

STATE OF NEW YORK

5101

2023-2024 Regular Sessions

IN ASSEMBLY

March 2, 2023

Introduced by M. of A. BYRNES, DeSTEFANO, HAWLEY, PALMESANO, MORINELLO, GALLAHAN, SAYEGH, LEMONDES, J. M. GIGLIO -- read once and referred to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to enacting the "solar panel collection act"; and providing for the repeal of such provisions upon expiration thereof

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Short title. This act shall be known and may be cited as
2 the "solar panel collection act".

3 § 2. Article 27 of the environmental conservation law is amended by
4 adding a new title 34 to read as follows:

TITLE 34

SOLAR PANEL COLLECTION ACT

Section 27-3401. Definitions.

8 27-3403. Solar panel collection.

9 27-3405. Solar panel wholesaler and retailer requirements.

10 27-3407. Department responsibilities.

11 27-3409. Disposal prohibition.

§ 27-3401. Definitions.

13 1. "Collection program" means a system for the collection, transporta-
14 tion and recycling of out-of-service solar panels that is financed and
15 managed or provided by a solar panel manufacturer individually or
16 collectively with other solar panel manufacturers within this state in
17 accordance with this title.

18 2. "Out-of-service solar panel" means a solar panel that is removed,
19 replaced or otherwise taken out of service.

20 3. "Qualified contractor" means a person engaged in the business of
21 installing, repairing, servicing or the removal of solar panels and who
22 employs seven or more service technicians.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets
[-] is old law to be omitted.

LBD05335-01-3

1 4. "Qualified local government authorities" means any municipal corpo-
2 ration or planning unit as defined in section 27-0107 of this article,
3 or county departments of health.

4 5. "Solar panel" means a bank of solar cells that, when exposed to
5 radiation from the sun, can generate heating or electricity.

6 6. "Solar panel manufacturer" means a person who manufactures one or
7 more name brand solar panels within this state.

8 7. "Solar panel retailer" means a person who sells solar panels of any
9 kind primarily to homeowners or other consumers through any sale or
10 distribution mechanism including sales using the internet or catalogs.

11 8. "Solar panel wholesaler" means a person who is engaged in the
12 distribution and wholesale selling of solar panels to qualified contrac-
13 tors or other consumers, and whose total wholesale sales account for
14 eighty percent or more of its total sales. A solar panel manufacturer is
15 not, by virtue of manufacturing, a solar panel wholesaler.

16 9. "Consumer" means an individual, business, partnership, association,
17 corporation, company, municipality, political subdivision or other legal
18 entity that purchases, operates, owns or uses one or more solar panels.

19 10. "Recycling" means refurbishing out-of-service solar panels for
20 continued reuse as a product or capturing the metals via reclamation.

21 § 27-3403. Solar panel collection.

22 1. Each solar panel manufacturer shall, individually or collectively,
23 with other solar panel manufacturers, establish and maintain a program
24 for the collection, transportation and recycling of out-of-service solar
25 panels in accordance with the provisions of this section.

26 2. Each solar panel manufacturer shall, individually or collectively
27 with other solar panel manufacturers through a collection program, do
28 the following:

29 (a) On and after July first, two thousand twenty-five, compile a list
30 of solar panel wholesalers within this state.

31 (b) Establish a system to collect, transport and recycle out-of-ser-
32 vice solar panels from all collection sites.

33 (c) Not include any fees or other charges to consumers or persons
34 participating in the program.

35 (d) Beginning July first, two thousand twenty-five, conduct education
36 and outreach efforts, including, but not limited to the following:

37 (i) establish and maintain a public website for the dissemination of
38 educational materials to promote the collection and recycling of out-of-
39 service solar panels. This website shall include templates of the educa-
40 tional materials on the internet website in a form and format that can
41 be easily downloaded and printed. The link to this website shall be
42 provided to the department;

43 (ii) contact solar panel wholesalers at least once a year to encourage
44 their support and participation in educating consumers on the importance
45 of statutory requirements for the collection and recycling of out-of-
46 service solar panels;

47 (iii) create and maintain a web-based program that allows contractors
48 and consumers to identify collection sites for out-of-service solar
49 panels in the state and provide a list of collection sites to the
50 department; and

51 (iv) develop informational articles, press releases, and news stories
52 pertaining to the importance of and opportunities for collecting and
53 recycling out-of-service solar panels and distribute those materials to
54 trade publications, local media, and stakeholder groups.

55 (e) On or before July first, two thousand twenty-five, develop and
56 update as necessary educational and other outreach materials for

1 distribution to qualified contractors, contractor associations and
2 consumers. These materials shall be made available for use by partic-
3 ipating solar panel wholesalers, solar panel retailers, qualified
4 contractors, and qualified government authorities. The materials shall
5 include, but not be limited to, the following:

6 (i) signage, such as posters and cling signage, that can be prominent-
7 ly displayed to promote the recycling of out-of-service solar panels to
8 qualified contractors and consumers; and

9 (ii) written materials or templates of materials for reproduction by
10 solar panel wholesalers and solar panel retailers to be provided to
11 consumers at the time of purchase or delivery of a solar panel. The
12 materials shall include, but not be limited to, information on the
13 importance of recycling out-of-service solar panels and opportunities
14 for the collection of these solar panels.

