Introduced by COMMITTEE ON RULES -- (at request of M. of A. AN ACT relating to authorizing the state university of New York at Stony Brook to lease certain lands for the purpose of constructing a facility to support research and development to address the national semiconductor chip shortage and related environmental sustainability issues

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative findings. The legislature finds that the state  
2 university of New York at Stony Brook ("Stony Brook") created the  
3 Research and Development Park in order to support the cross-pollination  
4 of ground-breaking research and cutting edge technology in the private  
5 sector to benefit the students, faculty and staff as well as the broader  
6 community. Now, Stony Brook has determined there is an opportunity for  
7 Veeco to construct an additional facility in the Research and Develop-  
8 ment Park, which would provide needed additional facilities to support  
9 the research and development needs of faculty, staff, students, and the  
10 community and seeks to use approximately 8 acres of underutilized land  
11 on Stony Brook's Research and Development Park to build a facility to  
12 address these research and development needs, as well as engage in its  
13 private commercial research, development and manufacturing of tools to  
14 fabricate semiconductor chips, other memory storage devices or any  
15 future technology developed to hold data for later retrieval. Veeco,  
16 which provides new technology to aid in the manufacture of semiconductor  
17 chips, would address the national semiconductor chip shortage and  
18 related environmental sustainability issues, fulfilling a necessary and  
19 vital state and federal public purpose. The legislature further finds  
20 that granting the trustees of the state university of New York the  
21 authority and power to lease and otherwise contract to make available
