2398--A

2023-2024 Regular Sessions

IN ASSEMBLY

January 26, 2023

Introduced by M. of A. PAULIN, CUNNINGHAM -- read once and referred to the Committee on Energy -- reported and referred to the Committee on Ways and Means -- recommitted to the Committee on Ways and Means in accordance with Assembly Rule 3, sec. 2 -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee

AN ACT to amend the public service law and the public authorities law, in relation to developing microgrids in preparation for extreme weather events and other risks to public security

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The public service law is amended by adding a new section 1 2 66-x to read as follows: 3 § 66-x. Microgrid development program. 1. Definitions. As used in this 4 section: 5 (a) "community outage asset" means a public or private entity that 6 provides critical services to the public during an extended electric 7 distribution outage. Community outage assets shall include, but are not limited to: telecommunications providers, hospitals, nursing homes, 8 9 large retail stores, supermarkets, government agencies, data centers, 10 transportation systems, financial institutions, gas stations, educa-11 tional institutions, large multi-family residential housing, wastewater 12 treatment facilities, community centers and other customers deemed by the commission to provide a critical service to the public that would 13 promote or enhance health and safety during an outage of the electric 14 15 distribution system; 16 (b) "extended electric distribution outage" means a total or partial 17 outage of an electric corporation's distribution system that continues 18 for a period of twenty-four hours or longer;

19 <u>(c) "uninterrupted" means that the output of the microgrid system is</u> 20 <u>delivered to the end-use customer throughout an extended electric</u>

EXPLANATION--Matter in <u>italics</u> (underscored) is new; matter in brackets [-] is old law to be omitted.

A. 2398--A

2

1	distribution outage, with the exception of momentary interruptions asso-
2 3	ciated with transitions to and from grid parallel and grid islanded operations; and
4	(d) "microgrid" shall mean a load or group of interconnected loads and
5	distributed energy resources within clearly defined electrical bounda-
6	ries that acts as a single controllable entity with respect to the elec-
7	tric grid. A microgrid can connect and disconnect from the electric
8	grid to enable it to operate in both grid-connected or island-mode.
9	2. On or within one hundred twenty days of the effective date of this
10	section, the commission shall, after a hearing held on notice, adopt an
11	order requiring the New York state energy research and development
12^{11}	authority to establish a program to support the development of micro-
13	grids that are capable of providing an uninterrupted supply of power to
14^{10}	one or more community outage assets through an extended electric
15	distribution outage. Such program shall provide overall funding in the
16	amount of seventy-five million dollars for the years two thousand twen-
17	ty-five through two thousand twenty-nine. Such program shall include a
18	preference for those microgrids that:
19	(a) maximize annual reductions in carbon dioxide equivalent, oxides of
20	nitrogen, sulfur dioxide and particulate matter emissions achieved rela-
21	tive to marginal grid emissions for the region in which the project is
22	located. For purposes of this section the commission shall define
23	marginal emissions using the same metric or metrics that are used to
24	quantify emissions reductions achieved by other New York state energy
25	research and development authority clean energy programs;
26	(b) displace or otherwise reduce the operation of diesel back-up
27	generators; and
28	(c) are more capable of being expeditiously permitted, interconnected
29	and commissioned in preparation for extreme weather events and other
30	grid related risks.
31	§ 2. The public authorities law is amended by adding a new section
32	1020-nn to read as follows:
33	<u>§ 1020-nn. Microgrid development program. 1. Definitions. As used in</u>
34	this section:
35	(a) "community outage asset" means a public or private entity that
36	provides critical services to the public during an extended electric
37	distribution outage. Community outage assets shall include, but are not
38	limited to: telecommunications providers, hospitals, nursing homes,
39	large retail stores, supermarkets, government agencies, data centers,
40	transportation systems, financial institutions, gas stations, educa-
41	tional institutions, health care providers, large multi-family residen-
42	tial housing, wastewater treatment facilities, community centers and
43	other customers deemed by the commission to provide a critical service
44	to the public that would promote or enhance health and safety during an
45	outage of the electric distribution system;
46	(b) "extended electric distribution outage" means a total or partial
47	outage of the authority's electric distribution system that continues
48	for a period of twenty-four hours or longer;
49	(c) "uninterrupted" means that the output of the microgrid system is
50	delivered to the end-use customer throughout an extended electric
51	distribution outage, with the exception of momentary interruptions asso-
52	ciated with transitions to and from grid parallel and grid islanded
53	operations; and
54	(d) "microgrid" shall mean a load or group of interconnected loads and
55	distributed energy resources within clearly defined electrical bounda-
56	ries that acts as a single controllable entity with respect to the elec-

A. 2398--A

1	tric grid. A microgrid can connect and disconnect from the electric
2	grid to enable it to operate in both grid-connected or island-mode.
3	2. On or within one hundred eighty days of the effective date of this
4	section, the authority shall establish a program to support the develop-
5	ment of microgrids that are capable of providing an uninterrupted supply
б	of power to one or more community outage assets through an extended
7	electric distribution outage. Such program shall provide overall funding
8	in the amount of twenty-five million dollars for the years two thousand
9	twenty-five through two thousand twenty-nine. Such program shall include
10	<u>a preference for those microgrids that:</u>
11	(a) maximize annual reductions in carbon dioxide equivalent, oxides of
12	nitrogen, sulfur dioxide and particulate matter emissions achieved rela-
13	tive to marginal grid emissions for the authority's service territory.
14	For purposes of this section the authority shall define marginal emis-
15	sions using the same metric or metrics that are used to quantify emis-
16	sions reductions achieved by other New York state energy research and
17	<u>development authority clean energy programs;</u>
18	(b) displace or otherwise reduce the operation of diesel back-up
19	generators; and
20	(c) are more capable of being expeditiously permitted, interconnected
21	and commissioned in preparation for extreme weather events and other
22	grid related risks.
23	§ 3. This act shall take effect immediately.
