wholesale distrib-  
8 ution, extraction, refinement or processing of fossil fuels;

9 b. terminals engaged in the bulk movement of fossil fuels, excluding  
10 rail yards, fuel storage for airports and marine servicing facilities;

11 c. bulk storage of fossil fuels in excess of two million gallons and  
12 fossil fuel facilities that do not provide direct sale or distribution  
13 to consumers; and

14 d. any additional meaning of fossil fuel infrastructure for the  
15 purposes of this section shall be determined by the commissioner in  
16 accordance with the primary intent of this section.

17 e. This ban shall not apply to uses and facilities necessary to  
18 address a bona fide imminent threat to public health, safety and  
19 welfare. This ban shall also not apply to uses and facilities necessary  
20 for public safety, including, but not limited to, police, fire and  
21 rescue agencies.

22 4. A ban shall be established on any and all new fossil fuel infras-  
23 tructure projects including as it relates to the distribution, process-  
24 ing, storage, or extraction of fossil fuels. No new permits, licenses,  
25 or any form of permission shall be granted for any new fossil fuel  
26 infrastructure project nor shall any funding, investment, or any other  
27 financial assistance be granted to any new fossil fuel infrastructure  
28 project as long as there are economically and technologically feasible  
29 alternatives to ensure energy reliability. This section shall not apply  
30 to the repair or maintenance of existing infrastructure as of the effec-  
31 tive date of this section. Such ban shall apply to the entirety of the  
32 state including all departments, agencies, offices, municipalities, and  
33 any other governmental body.

34 5. The ban shall be lifted upon an act of the legislature.

35 § 3. This act shall take effect immediately.
