FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would allow earnings while working under a shared services agreement in excess of the ten percent limitation to be included in the computation of final average salary for tiers 3 through 6. Currently, earnings in any year used in computation of the final average salary cannot exceed the average of the previous two years (four years for tier 6) by more than ten percent. A shared services agreement is an agreement between two municipalities, libraries or public or quasi-public organizations participating in the retirement system which agree to share services.

The exact number of current members as well as future members who could be affected by this legislation cannot be readily determined. In all likelihood, very few members would be affected. However, if a large number of members earn salary under these shared services agreements there could be significant additional annual costs.

If this bill is enacted, insofar as this proposal affects the New York State and Local Employees' Retirement System (NYSLERS), any costs arising from this legislation would be shared by the State of New York and the participating employers in the NYSLERS.

Insofar as this proposal affects the New York State and Local Police and Fire Retirement System (NYSLPFRS), any costs arising from this legislation would be shared by the State of New York and the participating employers in the NYSLPFRS.
