

STATE OF NEW YORK

3321--C

2023-2024 Regular Sessions

IN ASSEMBLY

February 2, 2023

Introduced by M. of A. JOYNER, LUNSFORD, MAMDANI, SHRESTHA, GLICK, REYES, DeSTEFANO -- read once and referred to the Committee on Labor -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee -- again reported from said committee with amendments, ordered reprinted as amended and recommitted to said committee -- again reported from said committee with amendments, ordered reprinted as amended and recommitted to said committee

AN ACT to amend the labor law, in relation to regulating the temperature of all indoor and outdoor worksites

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. This act shall be known and may be cited as the "temperature extreme mitigation program (TEMP) act".

2
3 § 2. Legislative findings and intent. The legislature hereby finds and
4 declares that New Yorkers, working both in outdoor and indoor sites, are
5 exposed to extreme temperatures due to climate change. This involves
6 skyrocketing heat in the summer. Every year, New York city has high
7 numbers of heat-related emergency department visits, hospital admissions,
8 and deaths. According to the New York City Office of the Mayor,
9 each year there are an estimated 450 heat-related ED visits, 150 heat-related
10 hospital admissions, 10 heat-stroke deaths, and 350 heat-exacerbated
11 deaths, caused by heat worsening existing chronic conditions.

12 The legislature hereby finds and declares that the government is obligated
13 to ensure that employers provide safe conditions for their employees.
14

15 § 3. The labor law is amended by adding a new article 20-D to read as
16 follows:

ARTICLE 20-D

TEMPERATURE REGULATION BY EMPLOYERS

Section 742. Scope.

743. Definitions.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD04582-14-3

1 744. Heat protection standards.

2 745. Education and training.

3 746. Enforcement.

4 § 742. Scope. 1. The following covered industries will be held to the
5 standards in this article:

6 (a) Agriculture;

7 (b) Construction, unless the employer is party to a: (i) collective
8 bargaining agreement or (ii) project labor agreement with a bona fide
9 building and construction trades council;

10 (c) Landscaping;

11 (d) Commercial shipping;

12 (e) Food service; and

13 (f) Warehousing.

14 2. For the purposes of this article, outdoor worksites of the covered
15 industries in paragraphs (a), (b), and (c) of subdivision one of this
16 section shall be subject to the provisions herein. For the purposes of
17 this article, indoor worksites of the covered industries in paragraphs
18 (d), (e), and (f) of subdivision one of this section shall be subject to
19 the provisions herein.

20 § 743. Definitions. For the purposes of this article, the following
21 terms shall have the following meanings:

22 1. "Employee" means any person within a covered industry providing
23 labor or services within the scope of this article for remuneration for
24 a public or private entity or business within the state, without regard
25 to an individual's immigration status, and shall include, but not be
26 limited to, part-time workers, independent contractors, day laborers,
27 farmworkers and other temporary and seasonal workers working in an
28 industry identified in this article. The term shall also include indi-
29 viduals working for staffing agencies, contractors or subcontractors on
30 behalf of the employer at any individual worksite, as well as any
31 individual delivering goods or transporting people at, to or from the
32 worksite on behalf of the employer, regardless of whether delivery or
33 transport is conducted by an individual or entity that would otherwise
34 be deemed an employer under this article, or any person holding a posi-
35 tion by appointment or employment in the service of a public employer
36 within the scope of this article.

37 2. "Employer" means any individual, partnership, association, corpo-
38 ration, limited liability company, business trust, legal representative,
39 public entity, or any organized group acting as employer within a
40 covered industry identified in this article.

41 3. "Indoor worksite" means any enclosed work vehicles and any space
42 between a floor and a ceiling bound on all sides by walls. A wall
43 includes any door, window, retractable divider, garage door, or other
44 physical barriers that is temporary or permanent, whether open or
45 closed.

46 4. "Outdoor worksite" means all employers with employees performing
47 work in an outdoor environment. The term outdoor worksite does not apply
48 to incidental exposure, which exists when an employee is required to
49 perform a work activity outdoors for not longer than fifteen minutes in
50 any sixty-minute period.

51 5. "Heat stress threshold" means a heat stress threshold of eighty or
52 more degrees Fahrenheit. For the purposes of indoor temperature regu-
53 lated environments, the indoor temperature shall fall between sixty-
54 eight and seventy-five degrees Fahrenheit, to the extent practicable.

55 6. "Heat illness" means a serious medical condition resulting from
56 the body's inability to cope with extreme temperature stress thresholds,

1 and includes, but is not limited to, heat cramps, heat exhaustion, heat
2 syncope, and heat stroke.

3 7. "Personal protective equipment" or "PPE" means the necessary
4 protective equipment, gear, and uniforms to withstand extreme heat at or
5 exceeding the heat stress thresholds.

6 § 744. Heat protection standards. The employer shall fulfill the
7 following requirements when employees are in an outdoor or indoor work-
8 site and experiencing conditions at or exceeding a heat stress thresh-
9 old:

10 1. Access to hydration. The employer shall provide access to potable
11 drinking water at no cost to the employee. The water shall be located
12 as close as practicable to the areas where employees are working. Water
13 shall be provided at the beginning of the work shift to provide one
14 quart per employee per hour for drinking for the entire shift provided
15 however that an employer may begin the shift with smaller quantities of
16 water where such employer has effective procedures for replenishment
17 during the shift as needed to allow employees to drink one quart or more
18 per hour.

