6 program, or technological application that simulates human-like conver-
7 sation and interaction through text messages, voice commands, or a
8 combination thereof to provide information and services to users.

18 provides materially misleading, incorrect, contradictory or harmful
19 information to a user that results in financial loss or other demonstra-
20 ble harm to the user; provided, however, that no such liability shall be
21 imposed where the proprietor has corrected the information and substan-
