§ 151-b. Additional requirements for contracts below a certain threshold. 1. Contracts for materials, supplies, or services which are not required by section one hundred fifty-one of this article to be made on sealed bids shall be procured in a manner so as to assure the prudent and economical use of public moneys in the best interests of the taxpayers, to facilitate the acquisition of materials, supplies, and services of maximum quality at the lowest possible cost under the circumstances, and to guard against favoritism, improvidence, extravagance, fraud, and corruption. To further such objectives, an authority shall adopt internal policies and procedures governing all procurements of materials, supplies, and services which are not required to be made pursuant to the sealed bid requirements of section one hundred fifty-one of this article or of any other general or special law.

2. Such policies and procedures shall contain provisions which, among other things:

b. set forth when each such method of procurement will be utilized, taking into account which method will best further the purposes of this section and the cost-effectiveness of the method;

c. require adequate documentation of actions taken in connection with each such method of procurement; and

d. identify the respective titles responsible for purchasing. Such information shall be updated biennially.
