FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

SUMMARY OF BILL: This proposed legislation would amend the Retirement and Social Security Law (RSSL) to permit Tier 3, Tier 3 Revised, and Tier 3 Enhanced members (who are subject to Article 14) of the New York City Police Pension Fund (POLICE) to take loans against their accumulated total member contributions with interest.

Effective Date: Upon enactment.

BACKGROUND: Tier 1 and Tier 2 members of POLICE are generally permitted, subject to certain restrictions, to borrow from their accumulated Basic Member Contributions (BMC) with interest. However, Tier 3, Tier 3 Revised, and Tier 3 Enhanced members are currently not permitted to take loans on their contributions.

The proposed legislation would permit Tier 3, Tier 3 Revised, and Tier 3 Enhanced members of POLICE to borrow from their accumulated total member contributions, which include Enhanced Plan Additional Member Contributions (AMC). Loans may be taken no more than once a year, and the dollar amount is subject to minimum and maximum restrictions. For members with a date of membership before January 1, 2018, the members may take out a loan up to 75% of their total contributions plus accumulated interest. For members with a date of membership on and after January 1, 2018, the loan is limited to 50% of their total member contributions plus accumulated interest or \$50,000, whichever is less.

FINANCIAL IMPACT: In the event an outstanding loan exists at retirement, the balance of the unpaid loan is converted to an annuity based on the yield on 30-year U.S. Treasury securities and deducted from the annual retirement allowance otherwise payable. This conversion is made on an actuarial basis that is different than the basis used to determine the employer contribution to POLICE. As a result of this difference in actuarial bases and based on the census data and actuarial assumptions and methods described herein, the enactment of this proposed legislation would increase the Present Value of Future Benefits (PVFB) by approximately \$43.7 million.

Under the Entry Age Normal cost method used to determine the employer contributions to POLICE, there would be an increase in the Unfunded Accrued Liability (UAL) of approximately \$11.3 million and an increase in the Present Value of Future Employer Normal Cost of approximately \$32.4 million.

FINANCIAL IMPACT - ANNUAL EMPLOYER CONTRIBUTIONS: The enactment of this proposed legislation would result in an initial increase in annual employer contributions of approximately \$3.4 million. This increase consists of an increase in the Normal Cost in addition to the UAL payment.

Future costs will vary based on the amount of member contributions eligible for loans. Individual member balances are expected to increase, however in the future, a larger portion of the membership will have membership dates on or after January 1, 2018, and therefore be limited to a maximum loan percentage of 50% and a maximum loan amount of \$50,000.

New UAL attributable to benefit changes are generally amortized over the remaining working lifetime of those impacted by the benefit changes. The remaining working lifetime for this group is approximately 18 years and the increase in UAL was therefore amortized over an 18-year period (17 payments under the One-Year Lag Methodology) using level dollar payments.

CENSUS DATA: The estimates presented herein are based on the census data used in the June 30, 2022 actuarial valuation of POLICE to determine the Preliminary Fiscal Year 2024 employer contributions.

The 19,375 Tier 3, Tier 3 Revised, and Tier 3 Enhanced members in POLICE as of June 30, 2022 had an average age of approximately 32.2 years, average service of approximately 5.7 years, and an average salary of approximately \$101,600.

ACTUARIAL ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the actuarial assumptions and methods used for the Preliminary Fiscal Year 2024 employer contributions of POLICE.

For the purposes of this Fiscal Note, it is assumed that the changes would be reflected for the first time in the June 30, 2022 actuarial valuation of POLICE used to determine employer contributions for Fiscal Year 2024.

It has been further assumed that the yield on 30-year U.S. Treasury securities, on a long-term basis would equal 3.5% per year and that 25% of member balances available for borrowing would be taken as loans at retirement.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the realization of the actuarial assumptions used, demographics of the impacted population and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein.

Costs are also dependent on the actuarial methods used, and therefore different actuarial methods could produce different results. Quantifying these risks is beyond the scope of this Fiscal Note.

Not measured in this Fiscal Note are the following:

- * The initial additional administrative costs to implement the proposed legislation.
