AN ACT to amend the public health law and the insurance law, in relation to providing information to patients and the public on policy-based exclusions

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative findings. The legislature finds that since 2003  
2 more than 40 community hospitals in New York state have closed.  
3 The legislature additionally finds that as a result of hospital  
4 consolidation, large health care systems now control more than 70  
5 percent of acute hospital beds in the state and that these systems some-  
6 times remove categories of care from local hospitals, leaving patients  
7 in regions of the state without access to particular types of care,  
8 including some types of emergency care.  
9 The legislature further finds that patients do not have the ability to  
10 determine whether health care facilities in their area provide the care  
11 they seek, because information about how facility restrictions impact  
12 options for care is too difficult to obtain.  
13 The legislature also finds that denials and poor access to care can  
14 lead to serious adverse health impacts that jeopardize individuals'  
15 lives and wellbeing and that New York needs to understand health care  
16 gaps and their impact statewide.  
17 Finally, the legislature finds that some denials of care violate state  
18 and federal law.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.
