

# STATE OF NEW YORK

5001

2023-2024 Regular Sessions

## IN SENATE

February 21, 2023

Introduced by Sen. HINCHEY -- read twice and ordered printed, and when printed to be committed to the Committee on Local Government

AN ACT to amend the local finance law, in relation to providing a period of probable usefulness for lead service line replacement programs as a capital asset

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Paragraph a of section 11.00 of the local finance law is  
2 amended by adding a new subdivision 109 to read as follows:

3 109. Lead service line replacement programs established by a munici-  
4 pality, school district or district corporation, including, but not  
5 limited to programs that inventory, design and replace publicly owned  
6 and privately owned lead service lines within an established water  
7 system, thirty years. As used in this subdivision, "lead service line"  
8 means a service line made in whole or in part of lead, which connects a  
9 water main to a building inlet. A lead service line may be owned by the  
10 water system, a property owner, or both. A lead gooseneck, pigtail, or  
11 connector is considered a lead service line, regardless of the service  
12 line material to which a lead gooseneck, pigtail, or connector is  
13 attached. Gooseneck, pigtail, or connector means a short section of  
14 piping, typically not exceeding two feet, which can be bent and used for  
15 connections between rigid service piping. A galvanized iron or steel  
16 service line is considered a lead service line if it ever was or is  
17 currently downstream of any lead service line or service line of unknown  
18 material.

19 § 2. This act shall take effect immediately.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets  
[-] is old law to be omitted.