15 (f) Provide an opportunity for the department to review and offer
16 feedback and suggestions on the collection program.

17 3. No later than April first, two thousand twenty-six, and no later
18 than April first of each year thereafter, each solar panel manufacturer
19 shall, individually or collectively with other solar panel manufactur-
20 ers, submit an annual report on its collection program to the department
21 covering the one-year period ending December thirty-first of the previ-
22 ous year. Each report shall be posted on the solar panel manufacturer's
23 or program operator's respective internet website. The annual report
24 shall include the following:

25 (a) the number of out-of-service solar panels collected and recycled
26 under this section during the previous calendar year;

27 (b) a list of all solar panel manufacturers, solar panel wholesalers,
28 contractors, qualified local government authorities, and solar panel
29 retailers participating in the program as solar panel collection sites;

30 (c) an accounting of the program's administrative costs;

31 (d) a description of outreach strategies employed under paragraph (d)
32 of subdivision two of this section;

33 (e) examples of outreach and educational materials used under para-
34 graph (d) of subdivision two of this section;

35 (f) the internet website address or addresses where the annual report
36 may be viewed online;

37 (g) a description of how the out-of-service solar panels were
38 collected and recycled;

39 (h) any modifications that the solar panel manufacturer is planning to
40 make in its collection program; and

41 (i) the identification of a collection program contact and the busi-
42 ness phone number, mailing address, and e-mail address for the contact.

43 4. All solar panel manufacturers participating in the program shall
44 handle and manage any out-of-service solar panels that cannot be recy-
45 cled and have been determined to be or to contain hazardous waste, as
46 defined pursuant to regulations of the department, consistent with the
47 requirements for the management and disposal of hazardous waste.

48 5. On and after July first, two thousand twenty-five, no solar panel
49 manufacturer shall sell, offer to sell, distribute, or offer to distrib-
50 ute solar panels unless the manufacturer participates as a collection
51 site for out-of-service solar panels or requests and receives a waiver
52 from the department following a demonstration that such participation
53 would pose an undue burden.

54 § 27-3405. Solar panel wholesaler and retailer requirements.

55 No solar panel wholesaler or solar panel retailer located within this
56 state shall sell, offer for sale or distribute any solar panel for final

sale unless the solar panel manufacturer of such solar panel is listed on the department's website, in accordance with the provisions of this title.

§ 27-3407. Department responsibilities.

1. No later than June first, two thousand twenty-six, the department shall maintain on its website information regarding the collection and recycling of out-of-service solar panels in the state. The information shall include the following:

(a) a description of the collection programs established under this section and a list of solar panel manufacturers of such solar panels participating in the collection program pursuant to this title; and

(b) a list of all solar panel wholesalers, qualified contractors, qualified local government authorities, and solar panel retailers participating in the program as collection sites.

2. No later than November first, two thousand twenty-seven, the department shall submit a written report to the governor and the legislature regarding the effectiveness of the collection programs established under this section, information on the number of out-of-service solar panels collected, and how the out-of-service solar panels were managed. The department shall use this information to recommend whether the provisions of this section should be extended, along with any other statutory changes. In preparing the report, the department shall consult with solar panel manufacturers, environmental organizations, municipal recyclers, and other interest groups.

§ 27-3409. Disposal prohibition.

1. No transporter shall knowingly commingle solar panels with solid waste or recyclable materials.

2. No transporter shall knowingly deliver solar panels or knowingly cause such materials to be delivered to the following facilities located within this state:

(a) an incinerator;

(b) a landfill;

(c) a transfer station; or

(d) a facility who the transporter knows or should know will either commingle such materials with other solid waste or deliver such materials to an incinerator or a landfill for disposal.

3. No operator of an incinerator or a landfill shall knowingly accept solar panels for disposal.

4. No operator of a transfer station shall knowingly commingle solar panels with other solid waste or cause such materials to be transferred to an incinerator or landfill for disposal.

5. Each landfill and incinerator shall post, in a conspicuous location at the facility, a sign stating that solar panels are not accepted at the facility.

§ 3. a. Any consumer or qualified contractor who replaces a solar panel from a building shall deliver the solar panel to an appropriate collection site.

b. Any person or contractor who demolishes a building shall ensure that all solar panels are removed from the building prior to demolition and shall deliver the solar panels to a collection site.

c. Any department, authority, instrumentality, or municipal corporation of the state administering a program that involves the removal or replacement of solar panels as a result of any statutory requirement, shall inform contractors of their statutory obligations to deliver the solar panels to a collection site and prohibiting the disposal of such solar panels in a solid-waste facility.

1 d. Any contractor, organization or subcontractor of such organization,
2 who contracts with or receives funding or financing provided in whole or
3 in part by or through any department, agency, instrumentality, or poli-
4 tical subdivision of this state for the sale, distribution, service,
5 removal, collection and recycling of solar panels, shall ensure the
6 collection, transportation and proper management of out-of-service solar
7 panels in accordance with the provisions of title 34 of article 27 of
8 the environmental conservation law.

9 § 4. This act shall take effect immediately, and shall expire and be
10 deemed repealed January 1, 2035.
