

STATE OF NEW YORK

2735

2023-2024 Regular Sessions

IN SENATE

January 24, 2023

Introduced by Sen. COMRIE -- read twice and ordered printed, and when printed to be committed to the Committee on Energy and Telecommunications

AN ACT to amend the public service law, in relation to requiring gas pipeline facilities to accelerate the repair, rehabilitation, and replacement of equipment or pipelines that are leaking or at a high risk of leaking

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The public service law is amended by adding a new section 66-u to read as follows:

§ 66-u. Pipeline modernization and consumer protection. 1. As used in this section, "gas pipeline facility" means (a) a distribution facility, and (b) a gas utility.

2. Each operator of a gas pipeline facility shall accelerate the repair, rehabilitation, and replacement of gas piping or equipment that is:

(a) leaking; or

(b) may pose high risks of leaking, or may no longer be fit for service, because of: (i) inferior materials, (ii) poor construction practices, (iii) lack of maintenance, or (iv) age.

3. In complying with subdivision two of this section, the commission shall: (a) develop prioritized timelines to repair all leaks based on the severity of the leak, including non-hazardous leaks, or replace identified leaking or high-risk piping or equipment, including leaks identified as part of an integrity management plan developed under this section if applicable;

(b) adopt a cost-recovery program that includes (i) replacement plans with targets and benchmarks for leaking or high-risk infrastructure replacement, (ii) consideration of the economic, safety, and environmental benefits of reduced gas leakage, including consideration of

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD04539-01-3

1 reduced operation and maintenance costs and reduced costs attributable
2 to lost or unaccounted-for natural gas, and (iii) reporting on the
3 reductions in lost or unaccounted-for gas as a result of pipeline
4 replacements;

5 (c) adopt a standard definition and methodology for calculating and
6 reporting unaccounted-for gas to improve data quality;

7 (d) adopt limits on cost recovery for the lost and unaccounted-for
8 gas; and

9 (e) require use of best available technology to detect gas leaks.

10 4. No later than one year after the effective date of this section,
11 the commission shall, after notice and opportunity to comment, issue
12 non-binding guidelines identifying best practices for identifying and
13 classifying high-risk pipeline infrastructure and leaks for repair or
14 replacement.

15 5. Notwithstanding any other provision of law to the contrary, no
16 later than one year after the effective date of this section, the
17 commission shall establish and publish forms that adopt a standard defi-
18 inition and methodology for calculating and reporting unaccounted-for
19 gas, including, when possible, information on the causes of unaccount-
20 ed-for gas and the quantities associated with each cause, for use by
21 applicable state agencies to standardize the data collected on unac-
22 counted-for gas.

23 6. Operators of gas pipeline facilities in cities with a population of
24 one million or more shall establish a database of pipeline infrastruc-
25 ture that includes its age and state of repair and shall share this
26 information with the coordinated building inspection data analysis
27 system.

28 § 2. This act shall take effect immediately.