19 2. Medical monitoring. Employers shall closely monitor temperatures
20 and implement their workplace heat stress plan. If an employee exhibits
21 signs or reports symptoms of heat illness while taking a preventative
22 break pursuant to subdivision four of this section, or at any other
23 time, the employer shall make a reasonable effort to provide the worker
24 with access to first aid or other treatment.

25 3. Access to shade. (a) With respect to outdoor sites, shade shall be
26 made available while employees are present when the temperature exceeds
27 eighty degrees Fahrenheit and shall be as close to the worksite as
28 reasonably possible. When the outdoor temperature in the work area
29 exceeds eighty degrees Fahrenheit, the employer shall have and maintain
30 one or more areas with shade at all times while employees are present
31 that are either open to the air or provided with ventilation or cooling.
32 The amount of shade present shall be at least enough to accommodate the
33 number of employees on preventative breaks, so that they can sit in a
34 normal posture fully in the shade with at least four square feet per
35 resting employee.

36 (b) Where the employer can demonstrate that it is infeasible or unsafe
37 to have a shade structure, or otherwise to have shade present on a
38 continuous basis, the employer may utilize alternative procedures for
39 providing access to shade if the alternative procedures provide equiv-
40 alent protection.

41 4. Preventative breaks. (a) Employees shall be allowed and encouraged
42 to take preventative breaks when they feel the onset of heat illness.
43 Employees shall notify their employer as soon as possible about such
44 onset and a preventative break shall be offered to such employees. Such
45 preventative break may include access to shade. An individual employee
46 who takes a preventative break:

47 (i) Shall be monitored and asked if he or she is experiencing symptoms
48 of heat illness;

49 (ii) Shall be encouraged to remain in the shade, where applicable
50 under subdivision three of this section; and

51 (iii) Shall not be ordered back to work until any signs or symptoms of
52 heat illness have abated, but in no event, less than five minutes in
53 addition to the time needed to access shade where applicable.

54 (b) With respect to outdoor sites, where the temperature reaches or
55 exceeds ninety-five degrees Fahrenheit, the employer shall allow and

1 encourage employees to take a minimum ten minute preventative cool-down
2 rest period every two hours.

3 5. Personal protective equipment. Employers shall provide the neces-
4 sary protective equipment, gear, and uniforms to withstand temperatures
5 at or exceeding the heat stress thresholds to the extent practicable.
6 This may include, but is not limited to:

7 (a) Fans, if possible;

8 (b) Air-conditioning, which shall be mandated in all delivery vehicles
9 and warehouses in an industry identified in this article; and

10 (c) Anything additional deemed necessary by the department to combat
11 extreme heat.

12 6. Vehicle standards. Employees who spend more than sixty minutes in
13 workplace or employer provided vehicles each day or whose worksite is
14 considered an employer provided vehicle shall have adequate air-condi-
15 tioning available inside such vehicle.

16 § 745. Education and training. 1. Training. The department shall
17 create a training curriculum outlining the signs of heat illness and the
18 available medical responses. Such training shall be administered by the
19 employer at time of hiring or the employee's training fund if a member
20 of organized labor.

21 2. Mandated signage and materials. The department shall promulgate
22 signage and educational materials that are required to be made available
23 to employees by their employer in the twelve most common languages
24 spoken in the state regarding the following:

25 (a) Signs of heat illness;

26 (b) Heat stress thresholds;

27 (c) Employer required protections from heat stress thresholds;

28 (d) Where employees can report an employer's lack of accommodation;
29 and

30 (e) Anything else deemed necessary by the department.

31 3. Unlawful retaliation. For the purposes of this article, there
32 shall be a rebuttable presumption of unlawful retaliation if an employer
33 in any manner discriminates, retaliates, or takes any adverse action
34 against any employee within ninety days of the employee initiating a
35 complaint pursuant to this article.

36 4. Outreach campaign. The department shall establish a statewide
37 outreach campaign to educate employees on the heat illness standards
38 established and ensure that employers are providing access to proper
39 signage and materials.

40 § 746. Enforcement. The department shall promulgate rules and regu-
41 lations to require the following:

42 1. Every employer in a covered industry shall collect and maintain
43 data and records as required by the department on all heat-related
44 illnesses and fatalities which occur at an outdoor or indoor worksite.

45 2. Every employer in a covered industry shall submit reports of the
46 data collected pursuant to subdivision one of this section annually to
47 the department and such reports shall be published by the department on
48 a searchable database. Employers shall make such reports available to
49 any employee or applicable labor organization upon request within ten
50 business days. An extreme heat-related fatality on a construction site
51 shall be deemed a work-related injury for the purposes of reporting
52 pursuant to section forty-four of this chapter.

53 3. Every employer in a covered industry shall submit for approval a
54 written plan on how heat-related stress will be mitigated to the depart-
55 ment. Once approved by the department, an employer shall provide such

1 plan to all employees and applicable labor organizations on an annual
2 basis.

3 4. Every employer in a covered industry shall be subject to fines for
4 not adhering to the mandatory reporting and enforcement protocols.
5 Employers shall be required to pay penalties of no less than fifty
6 dollars per day for failing to implement heat protection standards as
7 set forth in this article. The department shall administer notice and
8 collect all fines.

9 5. The department shall establish a worker hotline and an online form
10 where employees can file complaints with the department regarding heat
11 protection standards.

12 6. Any other reporting or enforcement protocols necessary to ensure
13 the protection of workers.

14 § 4. This act shall take effect on the ninetieth day after it shall
15 have become a law. Effective immediately, the addition, amendment and/or
16 repeal of any rule or regulation necessary for the implementation of
17 this act on its effective date are authorized to be made and completed
18 on or before such effective date.
