- (a) The affordability of health care and health insurance is extremely important in ensuring that the maximum number of New York State residents can obtain high quality affordable health care;
- (b) Health care and health insurance are currently subject to several 8 taxes that directly and indirectly increase the cost of health insurance 9 coverage, including an annual flat tax on all privately insured people in New York State called the covered lives assessment that raises the 10 11 costs to health plans by \$1.1 Billion, a 9.63% sales tax surcharge on 12 certain hospital based health services that costs consumers \$3.6 13 Billion, a 1.75% flat tax on all commercial health insurance policies 14 that costs consumers \$350 Million, and a gross receipts tax on insurance 15 companies called a section 206 assessment that costs health plans \$149 16 Million a year;
- (c) Collectively, the taxes on health care and health insurance cost consumers a total of over \$5 Billion in 2018, which exceeds the total 18 amount of taxes paid by corporations through the franchise taxes and exceeds all other types of taxes except for personal income taxes and 20 general sales taxes; and
- 22 (d) The taxes on health care and health insurance are fundamentally 23 regressive taxes because the taxes are unrelated to a consumer's wealth 24 or ability to pay, directly impact hospitalization costs at a time when 25 consumers are facing some of their greatest health care challenges,
